1. Project Objectives

Train teachers from the Ministry of Education in the use of ICT tools to improve their teaching performance, in order to promote educational innovation and online learning.

Train priority groups or digital illiterates in the use of ICT tools to apply what they have learned in their day-to-day lives, promoting their digital inclusion and improving their quality of life.

2. Purpose of the Handbook

Provide priority groups or digitally illiterate groups with a detailed guide to the use of the WhatsApp messaging application that has the essential features so that they can function fluently within the platform.

3. Scope

This user manual covers the main features that a user should know in order to function effectively within the WhatsApp application. Features such as downloading, registering, and verifying a user; messaging and file management; extra states and interactions; privacy settings and, finally, the use of WhatsApp Web.

4. Aimed at

This document has been prepared with the purpose of providing guidance and support to priority groups, as well as those classified as digitally illiterate. These recipients include, but are not limited to, individuals who may face specific challenges in the use of digital tools, as well as those considered as a priority population in accessing the information and services provided in this document.

5. Introduction of the app

WhatsApp, a leading global messaging app, revolutionizes the way people communicate by offering an intuitive and versatile platform. Working on both mobile devices and web browsers, WhatsApp allows users to send text messages, emojis, media files, and make calls, connecting them instantly and effectively. Through its various features, from creating ephemeral statuses to participating in groups and customizing with Avatars, WhatsApp stands out as a comprehensive tool that goes beyond simple messaging, facilitating a rich and complete communication experience. In this introduction, we'll explore the different dimensions of how WhatsApp transforms social interaction and digital communication.

6. Basics

Before we dive into the world of mobile communications, it's essential to understand a few basics. Here are two key elements to get the most out of this technology:

1. *Know what mobile communications are:*

Mobile communications encompass various forms of interaction through mobile devices, such as smartphones and tablets. This includes phone calls, video calls, and text messages, among others. These technologies rely on mobile networks to facilitate data transmission and

real-time communication.

2. *How to use a smartphone:*

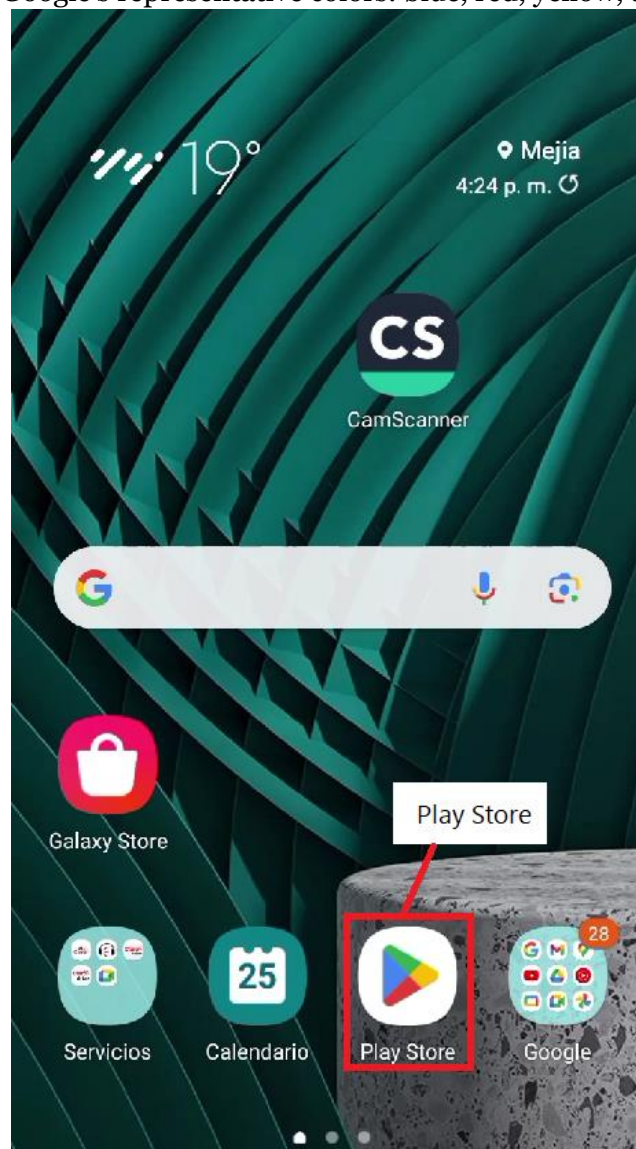

A smartphone is a multifunctional device that goes beyond simply making calls. Learning how to use its basic functions is essential to get the most out of it. This involves familiarizing yourself with the touchscreen, understanding the operating system interface, installing and uninstalling apps, configuring basic settings, and handling calling and messaging features.

7. **Steps to follow**

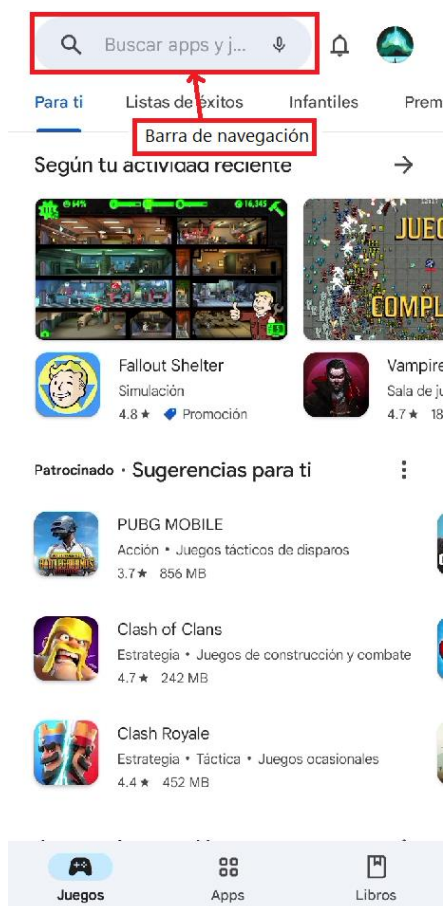

NOTE 1: An internet connection is required to perform each and every activity in this user manual.

7.1. **Download & Installation**

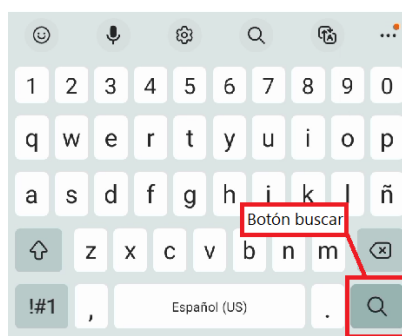

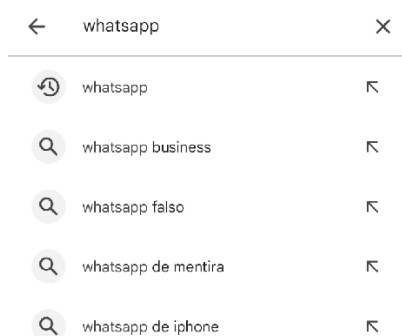

The "Play Store" app must be located inside your Android smartphone. This app has a triangle symbol with Google's representative colors: blue, red, yellow, and green.

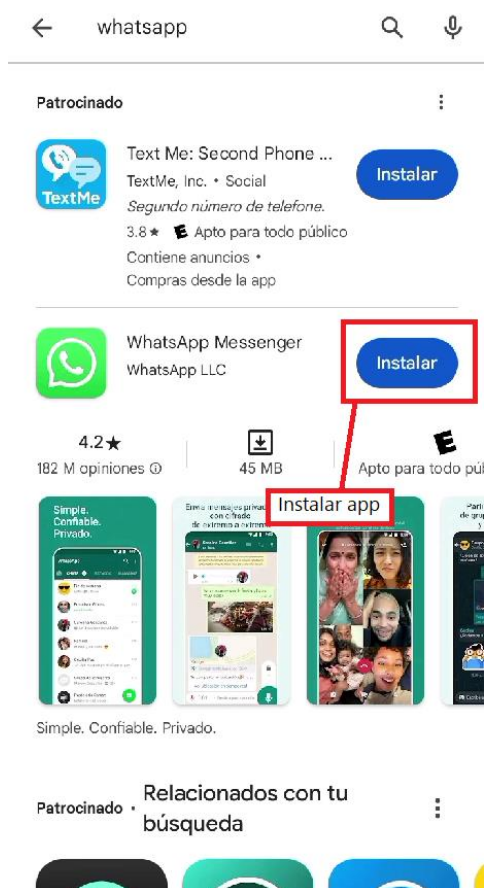

Once inside the Play Store, we must locate the navigation bar that is located at the top.

Now, we must type "WhatsApp" in the search bar with the help of our smartphone's keyboard and press the search button.

Now, we need to locate the application that says "WhatsApp Messenger" and press the "Install" button on its right side.

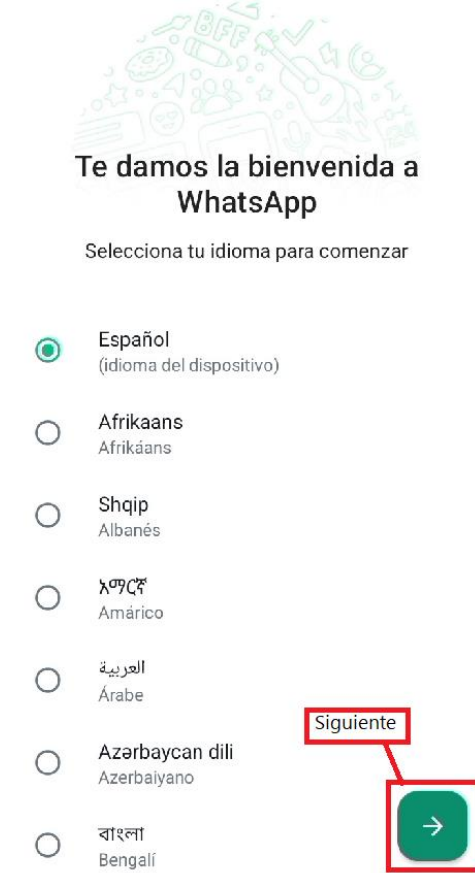

Once the app is installed, you can open it and start using WhatsApp on your phone.

7.2. Registration & Verification

First, we must select the language we want our WhatsApp application to be in. In this case, select Spanish and click on the next button.

Then, we agree to the terms and conditions.

Now, we must select the country of residence and then enter our phone number. We give it on next.

Ingresar tu número de teléfono ⋮

WhatsApp necesitará verificar tu número?

País de residencia

Ecuador ▼

+ 593

Se pueden aplicar cargos internacionales del operador.

Número telefónico

Sig.

https://www.whatsapp... X

1	2 ABC	3 DEF	✕
4 GHI	5 JKL	6 MNO	Realiz.
7 PQRS	8 TUV	9 WXYZ	*+ #

Now we need to verify that the number entered is ours. To do this, we are going to select another verification method

← **Verifica el número de teléfono** ⋮

Para realizar una verificación automática mediante una llamada perdida a tu teléfono, haz lo siguiente:

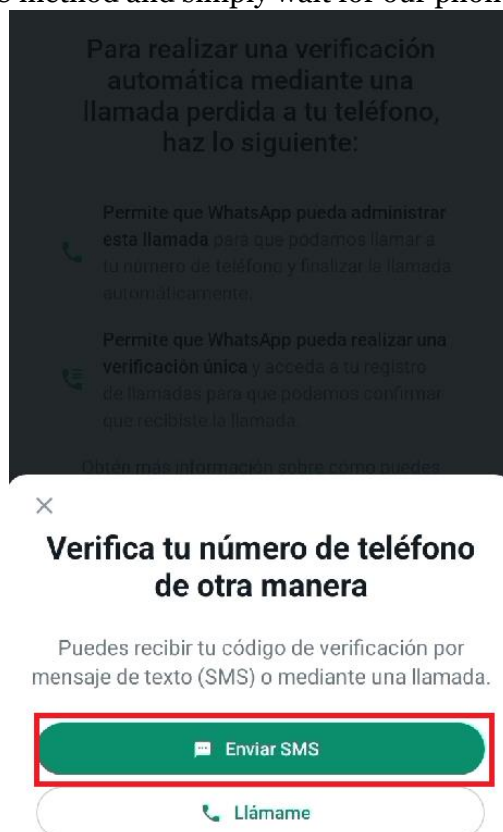

- Permite que WhatsApp pueda administrar esta llamada para que podamos llamar a tu número de teléfono y finalizar la llamada automáticamente.
- Permite que WhatsApp pueda realizar una verificación única y acceda a tu registro de llamadas para que podamos confirmar que recibiste la llamada.

Obtén más información sobre cómo puedes administrar los [permisos de verificación de tu teléfono](#).

Continuar

Verificar de otra manera

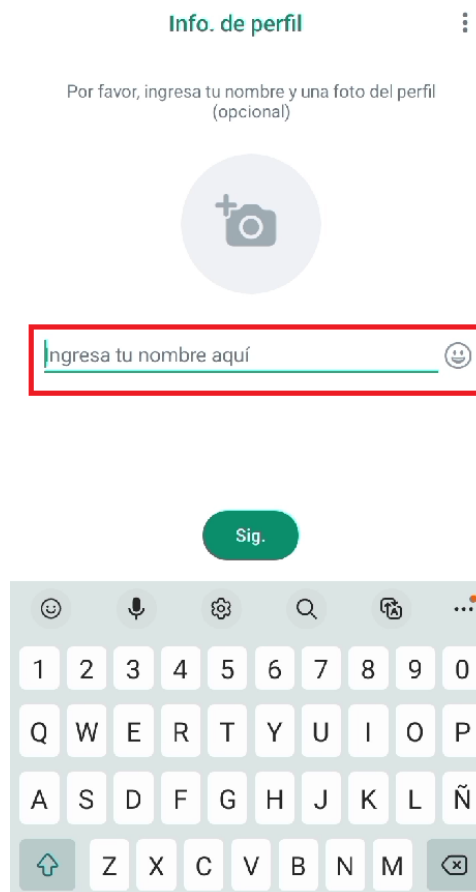

We select the Send SMS method and simply wait for our phone number to be verified.

Now, we need to allow WhatsApp to access our contacts and multimedia content.

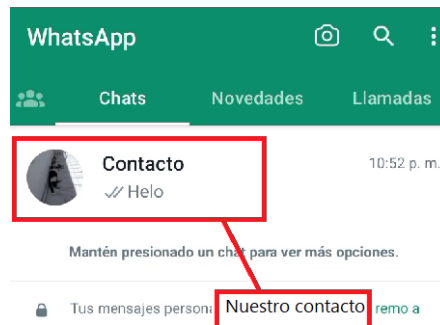

Then, we need to enter our profile name and hit next. Additionally, you can add a profile picture if you want.

This is how we have completed the registration and verification process for the WhatsApp application.

7.3. Messaging & Files

To start messaging, we must locate our contacts and click on one of them.

Now, to write a new message, simply click on the bar at the bottom and type whatever you want with your phone's keyboard.

To attach any type of file, we must look for the icon of a clip and give it a clip.

Within this section we can view several types of files that we can attach: Documents, images, whether from camera or gallery, audios, location, contacts or surveys

7.4. States

First we must locate ourselves on the screen where the statuses are, for this, we click on the news button.

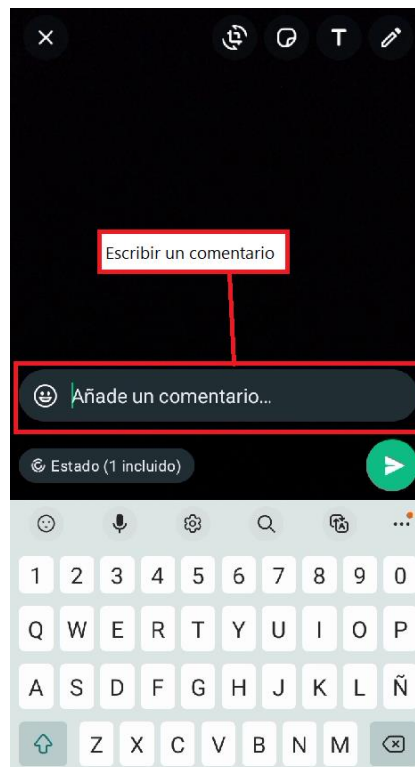

To add a new status, simply click on the "plus" icon (+)

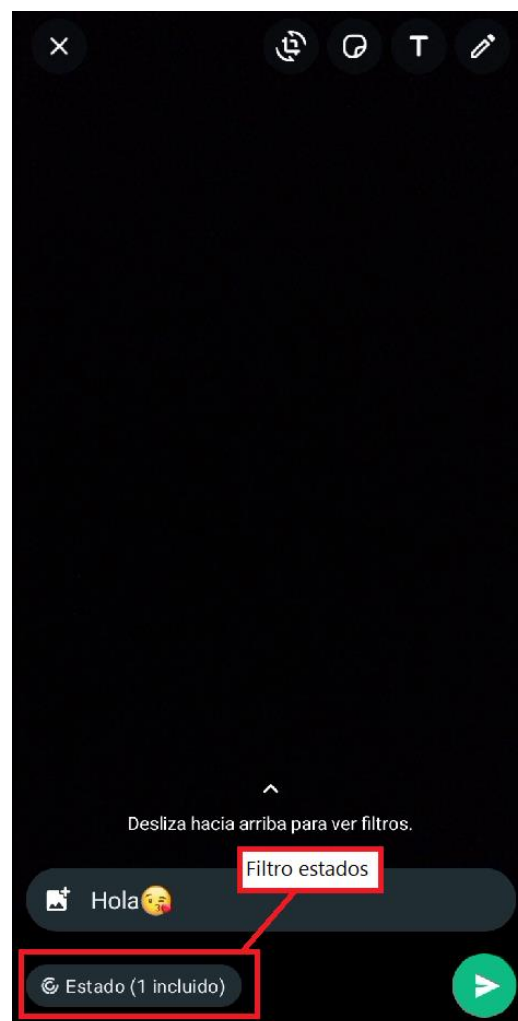

We can now select between the options to take a photo, a video, or select a file from your gallery. In our case we're going to take a new photo, so we just tap the circle to take a photo.

Once the photo is taken, you can add a comment to your status by clicking on the bar at the bottom.

Now, we can decide who can see our status by clicking on the bar at the bottom of statuses.

Now, we can select between three options: my contacts, my contacts, except, and only share with.... We have selected the last option and click the OK button.

Quién puede ver mis actualizaciones de estado

- ☐ Mis contactos
- ☐ Mis contactos, excepto... 0 excluidos
- ☒ Solo compartir con... 1 incluido

OK

And so we've successfully uploaded a status.

7.5. Privacy settings

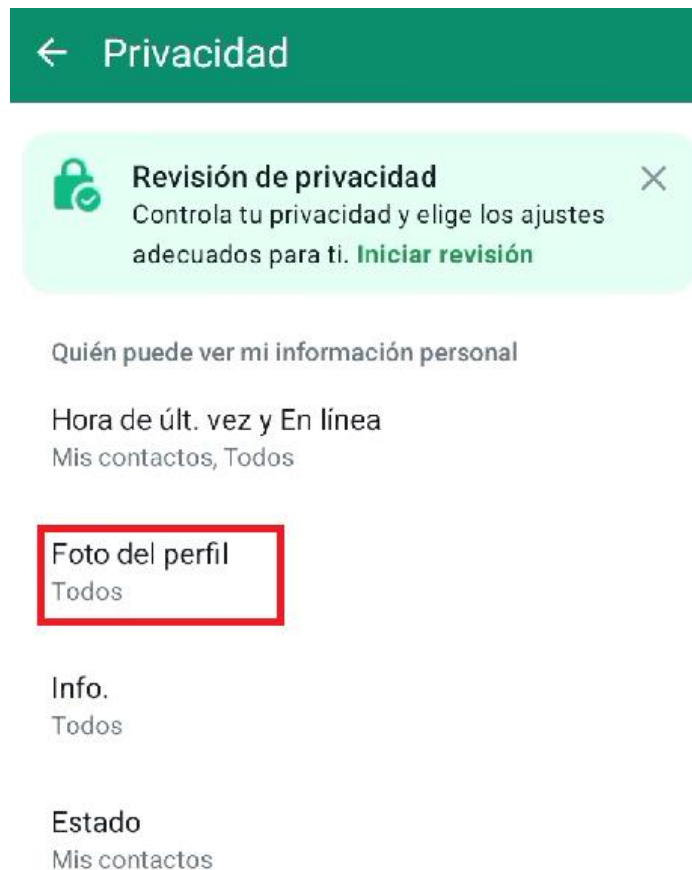

NOTE 2: In this section, the options for all settings will be the same: All; My contacts; Miss Contacts, Except and Nobody

- ☐ Todos
- ☒ Mis contactos
- ☐ Mis contactos, excepto...
- ☐ Nadie

The first privacy setting is to configure who can see when you were last online and whether you're online right now.

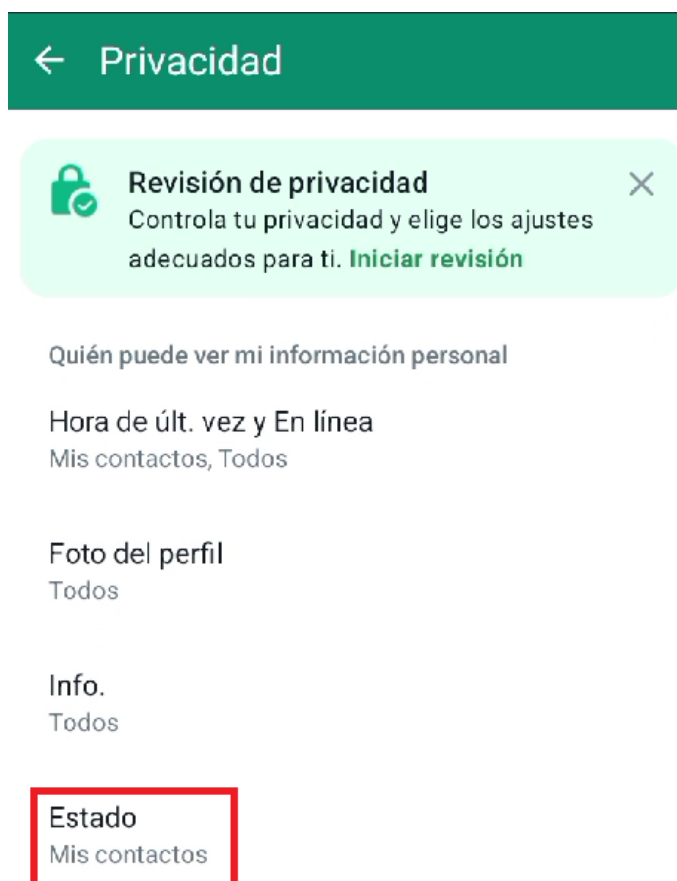

The second setting is used to determine who can see your profile picture. Click on the Profile Picture option.

The third setting is to determine who can see your profile information. The Info option should be clicked.

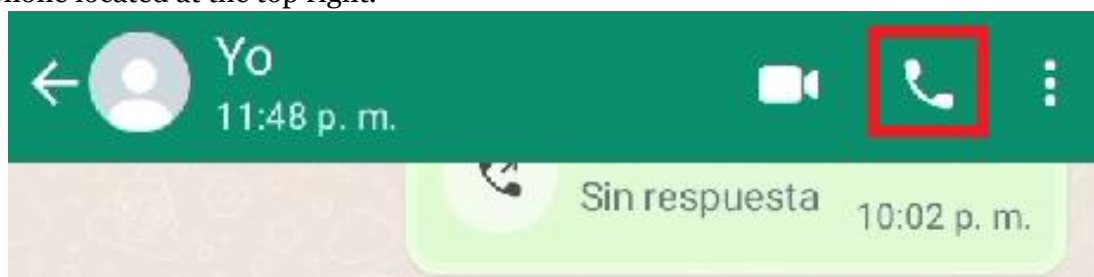

The fourth setting is used to determine who can see your statuses. The Status option should be clicked.

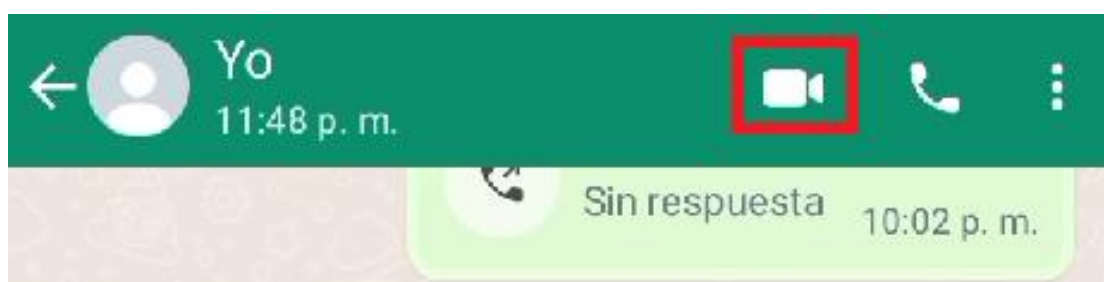

7.6. Calls

To make a call with a contact of yours you must enter their chat and select the option of a phone located at the top right.

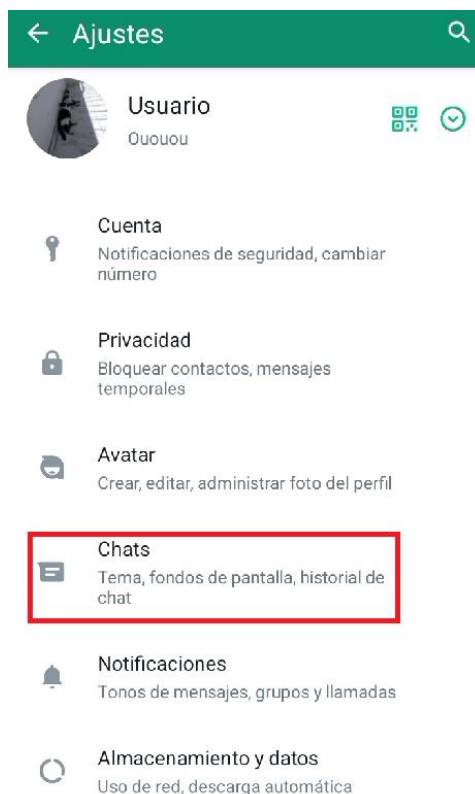

To make a video call with a contact of yours, you must enter the chat and select the option of a video camera in the top right.

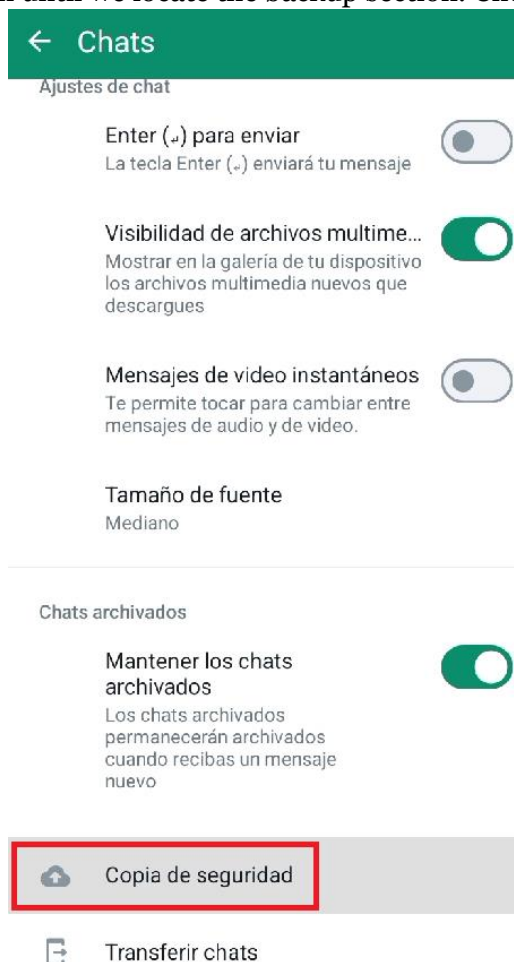

7.7. Chat backup

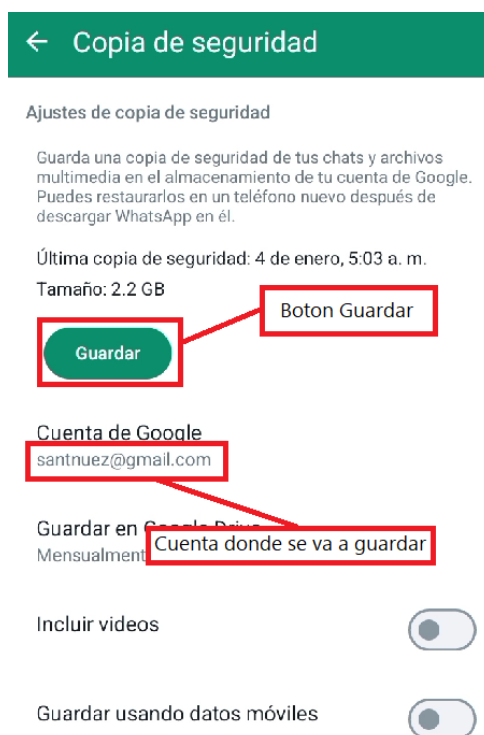

To make a backup of all your chats so far, we must go to the adjustment section and then to the chats part.

Then, we must go down until we locate the backup section. Click on that section.

The last step is to select the Google account where the chat information is going to be saved and then click on the Save button.

7.8. Groups

To send a message in a group, it is done in a similar way as sending a message to an individual contact. We simply click on the bar at the bottom that says "Message" and type in the message we want to convey.

To mention a person within the group, you must first type an at sign and then select the person from the list of group participants.

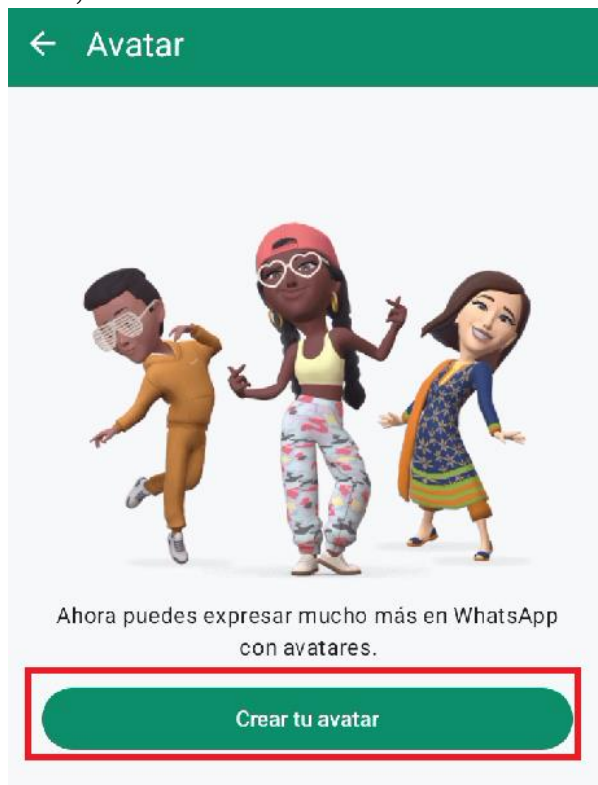

7.9. Avatars

To create an avatar we must go to the settings section and then select the Avatar option.

Then, we need to click on the button to create your avatar.

[Más información](#)

Now we can start making our avatar by clicking on the start button.

 Meta

Ahora puedes expresarte mejor con los avatares en WhatsApp

Personaliza la apariencia de tu avatar.

Comparte lo que sientes con los stickers del avatar.

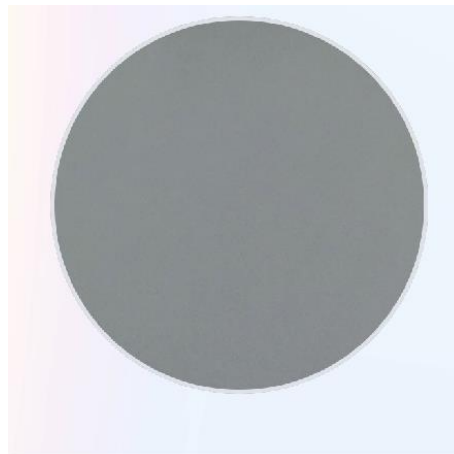

Establece tu avatar como tu foto del perfil.

Si eliges crear un avatar, otros usuarios de WhatsApp podrán verlo e interactuar con él. [Más información](#)

WhatsApp usa tecnología segura de Meta para crear tu avatar. Tus mensajes y llamadas personales están cifrados de extremo a extremo. Nadie más, ni siquiera WhatsApp ni Meta, puede verlos o escucharlos.

Comenzar

We now have two options, one to create your avatar based on a photo of yourself and the other to create it with a character editor. We're going to select the second option.

Crea tu avatar con una foto

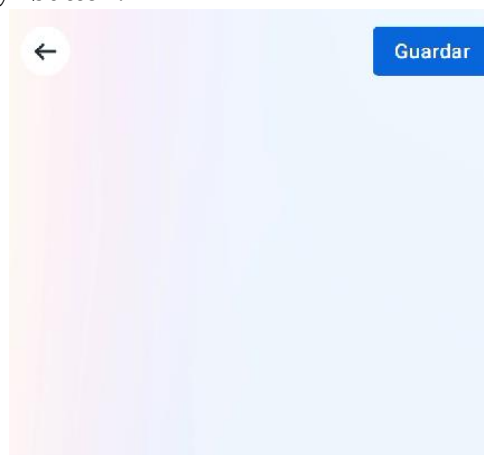

Solo se usará tu foto para predecir detalles, como tus rasgos faciales, y crear un avatar inspirado en ti. [Más información](#)

Si tomas una foto, aceptas este [aviso de privacidad](#).

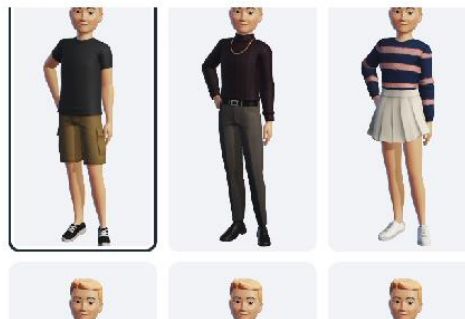

Tomar foto

[Crear manualmente](#)

Now we can select the characteristics that we want our avatar to have, when it is as we want, we click on the "ready" button.

Ropa

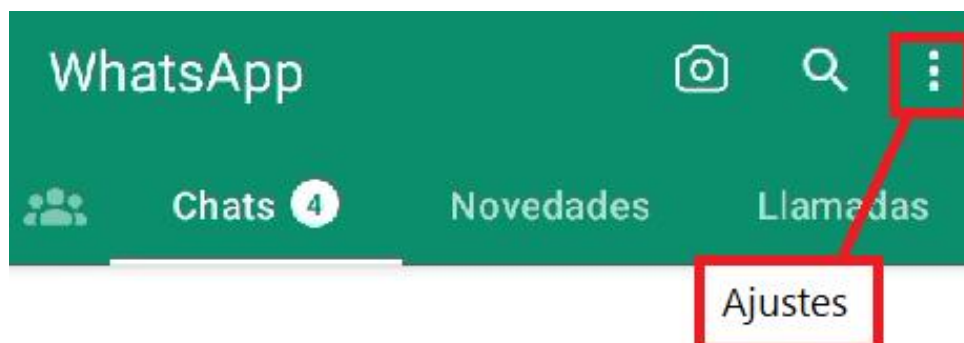

Listo

[Seguir personalizando](#)

7.10. WhatsApp Web

First, we must enter the settings section, located at the top left, are the three vertical dots.

Now we need to select the option of Linked Devices.

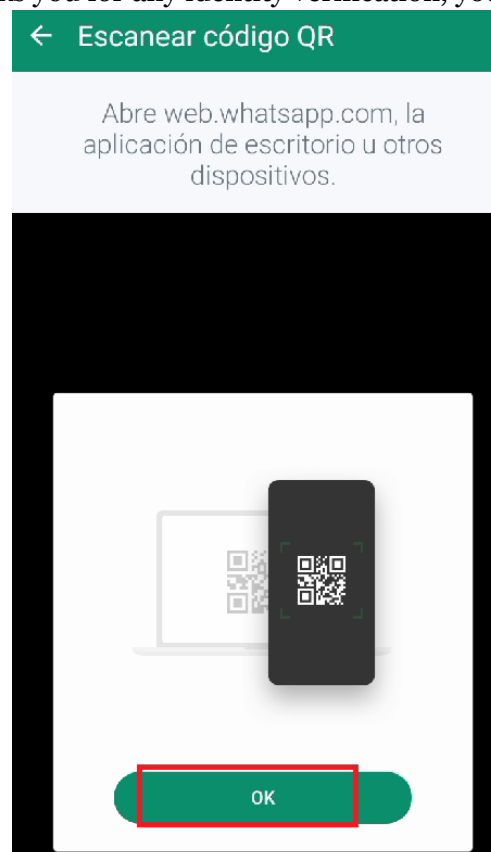

Then, we click on the button to link a device.

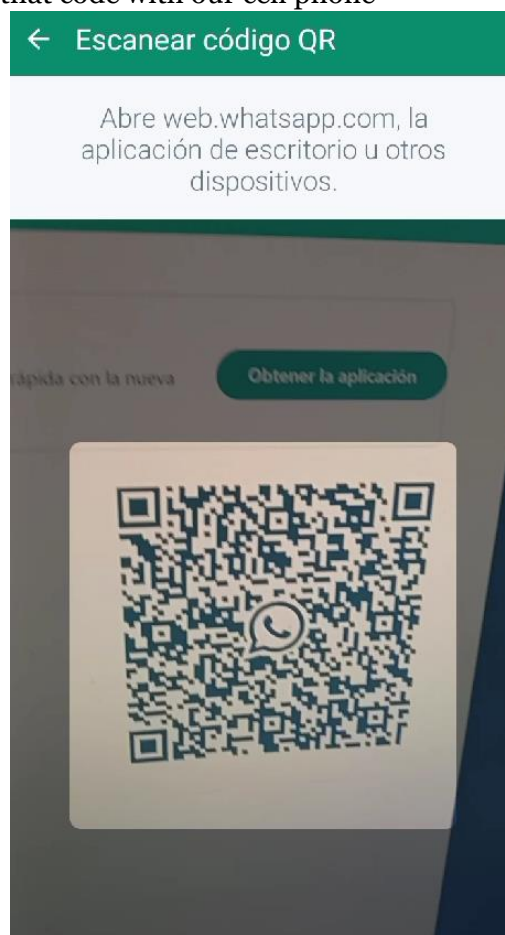

Usa WhatsApp en la versión web, de escritorio o en otros dispositivos. [Más información](#)

Vincular un dispositivo

Then, we must click on the ok button to link our phone number with our WhatsApp Web account. If the app asks you for any identity verification, you must provide it.

Then, we must enter the WhatsApp web website (from a computer) where a QR code will appear, we must scan that code with our cell phone

So we have already connected our WhatsApp on our mobile phone with the WhatsApp Web on a computer.

Usa WhatsApp en la versión web, de escritorio o en otros dispositivos. [Más información](#)

Vincular un dispositivo

Estado del dispositivo

Toca un dispositivo para cerrar la sesión.

Microsoft Edge (Windows)

Sincronizando. Mantén la aplicación abierta.

Tus mensajes personales están **cifrados de extremo**

8. Frequently asked questions

Is my data safe on WhatsApp?

Yes, WhatsApp uses end-to-end encryption to protect the privacy of your messages and calls. This means that only you and the recipient can access the content of the communications.

Should I log out of WhatsApp web?

If you're logged in to a computer that you don't own, you need to log out. But if it's your personal computer, you can leave your session open.

Can I talk to all my contacts on my cell phone through WhatsApp?

Yes, as long as they also have a WhatsApp account.

Do I need an internet connection to use WhatsApp?

Yes, it is necessary to have an internet connection to carry out all the activities described in this user manual.

9. Glossary
