1. Project Objectives

Train priority groups or digital illiterates in the use of ICT tools to apply what they have learned in their daily lives, promoting their digital inclusion and improving their quality of life.

2. Manual Objectives

This manual is designed to provide fundamental knowledge and skills in the use of web browsers to older adults, enhancing their digital competence. With clear language and step-by-step methods, it aims to:

- Facilitate access to information and online resources securely and efficiently.
- Empower users to customize their web experience according to their visual and browsing preferences.
- Build confidence in handling technology, encouraging autonomous and responsible use.
- Ensure a solid understanding of online security practices to protect privacy and personal information.
- Upon completion of this manual, users will be able to explore the Internet easily and safely, making the web a valuable and accessible resource in their daily lives.

3. Reach

This manual is intended to provide its readers with the tools and knowledge necessary to navigate the Internet efficiently and securely. It covers everything from choosing and downloading a web browser to customizing and using advanced functions for web searches.

4. Target Audience

This manual is designed for individuals with little to no computer knowledge who want to familiarize themselves with current technology and make full use of the Internet's capabilities. It is ideal for those seeking a friendly and detailed guide to enhance their daily interaction with the digital world.

5. Application Introduction

In this guide, we will cover web browsers, especially focusing on Google Chrome, as many browsers nowadays are based on it. Google Chrome is one of the pioneers of modern web browsers, and it has evolved into much more than a simple internet search tool. In this series of tutorials, we will explore how Chrome has revolutionized the online experience, providing not only speed and efficiency but also a secure and customizable platform for every user. From its installation to advanced usage, we will uncover the multiple layers of functionality that Chrome offers.

This browser, known for its intuitive interface and robust security system, has been designed with the user in mind. Its ability to adapt to individual needs, whether through custom extensions, themes, or privacy settings, sets it apart from the crowd. Throughout these tutorials, you will be guided step by step to master web browsing, making the most of its features.

In each video, we will discover together how to perform efficient searches, manage tabs and bookmarks, and customize your browsing experience to perfectly fit your personal preferences and accessibility needs. Additionally, we will teach you how to maintain your online privacy with incognito mode and manage your browsing history to ensure a safe and private experience.

Google Chrome is not just a browser; it is an empowerment tool that brings the vast world of the internet within your reach in an accessible and understandable way. Get ready to embark on a journey that will transform your interaction with the digital world, making your daily life easier and opening up new possibilities in the information age.

6. Basic Concepts

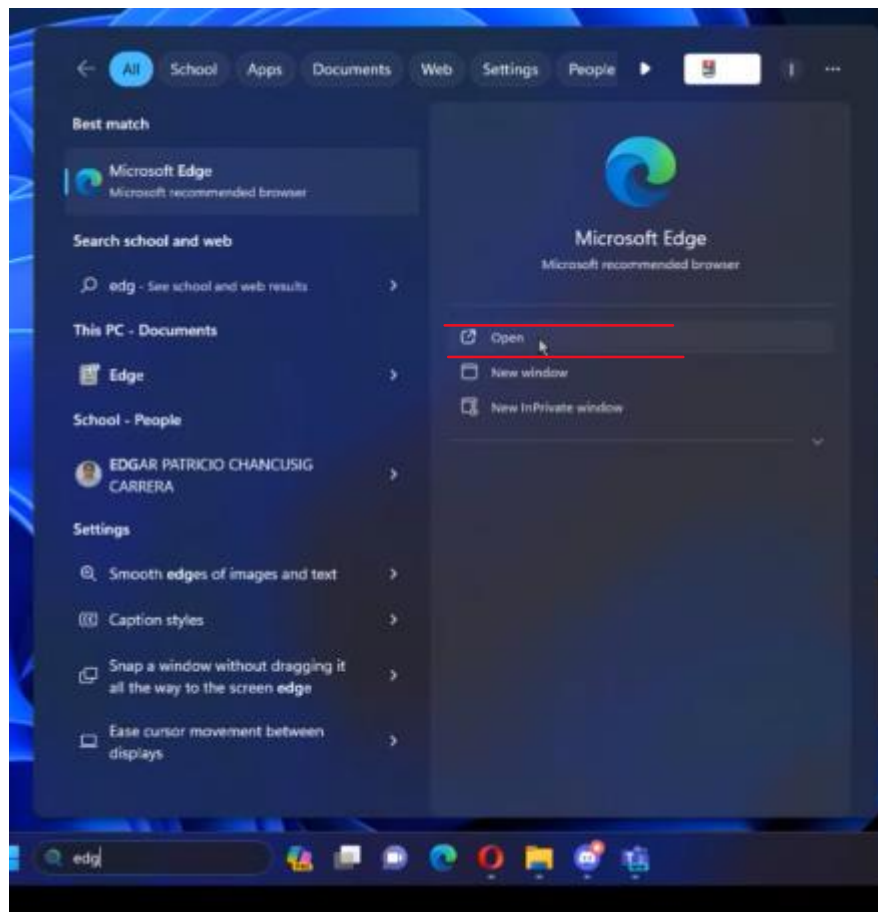

The basic concepts to become familiar with Google Chrome include key elements for users who are starting to explore this web browser:

- **User Interface:** Understanding Chrome's interface, which includes the home screen, the address bar, tabs, and the options menu.
- **Navigation and Search:** Learning how to perform efficient searches using the address bar and how to navigate through different tabs and websites.
- **Browser Customization:** Discovering how to personalize Chrome by changing themes, adjusting settings, and using extensions.
- **Bookmark Management:** Understanding how to save and organize your favorite web pages using the bookmark feature.
- **Security and Privacy:** Familiarizing yourself with Chrome's security features, including safe browsing, password management, and using incognito mode.

These fundamentals provide a solid foundation for starting to use Google Chrome effectively and making the most of its capabilities.

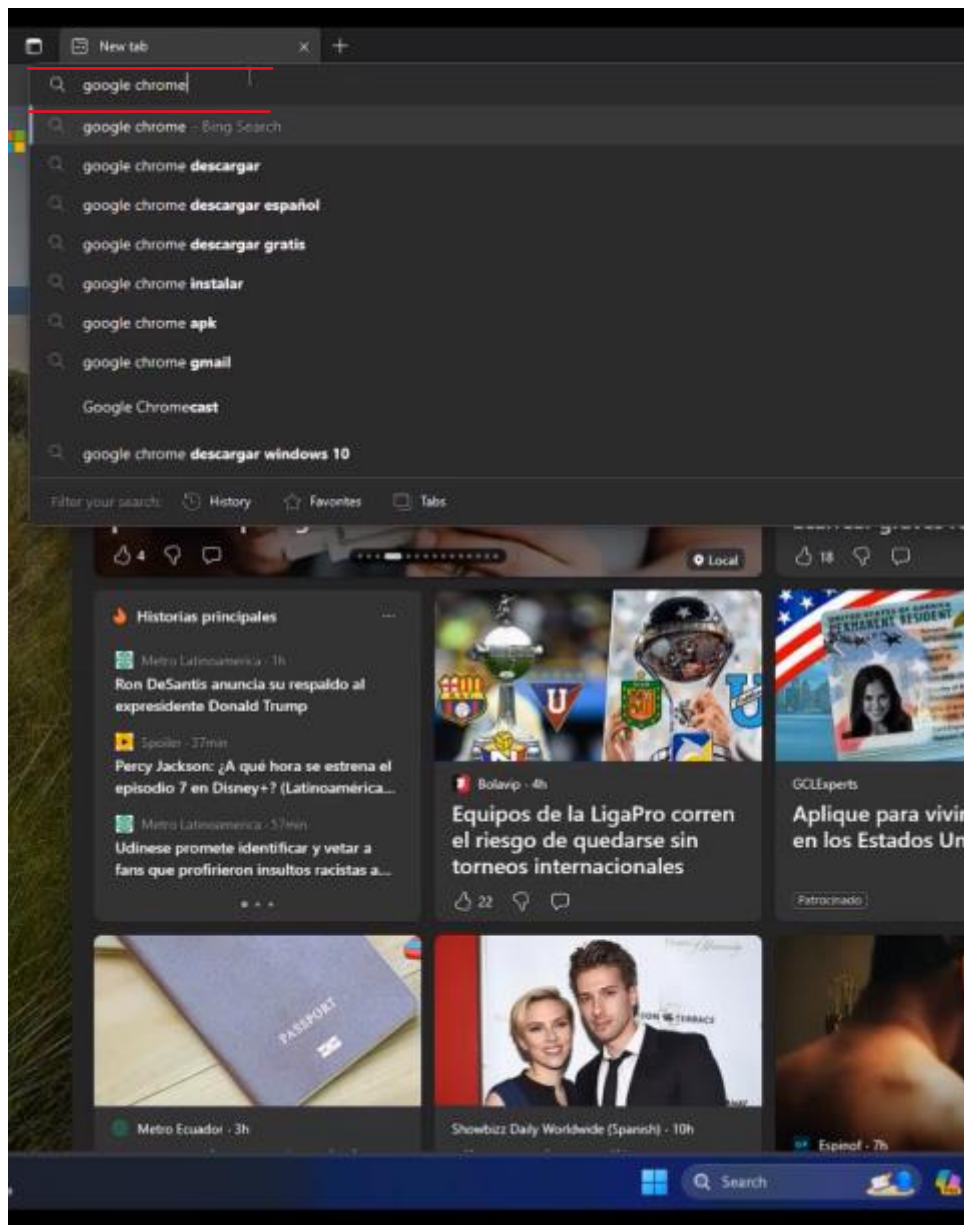

7. Steps to follow

1. Web browser introduction

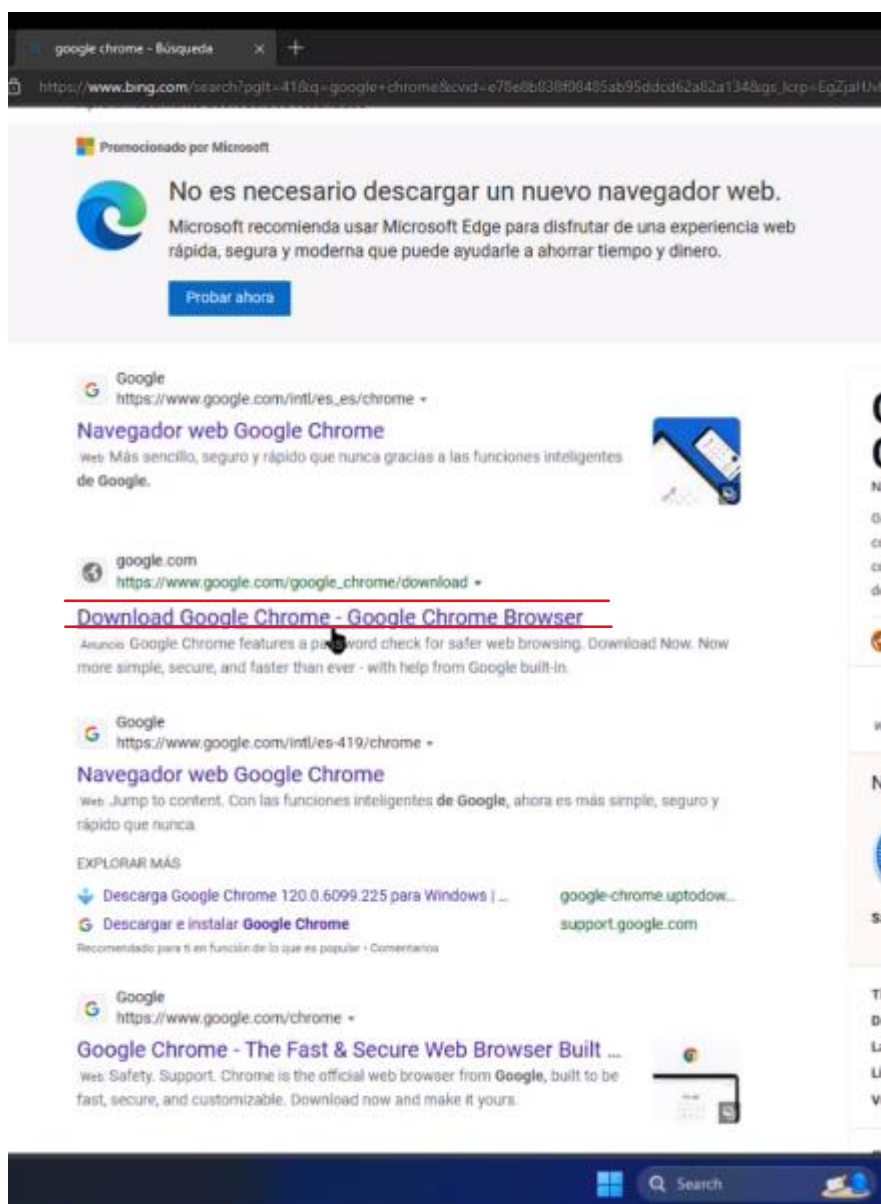

We search for "Edge" in the search bar and left-click to open.

2. Download

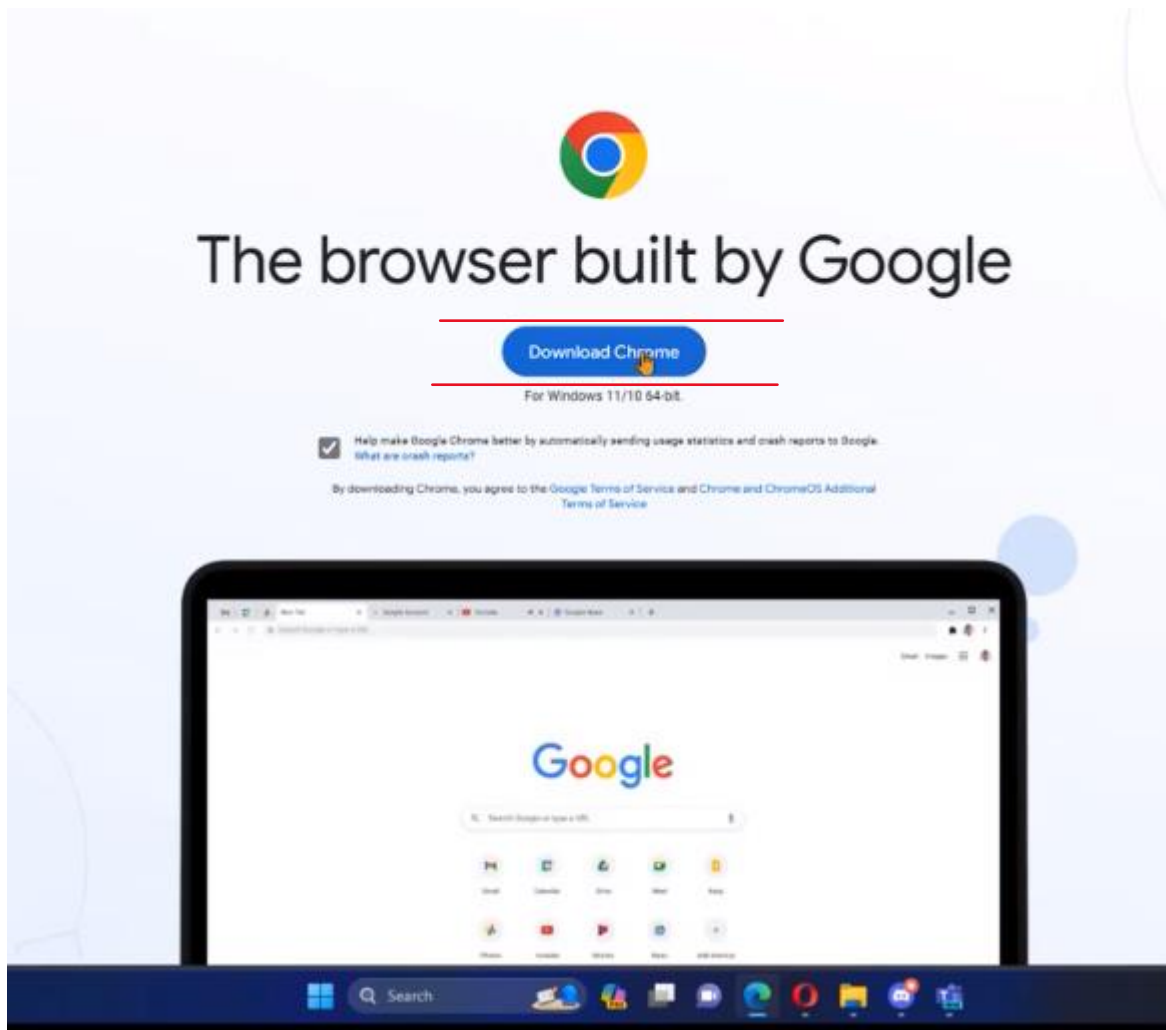

We type "Google Chrome" in the search bar and press the Enter key.

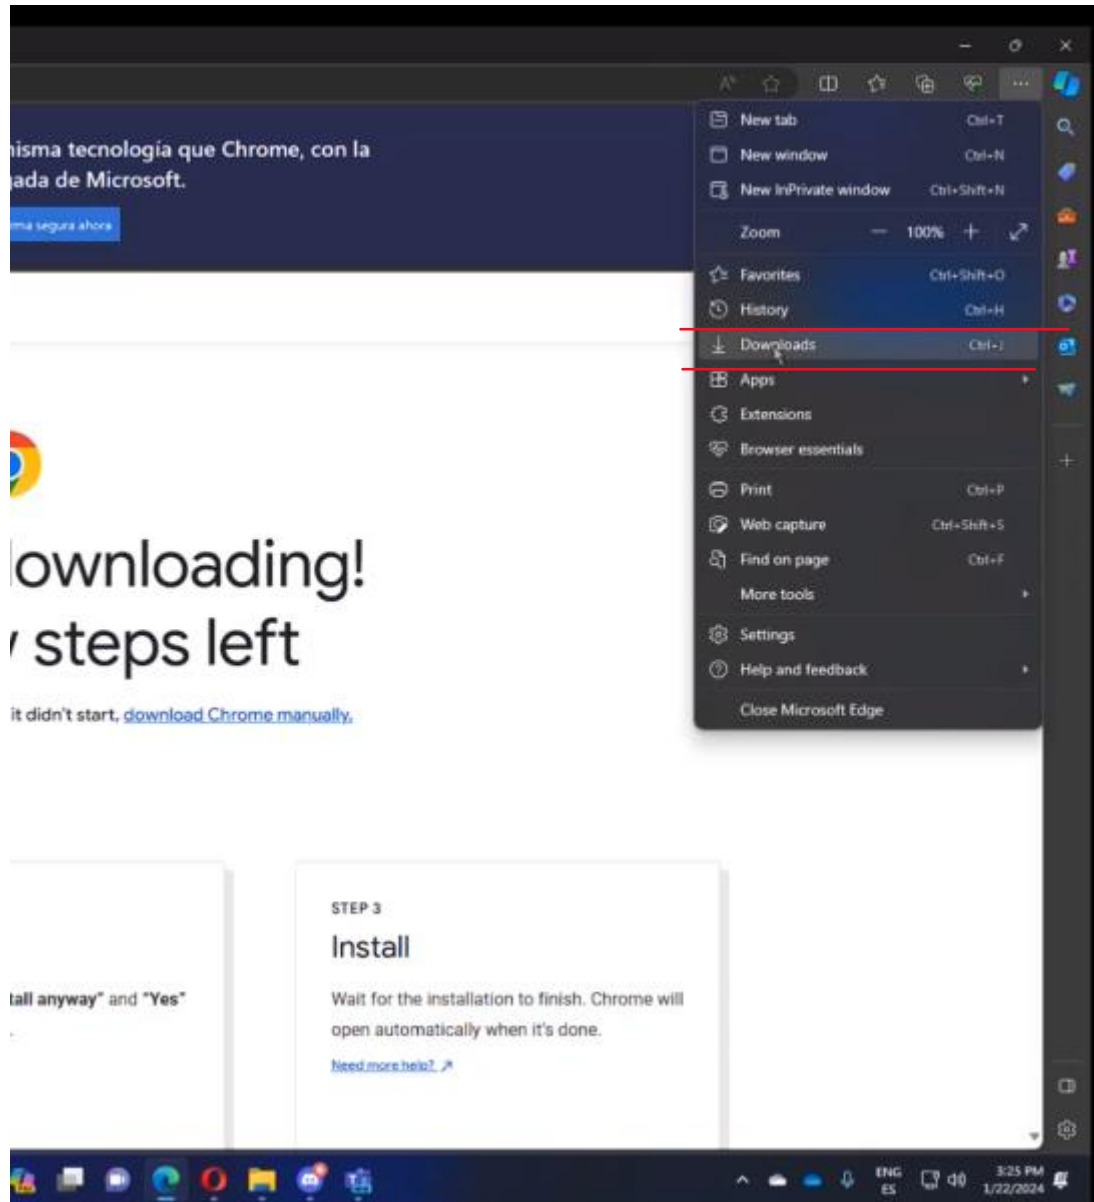

After performing the search, we select the download option and left-click with the mouse.

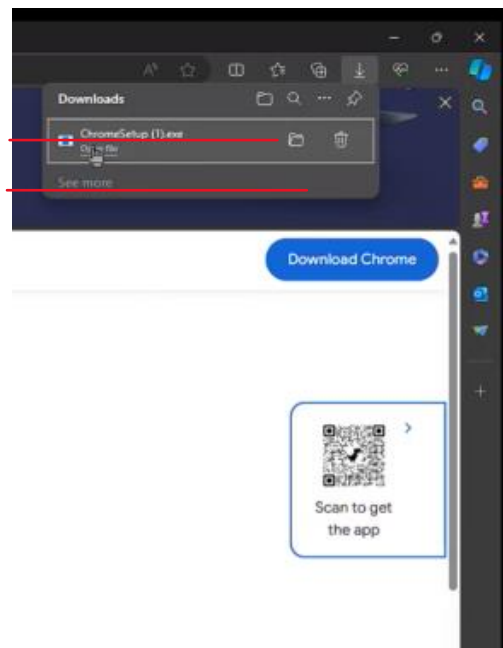

Inside the page, we left-click with the mouse on the blue button to initiate the download.

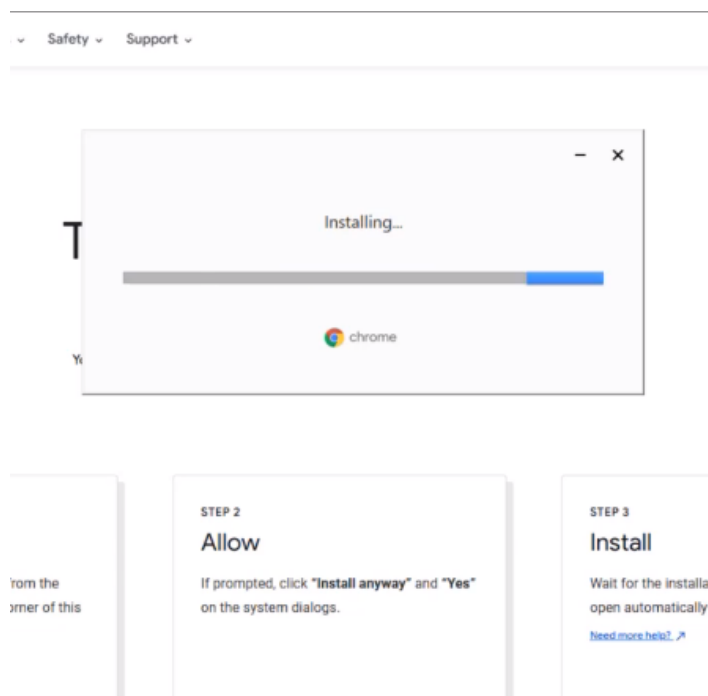

3. Installation

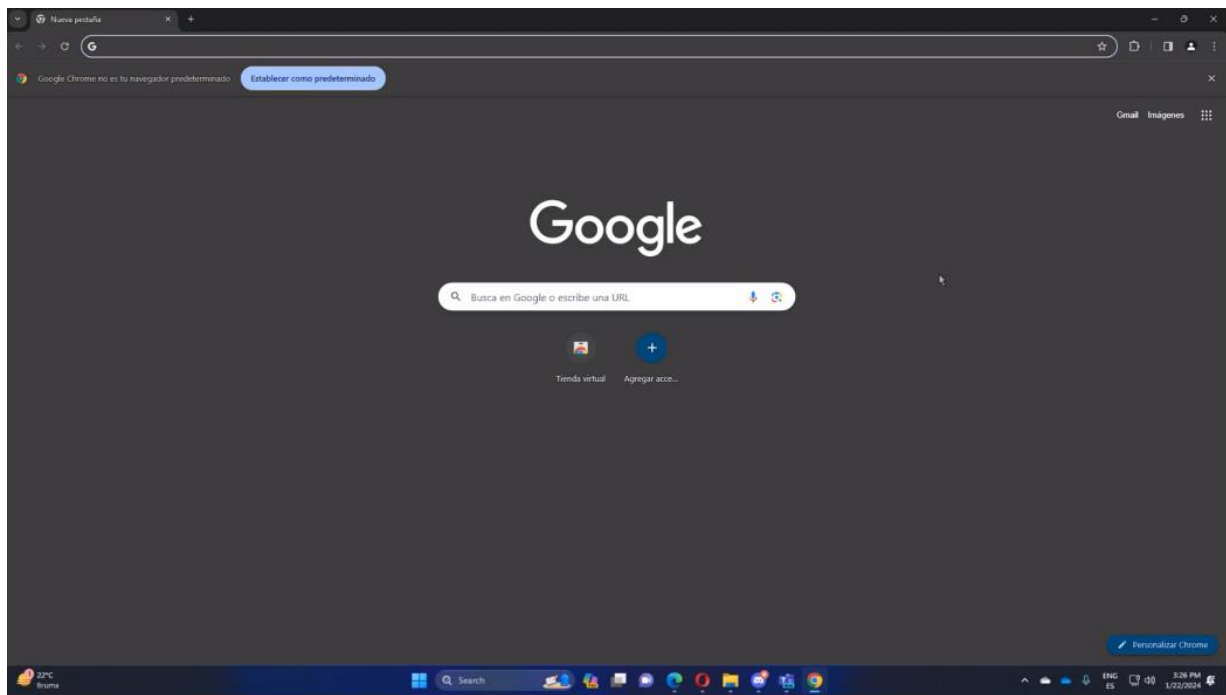

We go to the top-right, especially to the three dots, left-click with the mouse, and then go to the "Downloads" section.

We left-click with the mouse on "Open file" in the download bar and grant permissions for installation.

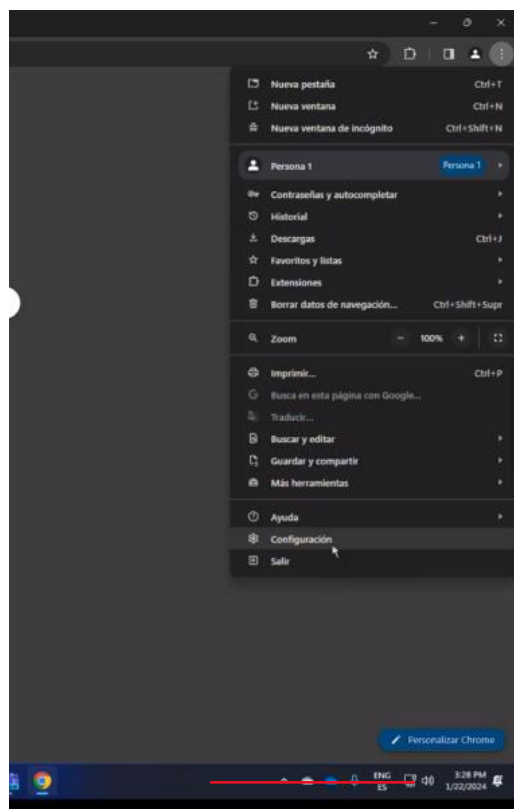

Wait for installation to complete.

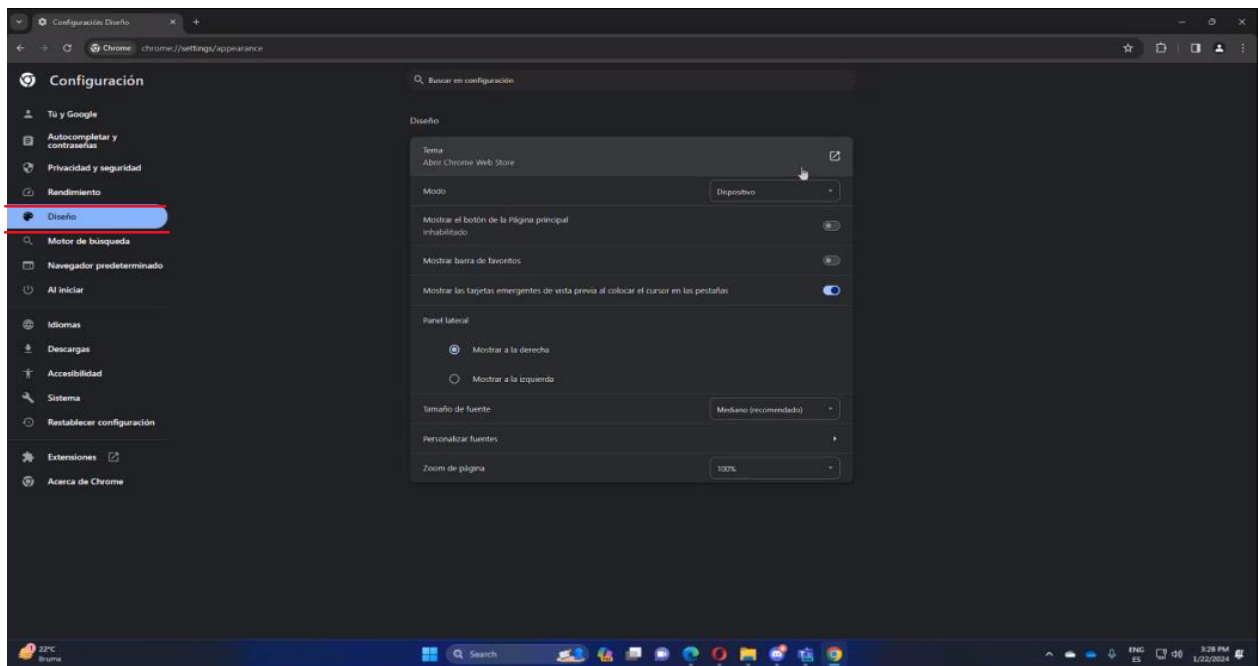

Once installed the new browser opens.

4. Personalization

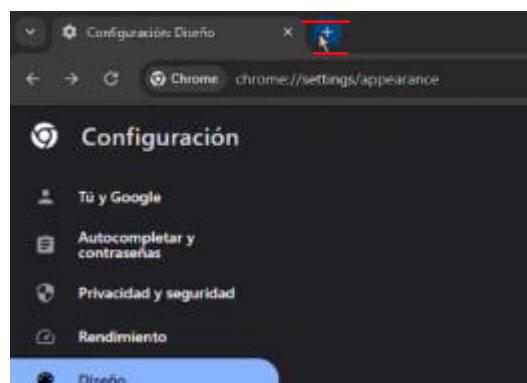

We go to the top right, to the three dots, and left-click with the mouse, accessing the settings section.

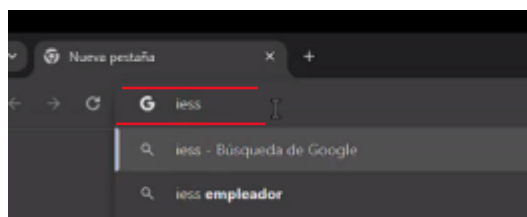

In settings, we go to the "Design" section and left-click with the mouse. There, we will find all the customization options for our browser.

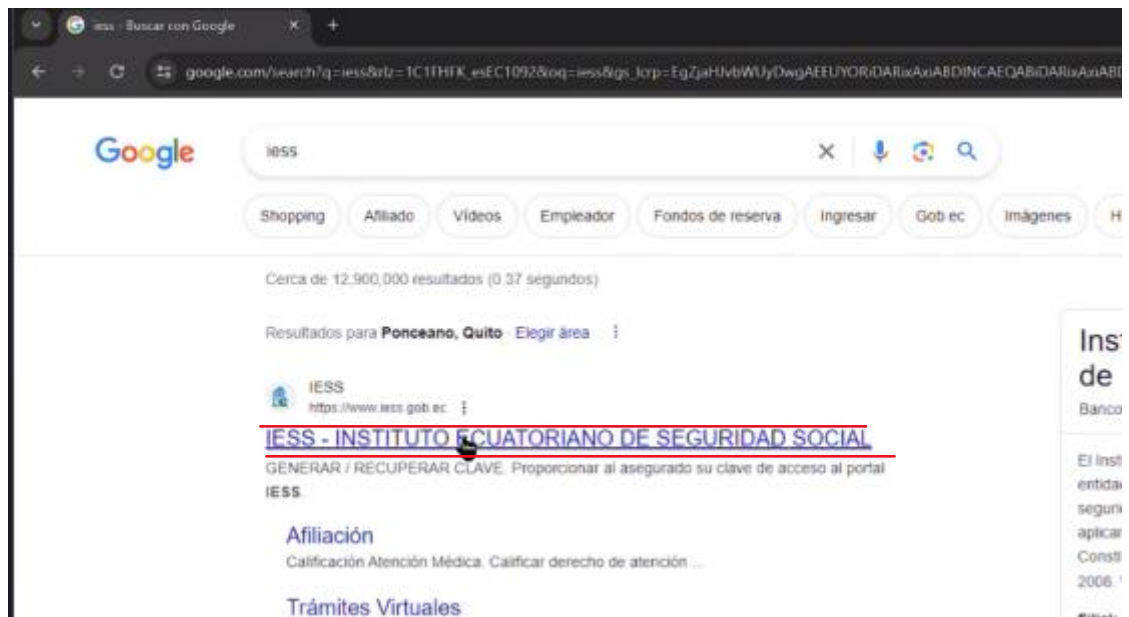

5. Search

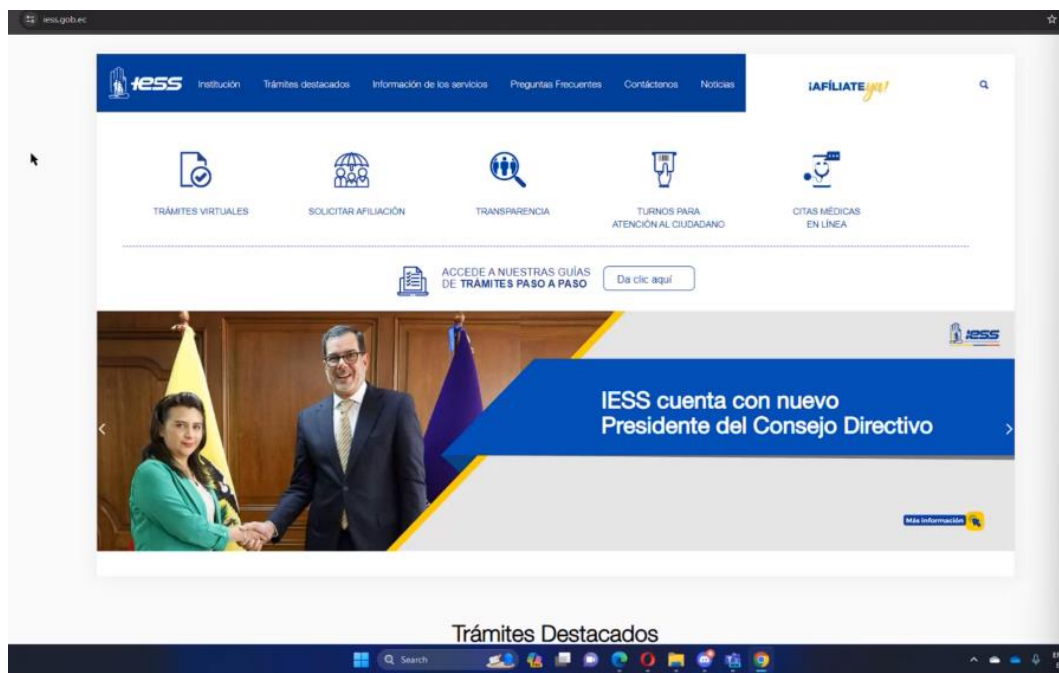

We go to the top right, left-click with the mouse, and open a new tab.

On the search bar we type IESS.

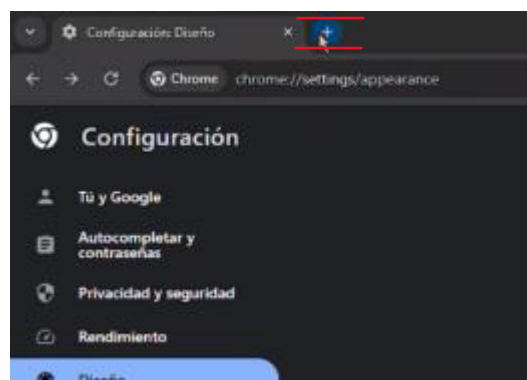

We left-click with the mouse on the first option and wait for it to load.

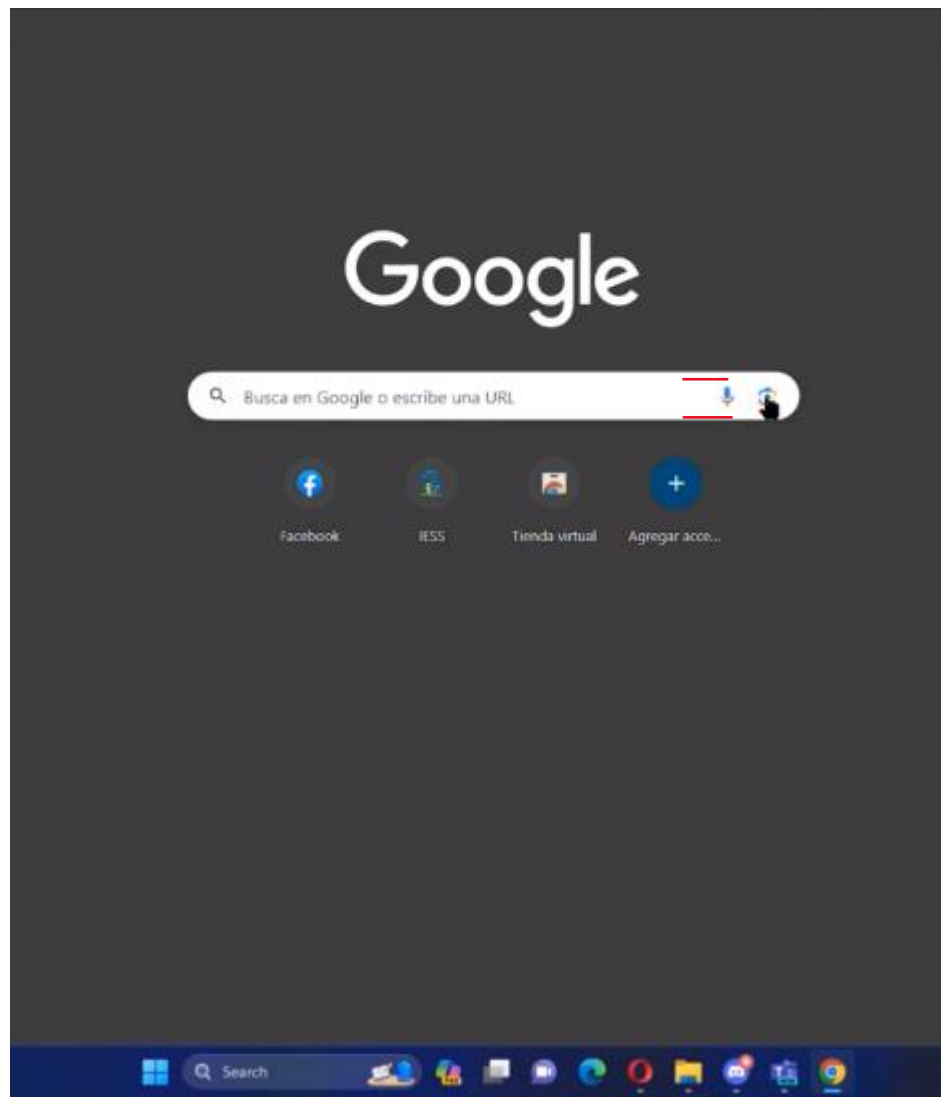

Once the page has loaded, we successfully accessed the IESS.

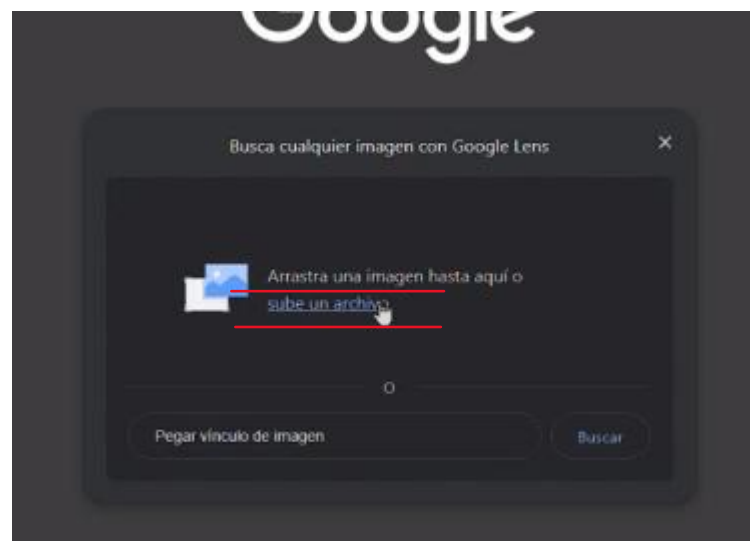

6. Image Search

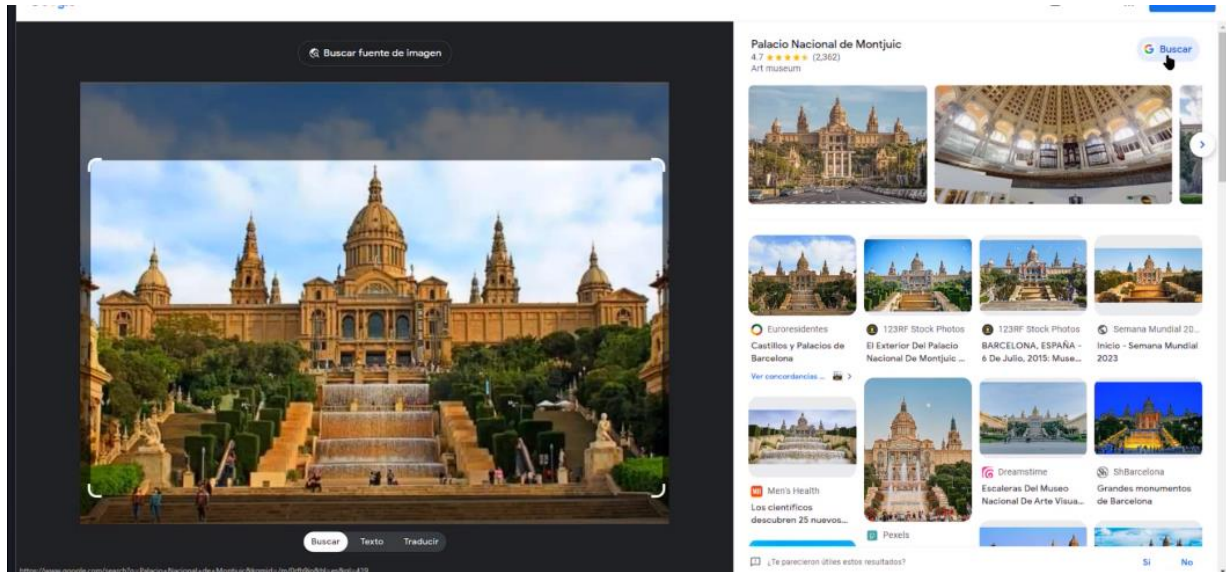

We go to the top right and open a new tab.

We choose the camera logo.

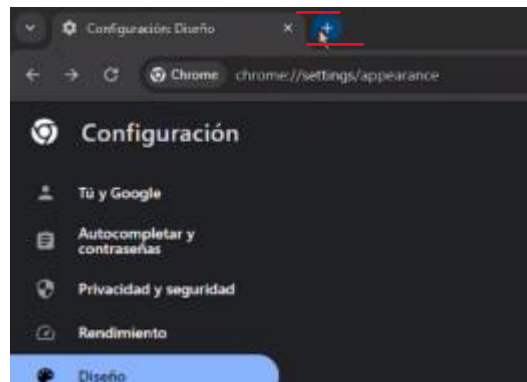

Subsequently, we upload a file to search for and left-click with the mouse on the search button.

After completing the search, we wait, and it will provide us with relevant results related to the previously uploaded image.

7. Location Search

We go to the top right and open a new tab.

Estudiantes: 12 483 (2014)

Campus: José Rubén Orellana, 152 000 m²

Rector: PhD. Florencia Muñoz

Fundación: 1969

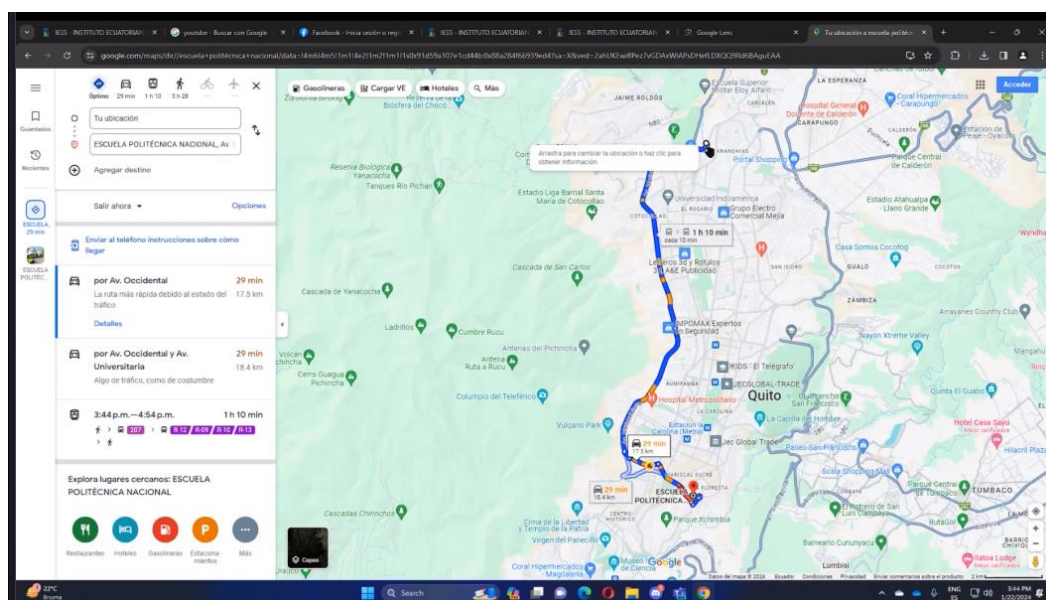

Fundador: Gabriel García Moreno

Profesores: 632 (2014)

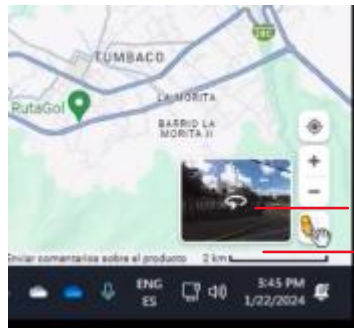

Mascota: Owl

Teléfono: (02) 297-6300

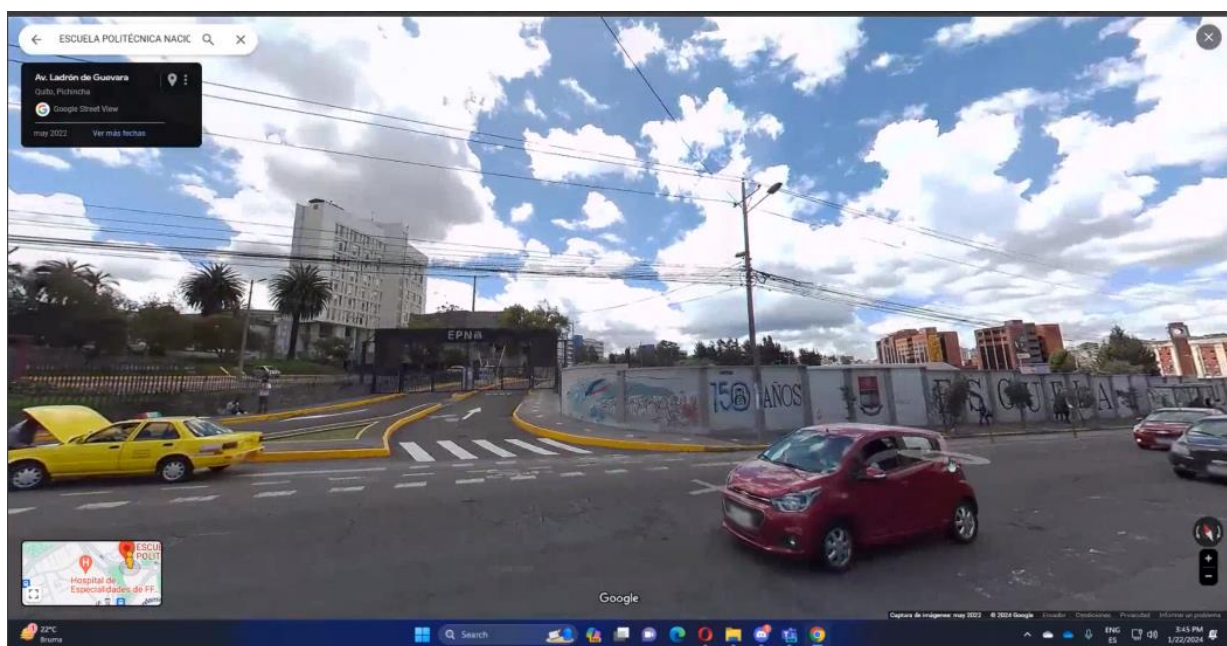

In the search bar, we type the destination we want to reach. Once it loads, on the right-hand side, we left-click with the mouse on the button that says "Directions" or "Get directions."

Once it has loaded, it will show us a map and different routes to reach the destination point, denoted by a red pin.

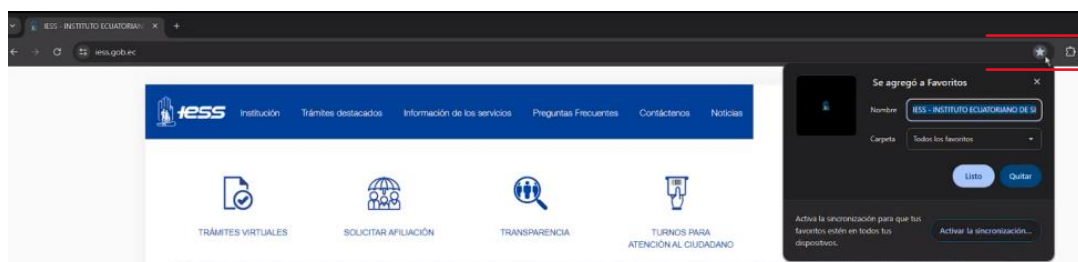

In the bottom-left corner, there is a person icon. We drag it to any location we desire, and we will enter street view.

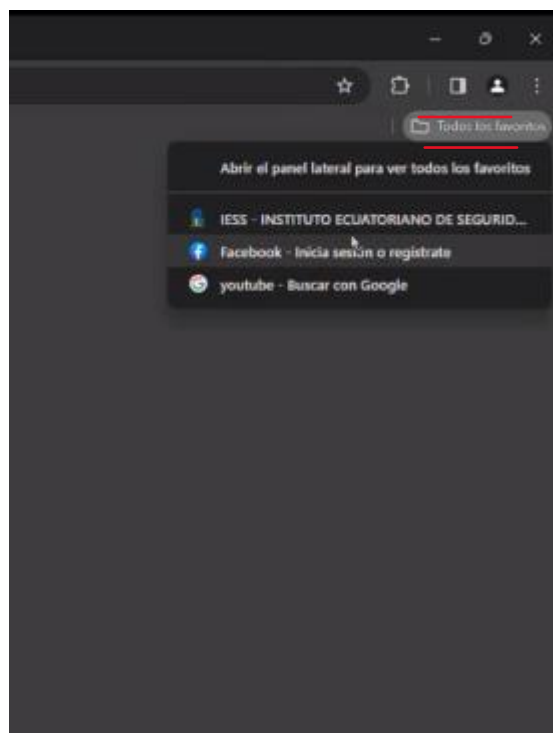

Once placed, it provides us with a view as if we were on the street we are looking for.

8. Favorite Pages

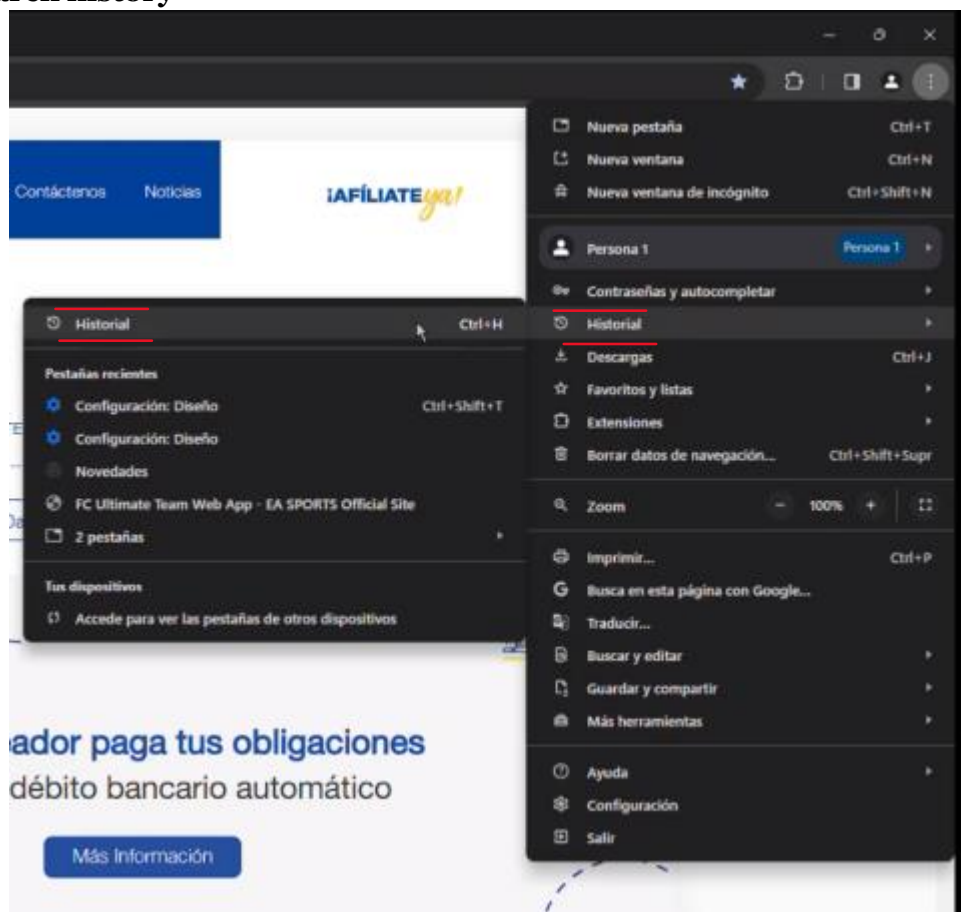

To the right of the search bar, you will find a star icon; clicking on it marks the page as a favorite or bookmark.

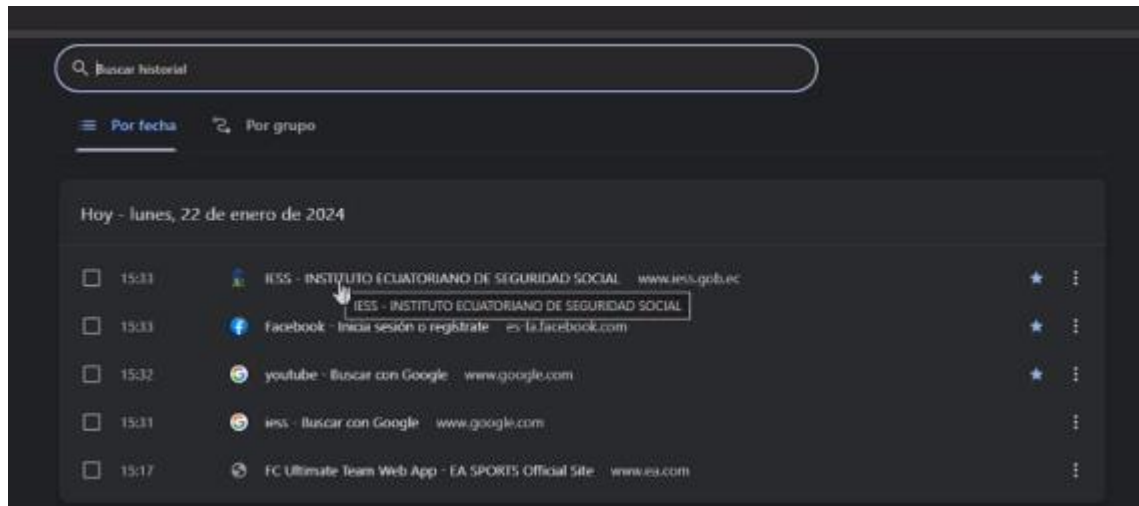

In the top-right corner, you will find a folder icon where your favorite pages are saved for quick access at any time.

9. Search history

In the top-right corner, we go to the history section, where we will find previously visited pages with dates and times.

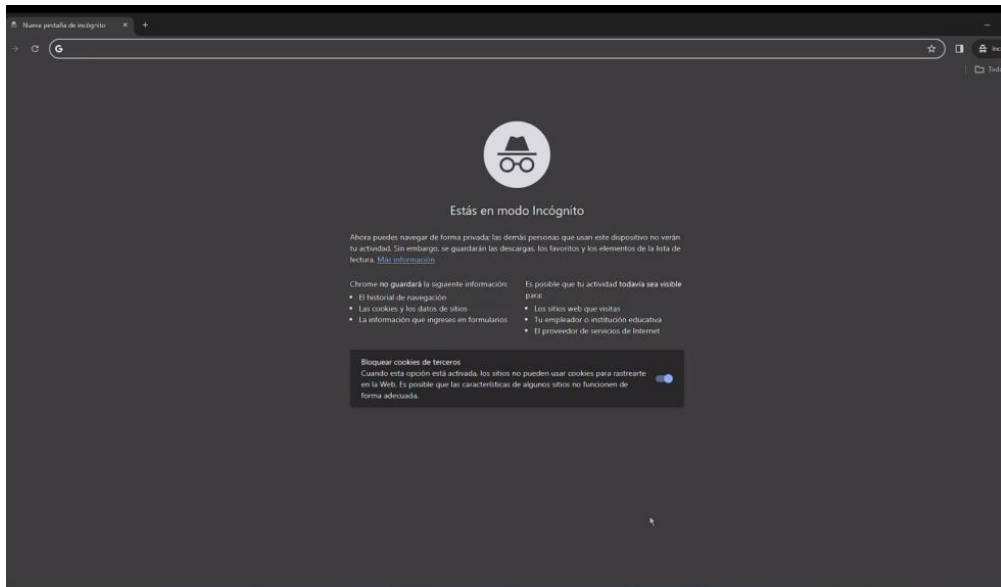

We can view the previously conducted searches and the time when they were searched.

10. Private Mode

We left-click with the mouse on the browser's icon that we are using and choose the option for an incognito tab.

We wait for it to load, and we will be in an private session where none of our session data will be stored, including the browsing history.

8. Frequently Asked Questions

How can I perform a search in Google Chrome?

Simply type what you're looking for in the large bar at the top of Chrome and press 'Enter.'

How do I save a webpage as a favorite to easily find it later?

Click on the star in the address bar at the top and then click 'Done' to add it to your favorites.

What is an incognito window, and how do I open one?

An incognito window allows you to browse without saving your history. Click on the three dots in the upper right corner and select 'New incognito window.'

How do I change the text size on webpages?

Press the 'Ctrl' and '+' keys to increase the text size or 'Ctrl' and '-' to decrease it.

How can I make Google Chrome read the text aloud?

You can make Chrome read the text aloud using a text-to-speech extension. Go to the Chrome Web Store, search for "text to speech," choose an extension, then follow the instructions to install and use it.

9. Glossary

Term	Description
Browser	Software that allows access and navigation of websites on the Internet.
Search Engine	Online tools that enable users to search for information on the Internet.
Download	The process of obtaining files or data from the Internet to your computer.
Perzonalization	Adjusting the browser settings to tailor its appearance and functionality to the user's preferences.
Tab	An individual section within a browser window that allows the simultaneous opening of multiple websites.
Favorites	Function that allows users to save website addresses for quick future access.
History	A record of all visited web pages that the browser stores.
Incognito	A browsing mode that doesn't save browsing history or session information.
Zoom	A function that increases or decreases the size of content in the browser to improve visibility.
Settings	An area where options can be changed and browser features controlled.
