1. Project objectives

Train teachers of the Ministry of Education in the use of ICT tools to improve their teaching performance, to promote educational innovation and online learning.

Train priority attention groups or those who are digitally illiterate in the use of ICT tools to apply what they have learned in their daily lives, promoting their digital inclusion, and improving their quality of life.

Facilitate access to digital education for priority attention groups, promoting digital inclusion and improving quality of life.

Aid to overcome the digital divide between digital illiterates and technological tools, allowing them to apply what they have learned in their daily lives.

2. Objective of the Manual

The main purpose of this document is to provide users with a detailed and accessible guide to using the Educandy application. This manual is intended to be an informative tool that facilitates the understanding of Educandy's functionalities and maximizes the learning experience for users, regardless of their level of technological skill.

3. Scope

The scope of this manual covers the complete description of the application. Educandy, providing detailed instructions on its effective use. From initial registration to resolving common issues, this document seeks to address all relevant aspects for users to get the most out of the platform.

4. Directed to

This manual is designed to be used by a diverse audience ranging from beginners to experienced technology users. It is aimed at educators, students and anyone interested in using Educandy as an educational tool, providing a clear, step-by-step guide to ensure understanding and effective use of the application.

5. Introduction application

Educandy is an innovative educational platform that simplifies the creation and management of interactive games for learning. Its concept is based on the premise of making education fun and accessible for everyone. Through its intuitive interface, users can design personalized educational activities, promoting a playful approach to the learning process. This introduction seeks to inspire users to explore the various features of Educandy and make the most of this enriching tool.

6. Basic notions

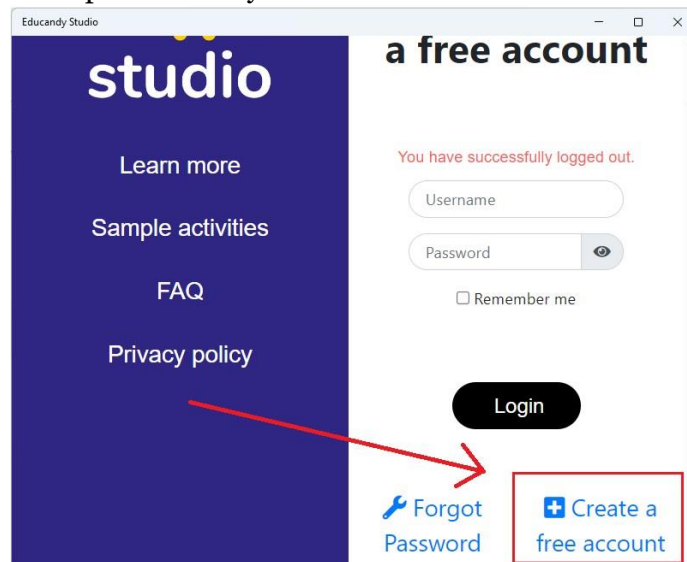

Before diving into Educandy, it is essential to understand some basics. Users must ensure they have access to a stable internet connection and complete the registration process on the platform. Additionally, becoming familiar with fundamental concepts such as creating games and managing educational activities will allow users to approach the application with confidence and take advantage of its full capabilities. Similar to understanding addition before multiplication, these basics will establish a solid foundation for effective learning through Educandy.

7. Steps to follow

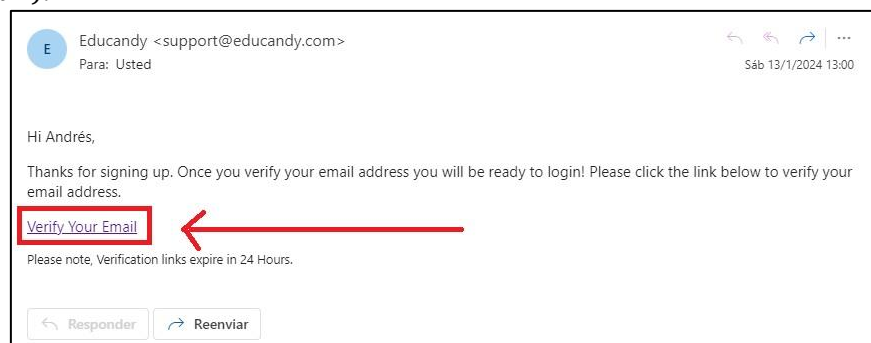

1. Registration in educandy

Its steps that the user must follow in order to register for free on Educandy are the following:

- Open the Educandy Studio application.
- Give Click on the option that says 'Create a free account'.

- Complete the required fields, such as name, email, and password.
- Always remember to use a strong password.
- Click "Register" to complete the process.
- See if the email address used for registration (Note: Remember to check spam).

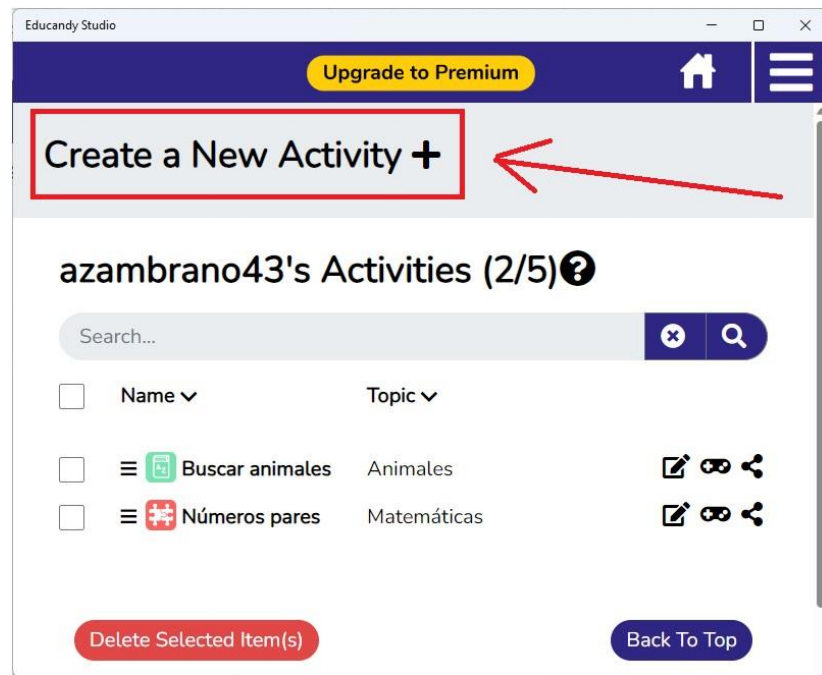

- Log in with our Educandy account.

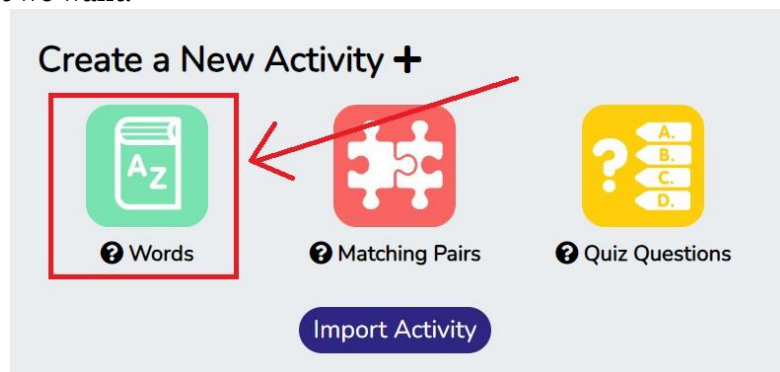

2. Activity creation (words)

Once we have created and verified our Educandy account, we can start creating activities, for which we must follow the following steps:

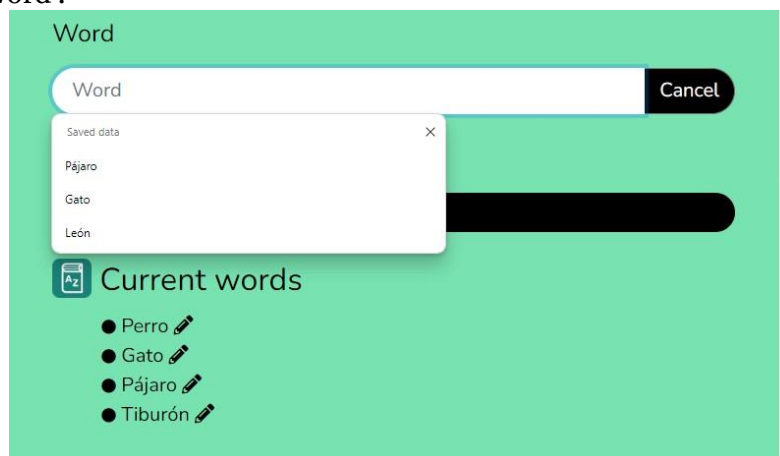

- Access your account in Educandy.
- Select "Create a New Activity" from the main home screen, which appears after you log in.

- Select the option that says 'Words', or translated words respectively, as that is what we want.

- Assign a name for your activity and the topic it is about.
- Add the words that your activity will contain, they must be according to the topic you chose. To enter a word, you just write it in the white box and click 'Add word'.

Nota: Keep in mind that there must be at least 3 words in your activity for it to work.

- Your activity has already been created, and if we click on the 'Play' section you will be able to see the minigame options that your students will have to carry out the activity you just created. In this case there is a search for letters, spelling and anagrams, as seen in the image below.

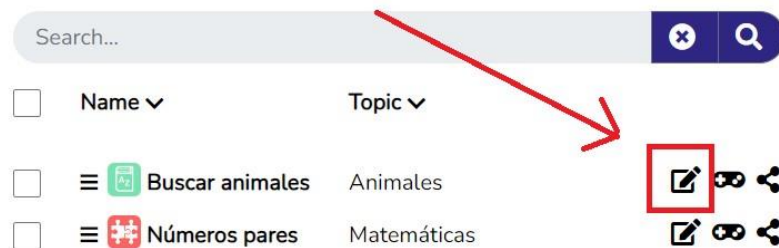

3. Customize an activity

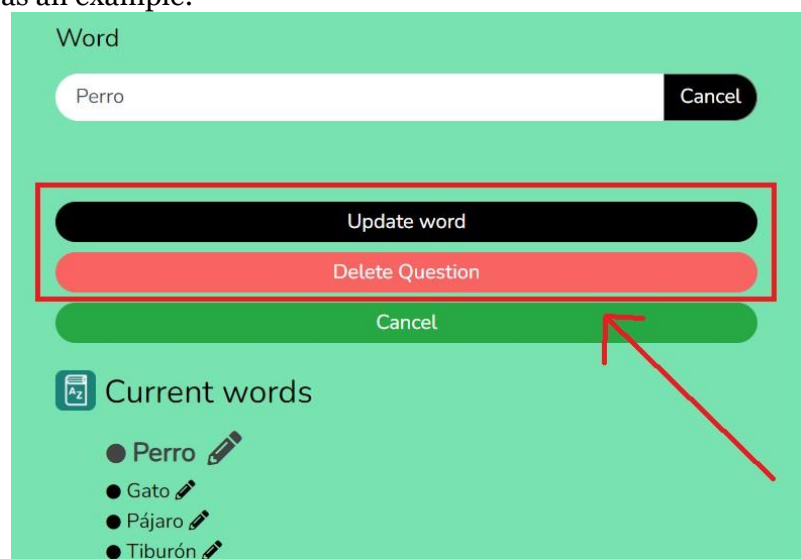

This video provides detailed instructions on how to customize and edit activities already created in Educandy, so that they can adapt to different topics and different educational audiences, what you have to do is the following:

- Click on the icon represented by a pencil inside a square, as seen in the following image:

azambrano43's Activities (2/5)?

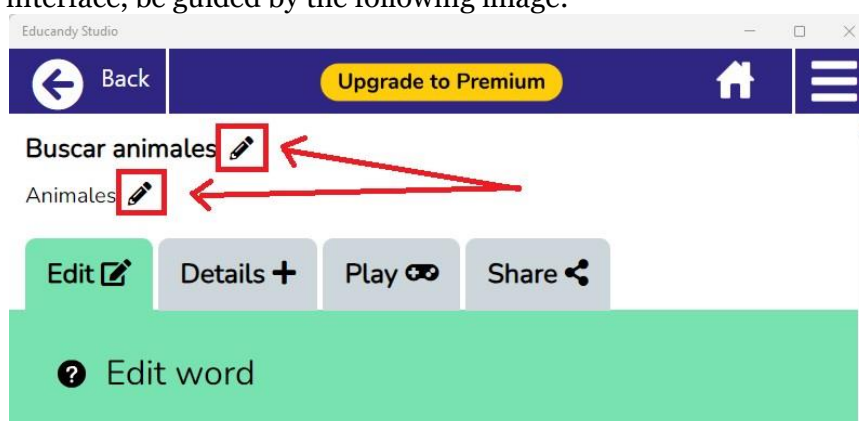

- Cans modify the entries entered for the activity, which in this case would be the words that will exist in said activity, you have the ability to add words, or, on the other hand, edit a word by clicking on the 'Update word' option or , delete it by clicking on the 'Delete Question' option respectively, as seen in the image, using the word 'Dog' as an example:

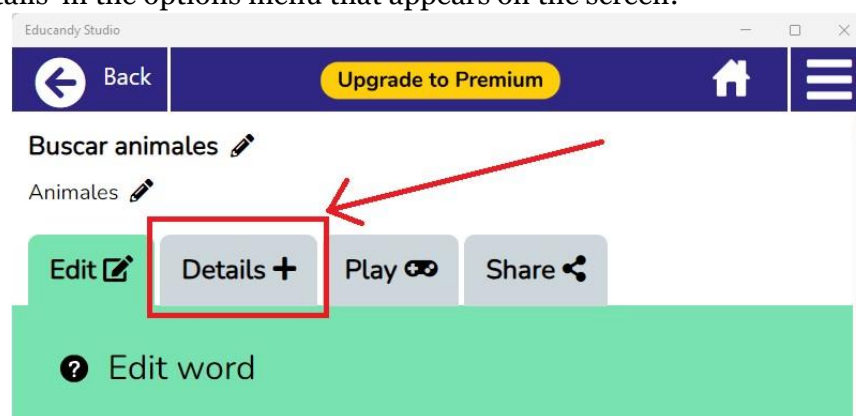

- You can also edit the name of the activity, as well as the theme assigned when creating it, for this you must click on the pencil that appears on the right side

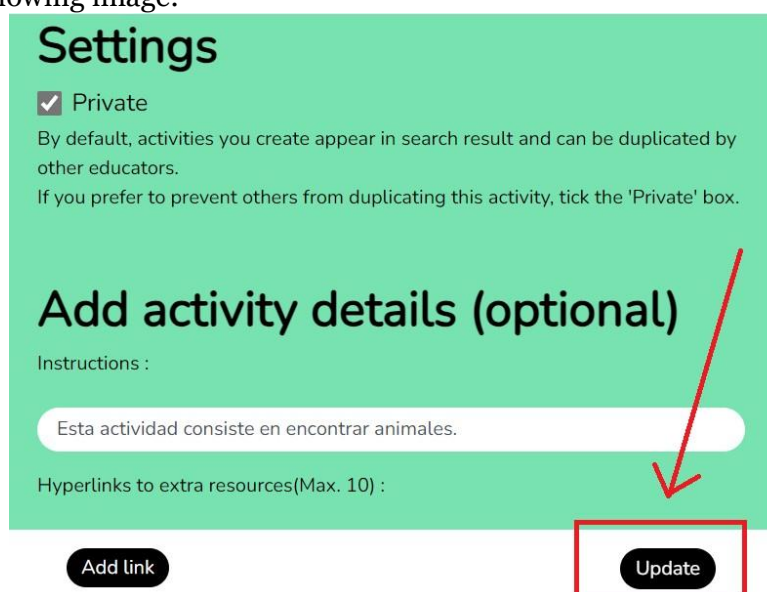

The section you want to modify, which is located in the upper left part of the interface, be guided by the following image:

- If you want to add more details to your activity such as a description, or make it private or public, you can click on the option that says 'Details' in the options menu that appears on the screen:

- Cans add a description about what the activity is about, as well as make it private, once these parameters have been modified, you must click on the 'Update' button so that the changes made to said activity are saved, this button is located in the bottom right part of the interface, as can be seen in the following image:

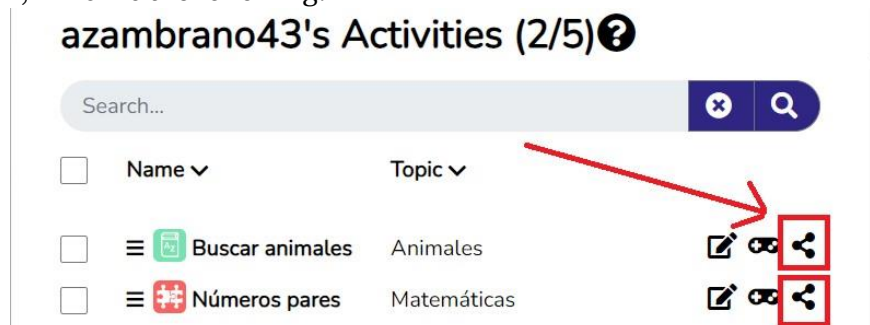

- With this we have completed the customization of our activity in a satisfactory manner.

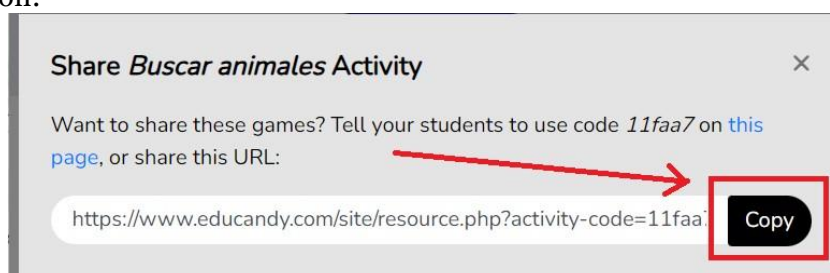

4. Share an activity

Now we have created our activity and personalized it respectively, now we must learn how to share this activity with our students, for this purpose we must follow the following steps:

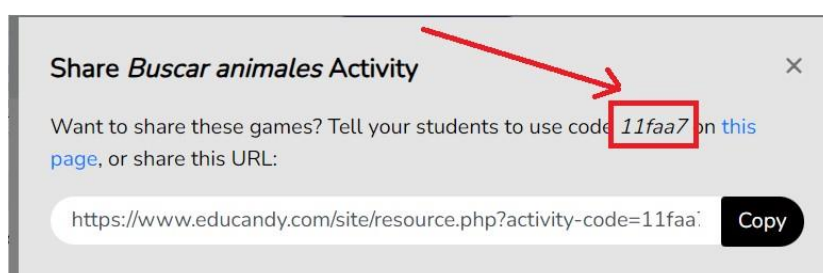

- Access "My Activities" in your Educandy profile, they are displayed on the interface very visibly, so it will not be a problem to locate them.
- The activity has an icon that corresponds to the option to share said activity. This icon is located to the right of the interface, at the same height as the name of the activity. If we want to share our activity we must click on said icon, which is the following:

- An interface will be displayed, which contains two important parts, the first is the address that we can share directly with the people we want to carry out our activity, we can copy said address quickly by clicking on the 'Copy' button:

- The second important part of this interface is a code, with which people can directly access the activity through the Educandy application, this code is found in the text above the address, as shown in the following image:

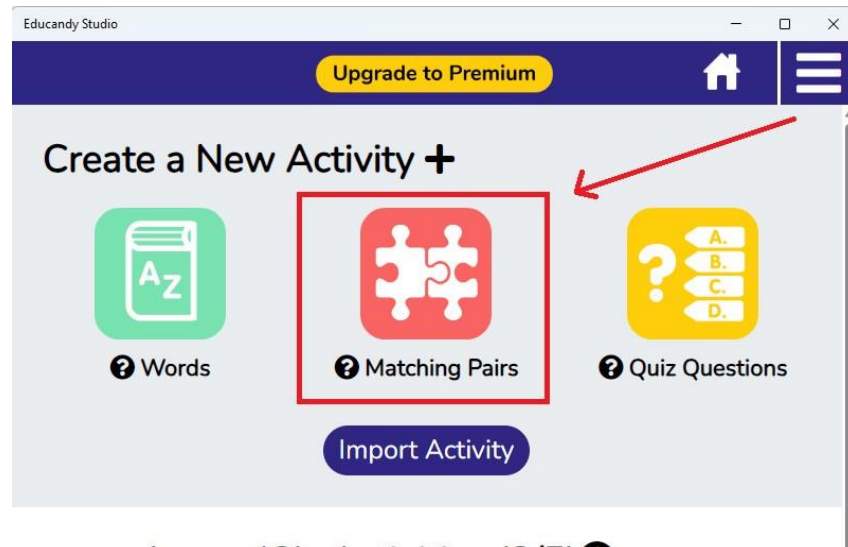

- In this, we have learned two ways to share our activity with the people we want to do it.

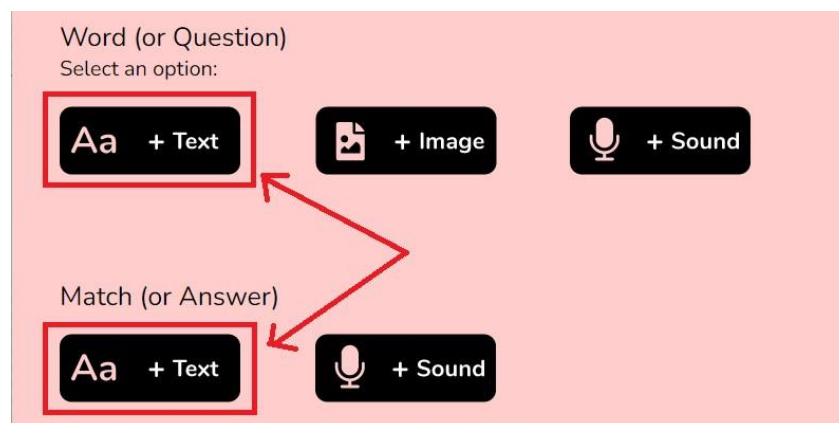

5. Matching activities

Now we know how to create, customize and share an activity, so now we can explore the different activity options that the Educandy tool offers us, in this video we will explore the activities of matching pairs, to create an activity of this type we must follow the Next steps:

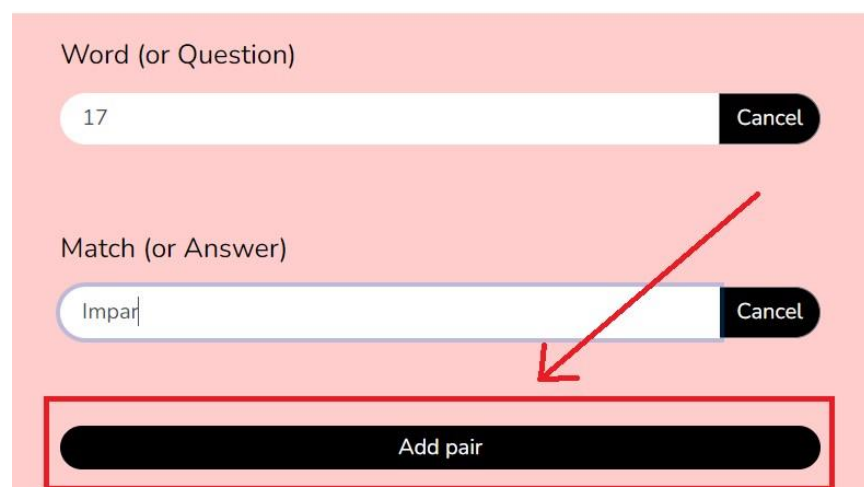

- Click on 'Create a New Activity', as we have already learned.
- Then click on the 'Matching Pairs' option, whose icon is represented by two puzzle pieces that converge, as shown below:

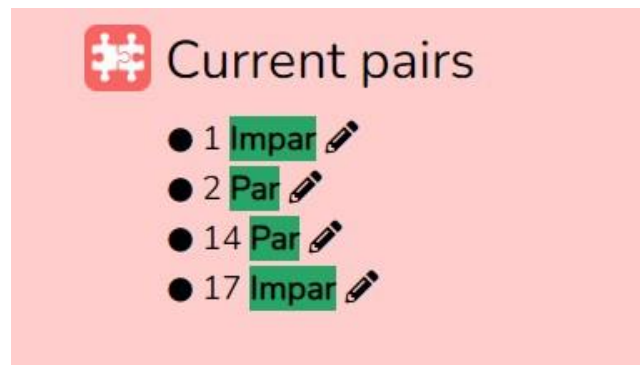

- Enter a name and topic for our pair-matching activity.
- Next, we will be given an interface to enter a word with its respective pair. Educandy also gives us the option to add representative sounds or images for said words, in this case we choose the text option:

- Now, we must write, upload the image or sound for the word and its pair. When we have done this, we must click on the 'Add pair' option, so that said word with its respective pair is added to the activity:

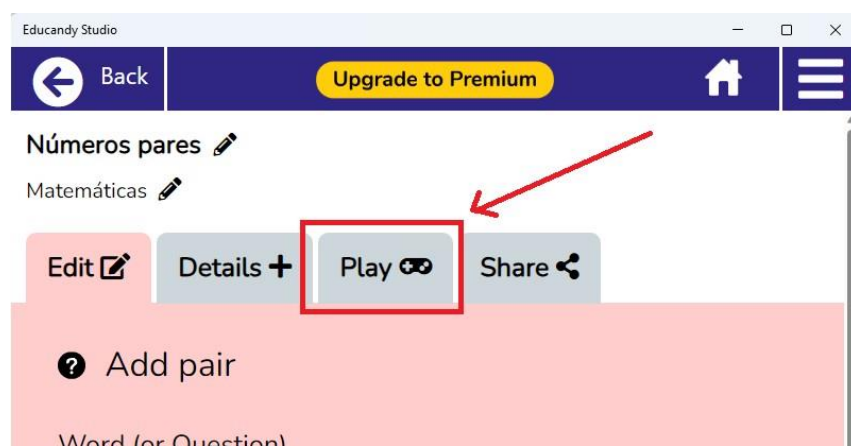

- We can verify the words that we have added with their respective pairs if we slide down the interface either using the mouse wheel, or the scroll bar located to the right of the interface, the words with their pairs are displayed as follows:

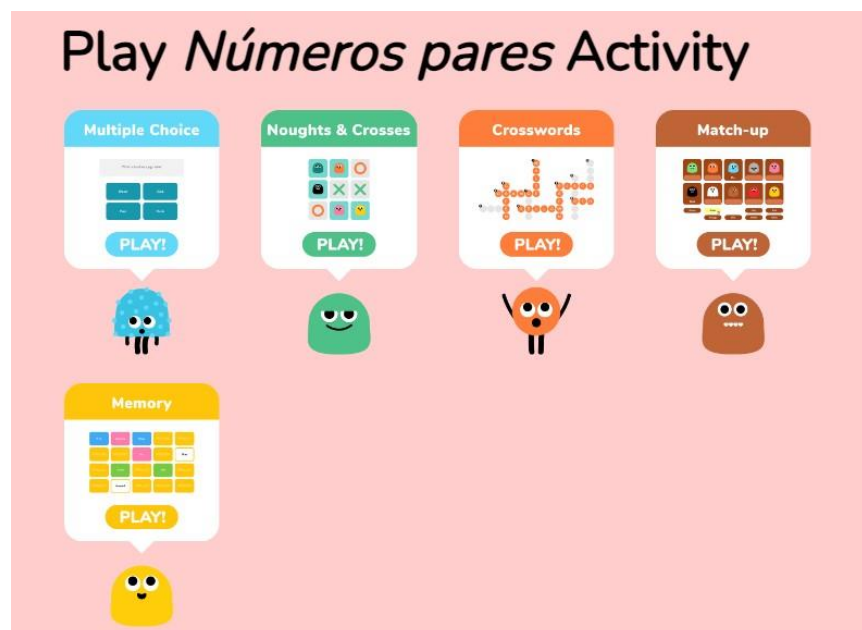

Nota: At least 3 pairs must be added for the activity to work correctly.

- Once the entries for our activity have been entered, we can customize it respectively as explained in previous videos.
- We can previously observe the game options we have for our pair-matching activity by clicking on the 'Play' option in the visible options menu:

- The minigame options that our activity has regarding matching pairs will be displayed to us, we have options such as multiple choice, tic-tac-toe, crossword puzzles, pairing and memory, as seen below:

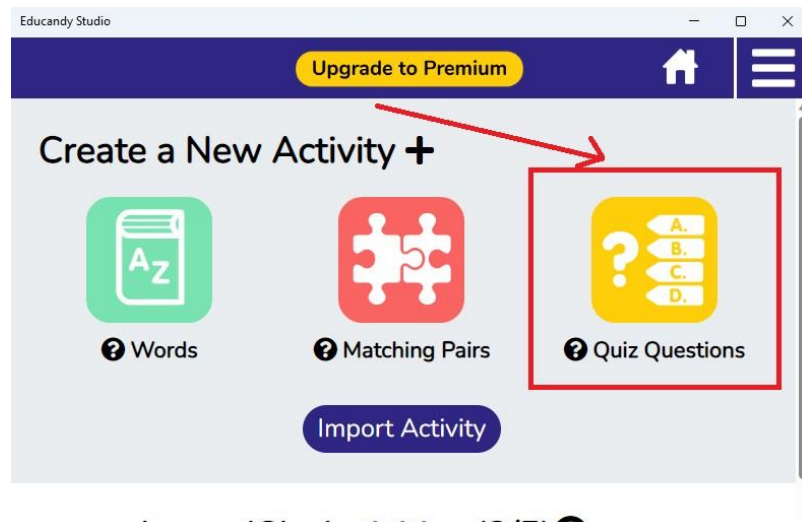

- Once all of the above has been done, our pair-matching activity will be ready to be shared with the audience we want.

6. Quiz activities

We were exploring the activity options that our Educandy application offers us, now we have the third and last option, this corresponds to the questionnaire, in this video we will explain how to create a questionnaire type activity, for which we have to follow the Next steps:

- Click on 'Create a New Activity', as we have already learned.
- Then click on the 'Quiz Questions' option, whose icon is represented by two puzzle pieces that converge, as shown below:

- Enter a name and topic for our quiz activity.
- Next, we will be given an interface to enter a question with its respective correct answer, as can be seen in the following image, the upper text box is to enter the question and the lower text box is to enter the answer option correct:

- Now, the Educandy application allows us to add up to 3 response options that will act as distractors, that is, taking into account the correct response option, we will have 4 response options so that the person who is carrying out the activity can choose one that they think is the correct one, after writing our three answer options we just have to click on the 'Add question' button and our question will have been added correctly, an example is shown below

- We can verify the questions that we have added if we slide to the bottom of this interface, the added questions will be shown, in green the correct answer option and in red the distracting options that we added:

Nota: At least 3 questions must be added for the activity to work.

- Once the entries for our activity have been entered, we can customize it respectively as explained in previous videos.
- We can previously observe the game options we have for our pair-matching activity by clicking on the 'Play' option in the visible options menu:

- The minigame options that our activity has will be displayed. In this case, since it is a questionnaire, it only has a single game option:

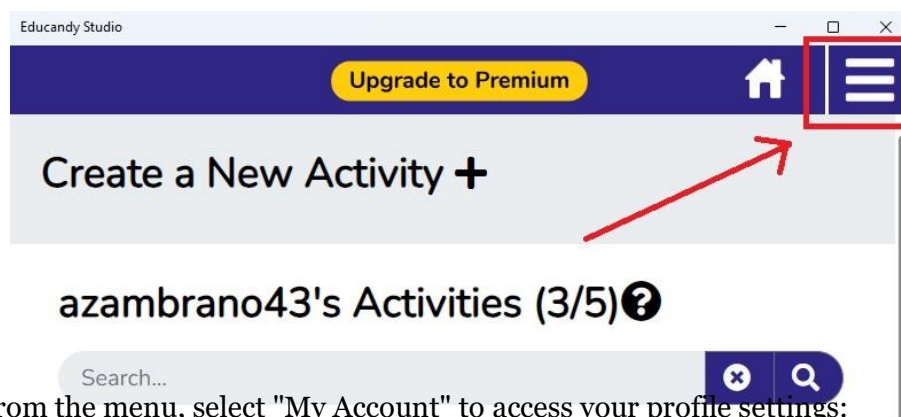

- Once all of the above has been done, our pair-matching activity will be ready to be shared with the audience we want.

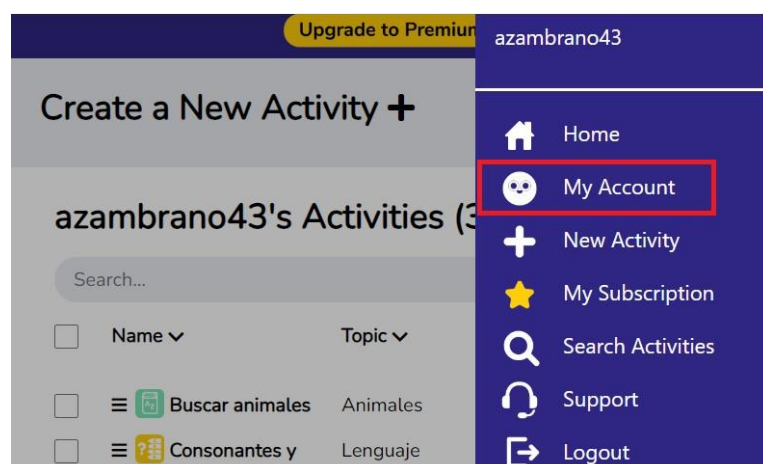

7. Profile settings

The Educandy application also offers us an option to configure our teaching profile. This option can help us be easily identified by other people. To configure our profile in Educandy we must follow the following steps:

- In the top right corner of the app, locate the three lines and click on it:

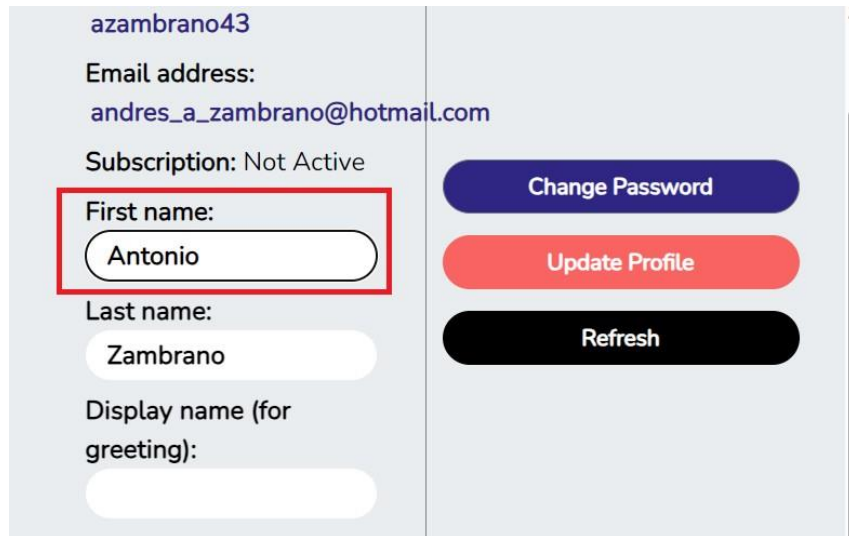

- From the menu, select "My Account" to access your profile settings:

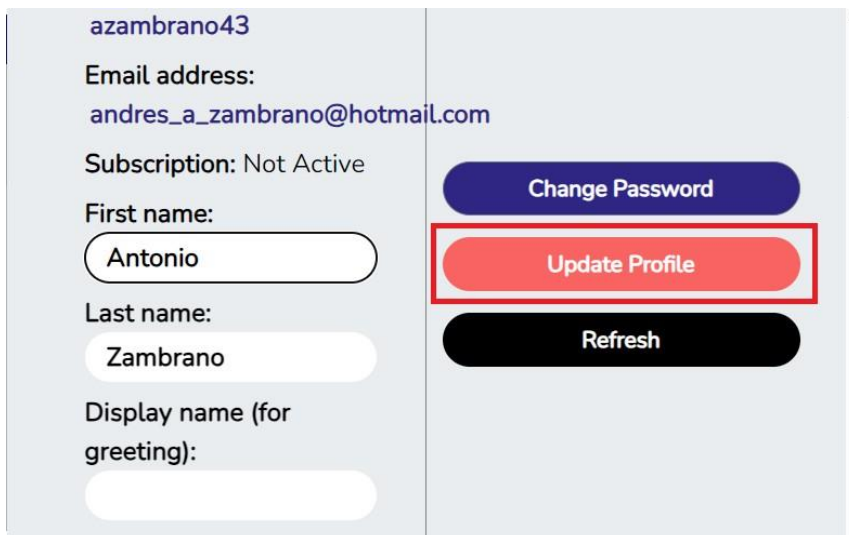

- See if your username, email, and subscription status.

- To modify parameters, such as your first name, last name, and screen name, click the corresponding option.
- This example changes the screen name from "Andrés" to "Antonio" as a middle name:

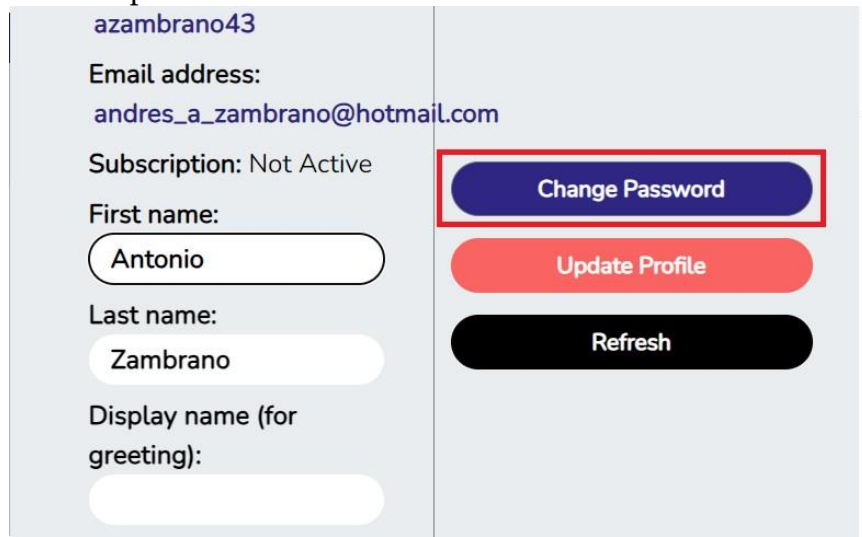

The screenshot shows a user profile page for 'azambrano43'. The email address is 'andres_a_zambrano@hotmail.com' and the subscription status is 'Not Active'. On the left, there are input fields for 'First name' (containing 'Antonio'), 'Last name' (containing 'Zambrano'), and 'Display name (for greeting)'. On the right, there are three buttons: 'Change Password' (blue), 'Update Profile' (red), and 'Refresh' (black). The 'First name' input field is highlighted with a red rectangular box.

- Click "Save Changes" to confirm the changes made to your profile:

This screenshot is identical to the previous one, but the 'Update Profile' button on the right is highlighted with a red rectangular box.

- See the message confirming that your changes have been saved and click "OK."
- If you want to change the password, click on the corresponding option and follow the steps indicated:

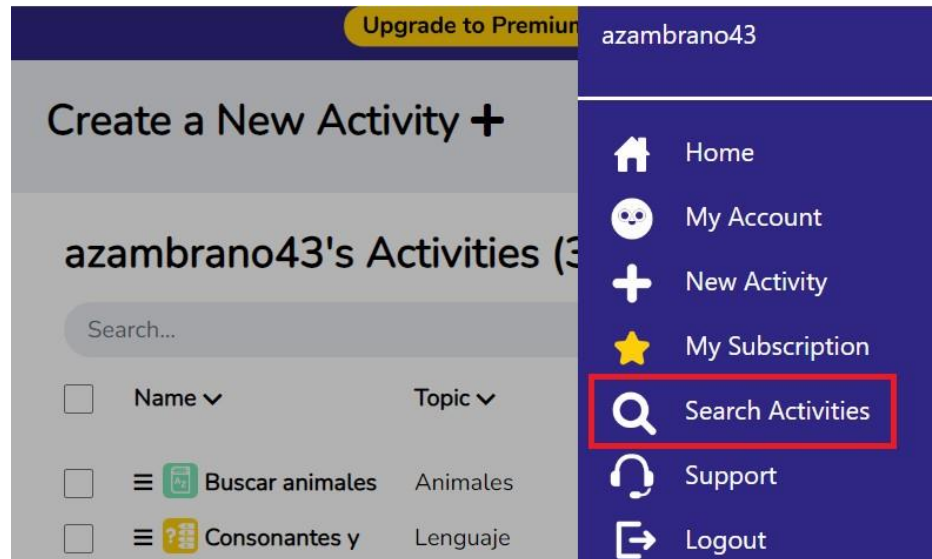

This screenshot is identical to the previous ones, but the 'Change Password' button on the right is highlighted with a red rectangular box.

- If you decide to change your password, check your email for the password change link.
- Once the desired modifications have been completed; you have successfully configured your profile on Educandy.

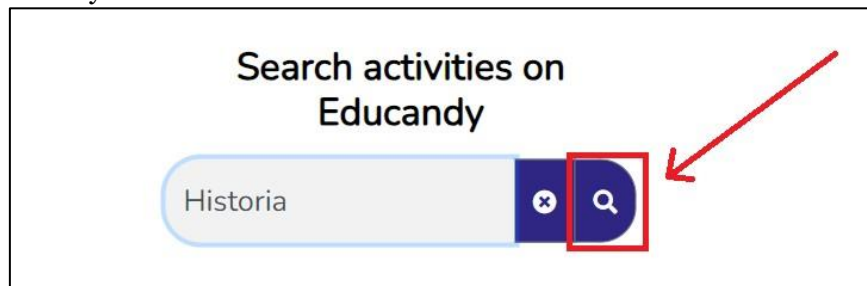

8. Take advantage of already made materials

In this video we will explore an Educandy option that is very interesting, it is an option that allows us to take advantage of and use activities carried out by other people, to carry out this task, we must follow the following steps:

- Click on the three bands to display the menu and select the option "Search activities".

- In the search bar, enter the specific topic you want to explore, for example, "history."
- After entering the topic, click the magnifying glass icon to see activities related to your search:

- Explore activities related to the entered topic, such as "history".
- Select the desired activity, for example, "History of Argentine independence on July 9":

GRADO. TEMA. Posindependencia
en América

by Azucena Anaya

Historia Argentina > 9 de Julio -
Independencia

by Soledf

Historia > 9 de Julio- Día de la
independencia

by solmar

- See if the type of activity, as in this example, that involves "matching pairs."

9 de Julio - Independencia

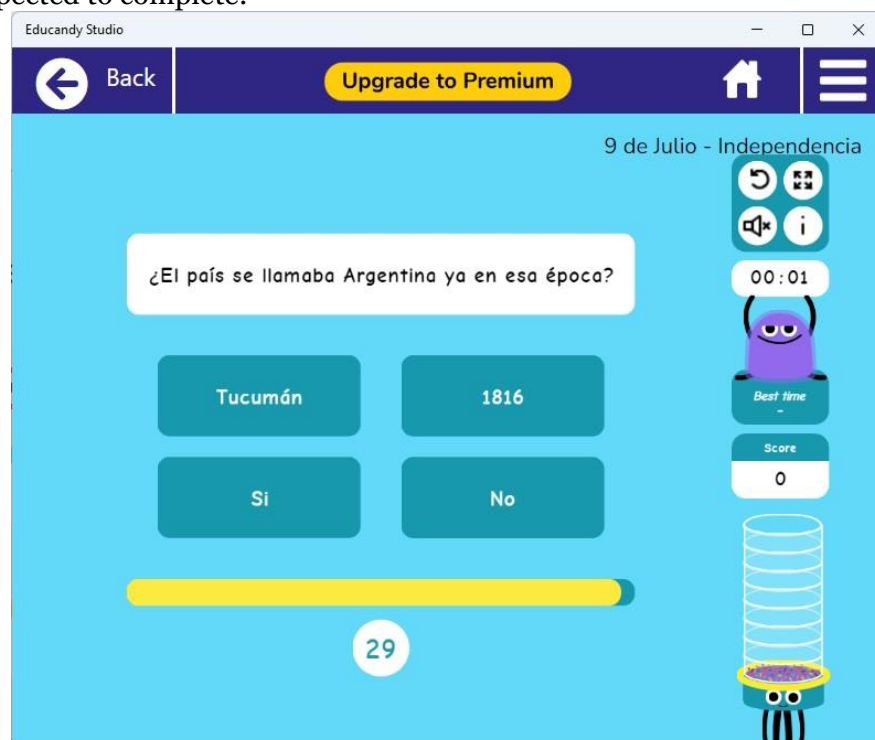

Historia Argentina

by Soledf

This is a **pairs game**. Click one of the game links below to play!

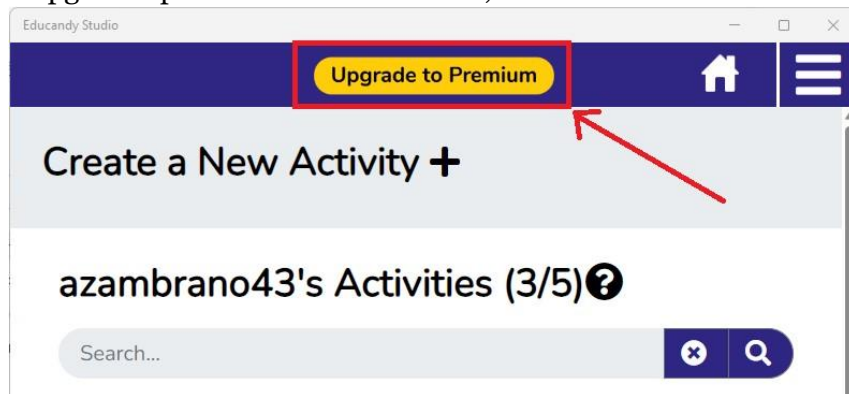

- Click on the selected activity to review its details and confirm if it is the one you want to use.
- Notice how the activity is presented to students and what task they are expected to complete:

9. Educandy Premium Subscription

If we have been quite observant throughout the options explored in Educandy, we can realize that there is an option that suggests upgrading our account to premium to have many more benefits. Next, in this video we will explore the benefits that this offers us. premium option, to know these benefits we must follow the following steps:

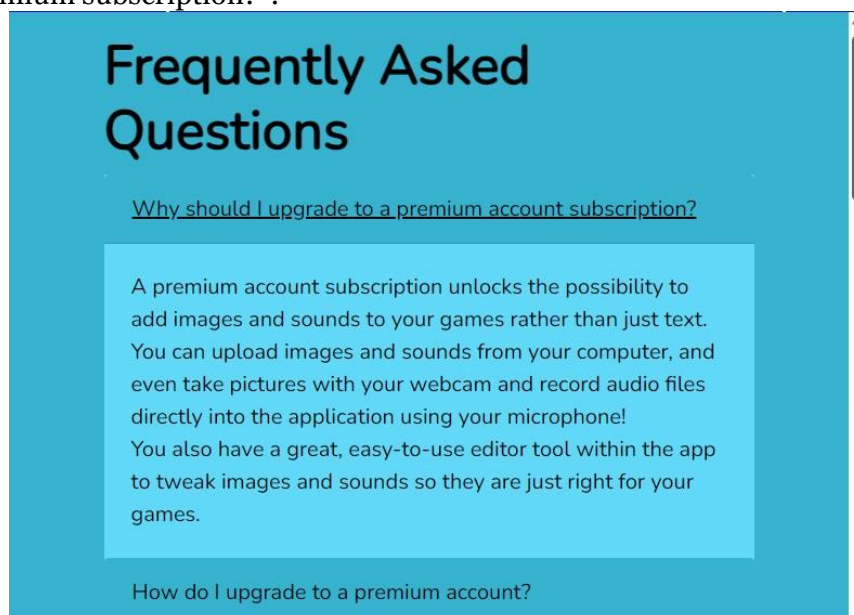

- Rate the upgrade option to Premium. Below, above in the center:

- You will find the "FAQ" option at the bottom center, you can hardly see it because it is so small. Click on it:

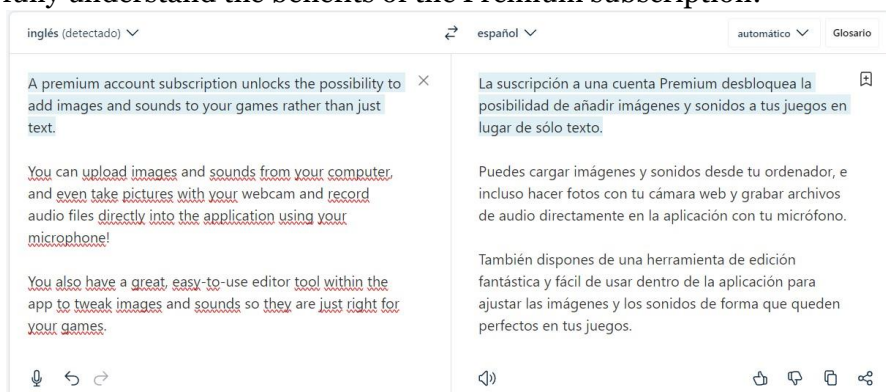

- In addition to the FAQ section, explore common questions related to the Premium subscription.
- For example, select the question "Why should I upgrade my account to a premium subscription?":

- The answer provided by Educandy, in this case, mentioning that the Premium subscription unlocks the possibility of adding images and sounds to your games, not just text.

- If necessary, copy the text and use it in a reliable translator, such as DeepL, to fully understand the benefits of the Premium subscription:

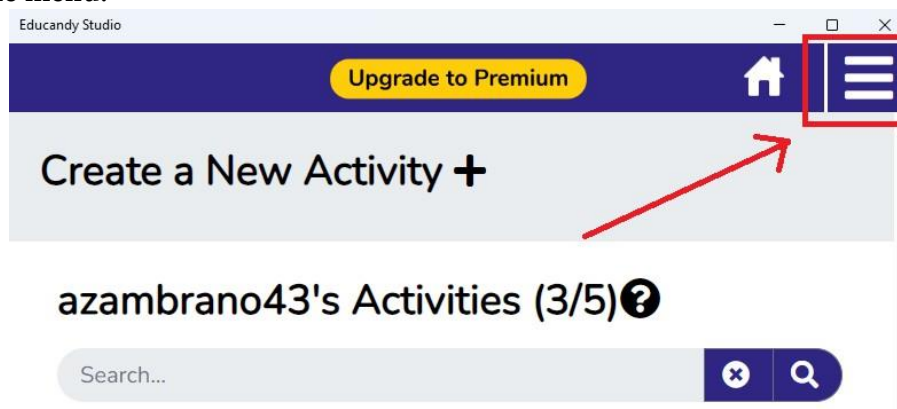

- Explore other FAQs to learn more about the Premium subscription and evaluate if it's right for you.

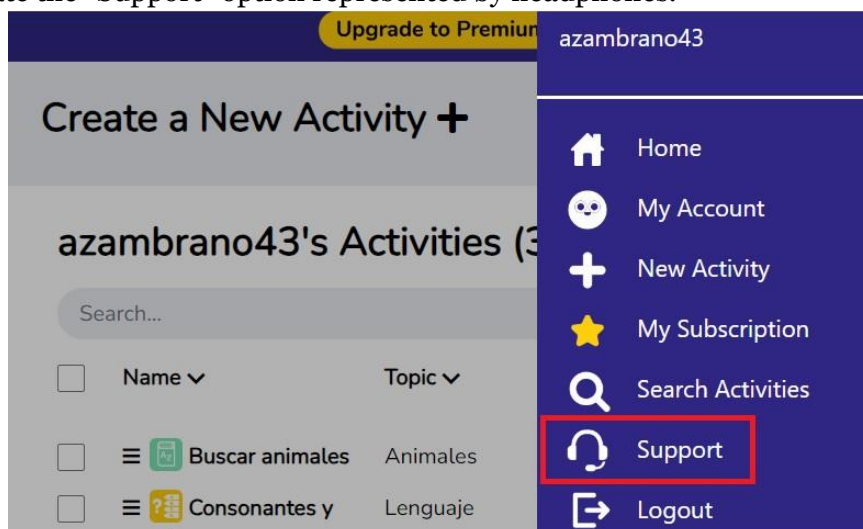

10. Support and FAQ

If we have any problem or inconvenience when using the Educandy application, it offers us a support option which could help us solve our problems or contact Educandy support to report our problem. To do the above, we must follow the following steps :

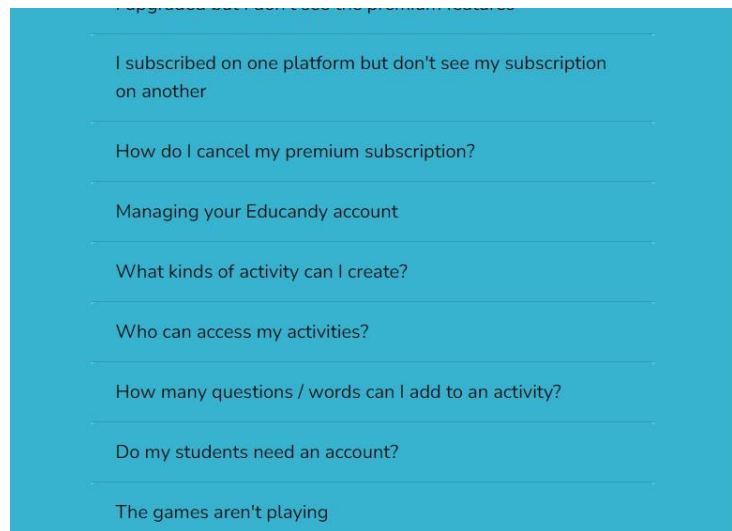

- If you have any problem or inconvenience when using Educandy, identify the nature of the problem.
- In the upper right corner of the application, click on the three lines to display the menu:

- Activate the "Support" option represented by headphones.

- Examine the repertoire of frequently asked questions presented. You can find answers to your questions without having to contact support:

Nota: If you are not very knowledgeable about the English language, you can copy the text that appears on the screen and copy it to understand it.

- If you do not find the solution in the frequently asked questions, fill out the form providing your information and a detailed description of the situation you are facing:

- Click "Submit" to transmit the form to the support team Educandy.

- Please check your email within the next 24 hours to get the response from the Educandy support team.
- If you receive a response, check to see if it contains the solution to your problem. If not, consider contacting support again.

8. Frequent questions

Comor can I edit an activity after having created it?

Access the "My Activities" section, select the activity you want to modify and choose the edit option to make changes.

¿Is it possible to import activities from other users into my account?

Currently, Educandy does not support direct import of activities between user accounts. However, you can share the activity and allow others to copy it to their profiles.

HowWhat activities can I create with a standard account?

The Standard accounts have a limit on active activities. You can manage your limit from the account settings section.

¿Is there a way to recover an activity deleted by accident?

Unfortunately, once Deleted, an activity cannot be recovered. It is recommended make regular backups or use the mirror activity function before doing significant changes.

ComOr can I report inappropriate content or errors in an activity shared by another user?

Please use the "Report" option available in the activity to report any inappropriate content or errors. Our team will review and take necessary action.

¿Is Educandy compatible with mobile devices?

Yes, Educandy is compatible with mobile devices. You can access the platform through web browsers on smartphones or tablets.

Can I join an existing group on Educandy?

Explore the "Groups" section on the platform, search for the group you want to join and follow the instructions to join the community.

¿What happens if my internet connection is interrupted while creating an activity?

The platform automatically saves the changes made to your activity. When you reconnect, you can continue from where you left off.

¿Is there any age restriction to use Educandy?

Educandy is designed for users of all ages but is recommended for those over 13 years of age. Users under 13 years of age must have adult supervision.

Can I provide feedback on the platform or suggest new features?

Use the "Support" section in Educandy to send your comments, suggestions or report any problems. We value feedback from our users to constantly improve the platform.
