Table of Contents

1. Project Objectives	2
2. Objective of the Manual	2
3. Scope.....	2
4. Addressed to	2
5. Introduction of the application	3
6. Basic Notions	4
7. Steps to follow	5
8. Frequently asked questions	9
9. Glossary	fifteen
10. Bibliography and References	fifteen

1.Project Objectives

- 1) Train teachers from the Ministry of Education in the use of ICT tools to improve their teaching performance, in order to promote educational innovation and online learning.
- 2) Train priority attention groups or digitally illiterate groups in the use of ICT tools to apply what they have learned in their daily lives, promoting their digital inclusion and improving their quality of life.

2.Objective of the Manual

- 1) Guide people interested in learning about the use of Kahoot to carry out evaluation questionnaires for students or reinforce learning for students.
- 2) Serve as a support document to resolve questions about this application or make the tools offered by this application more efficient.

3.Scope

The scope of the document will be to provide users with a complete and detailed guide on how to use the Kahoot educational platform. This will include everything from the creation of personalized games to participation and analysis of results. The document will cover both basics and more advanced features, allowing users to get the most out of Kahoot in educational contexts. In summary, the goal is to turn the guide into a comprehensive reference for users who wish to incorporate Kahoot as an effective and fun tool in their teaching and learning processes.

Users will be able to create interactive games for the educational development of their students to make learning more bearable in addition to reinforcing what has already been learned. Likewise, in times of crisis that require the use of virtuality, this tool can be of great help. for teachers who want to reinforce or evaluate the knowledge taught.

4.Addressed to

The guide will be aimed at a diverse audience that includes educators, teachers, instructors, parents and anyone interested in using the Kahoot educational platform to create interactive and engaging learning experiences. The focus will be on both those who are familiar with the platform and those who are new to it. The guide will provide detailed information, from the basics to more advanced features, allowing users to tailor Kahoot to their specific educational needs.

5.Application introduction

Kahoot is an innovative educational platform designed to make learning a fun, participatory and effective experience. Since its launch, Kahoot has revolutionized the way educators and students interact in the classroom and beyond.

Conceived as a tool that combines technology with the excitement of gaming, Kahoot allows educators to create interactive trivia games, encouraging active participation and engagement from students. Whether in a face-to-face or virtual learning environment, Kahoot has proven to be a powerful ally in personalizing the educational process.

Kahoot!

Important aspects:

- Kahoot is an online tool that allows you to encourage student participation during your virtual session through interactive assessments.
- Interaction with the tool is in real time and allows the creation of interactive evaluations (among the free options are questionnaire type and true/false).
- To carry out interactive evaluations, Kahoot relies on the gamification technique, which consists of showing questions which are answered by students.
- In order to use Kahoot it is necessary to create an account through its website.

6. Basic notions

Before diving into the exciting world of Kahoot, it is essential to have some basics to get the most out of this educational platform.

6.1 Create an Account: Before you begin, make sure you have a Kahoot account. You can create a free account that will give you access to all essential features. Once you have your account, you will be able to customize your games and track participants' progress.

6.2 Main Interface: Upon logging in, you will be greeted by the main Kahoot interface. Here you will find the options to create new games, explore existing ones, and review previous game reports. The interface is intuitive and easy to navigate, allowing you to quickly focus on your educational goals.

6.3 Create a Game: Creating a game is the heart of Kahoot. You can start by clicking "Create" and follow the process step by step. Define the title, add questions and adjust the settings according to your needs. The platform offers a variety of question formats to suit different learning styles.

6.4 Elements of a Question:

Question: Clearly formulate the question you want participants to answer.

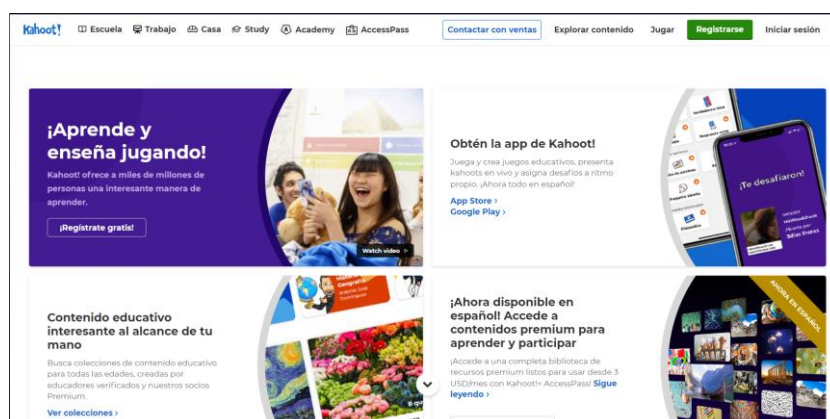

Response Options: Provides response options for players to choose the correct one.

Timer: Set the time limit to answer each question and add excitement to the game.

6.5 Game Settings: Before launching your game, explore the configuration options. You can adjust the response time, allow poll questions, and decide whether or not participants will see the correct answers after each question.

6.6 Game Modes: Kahoot offers game modes such as "Showdown" and "Team", which affect the dynamics of the competition. Understanding these options will help you tailor the game to your specific educational goals.

6.7 Player Participation: Players join the game through a unique code. Be sure to explain to participants how to access and join using their devices, whether it's a mobile phone, tablet or computer.

7. Steps to follow

Getting started in Kahoot:

Kahoot being a website, it is necessary to register with an account to be able to create games and invite students to these activities, students do not necessarily need an account, just having a code to access the activity is enough since it is designed to evaluate the general knowledge of students so it is anonymous, but if you are an educator you necessarily need an account to be able to create these games.

Steps to create an account on Kahoot:

1. Enter <https://create.kahoot.it/register> and select the teaching profile by clicking on "Teacher".

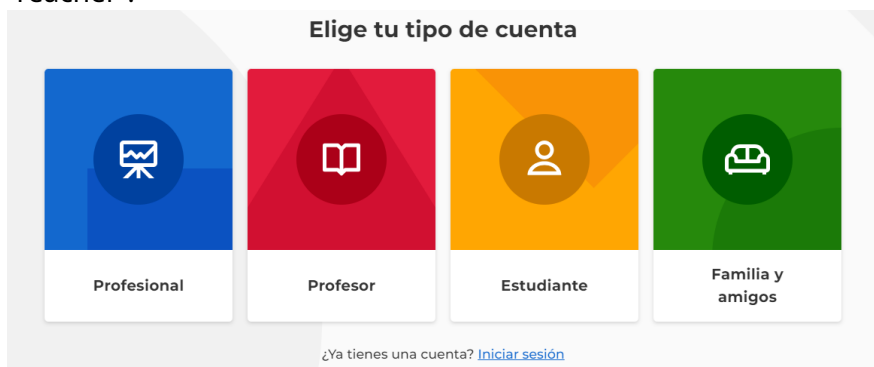

Illustration 1 Selecting the account type in Kahoot

2. Select the workspace in which we develop, in this case we will click on "Higher education".

Illustration 2 Level of education in which the account will be used

3. To register, enter your institutional email account and create a new password to access Kahoot, then click Register.

Illustration 3 Registration of new user information

4. There are various plans for Kahoot, in this case we will select the free option that allows you to evaluate up to 10 people.

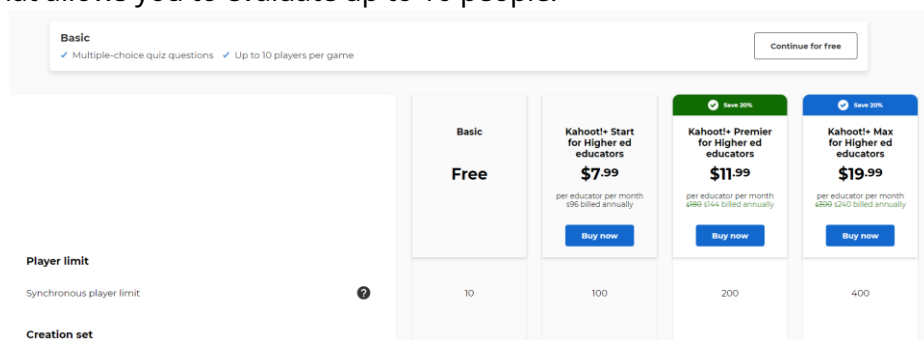

Illustration 4 Selection of the plan for the use of the account

5. In this way we have already created our account, if we want to personalize it we go to our profile.

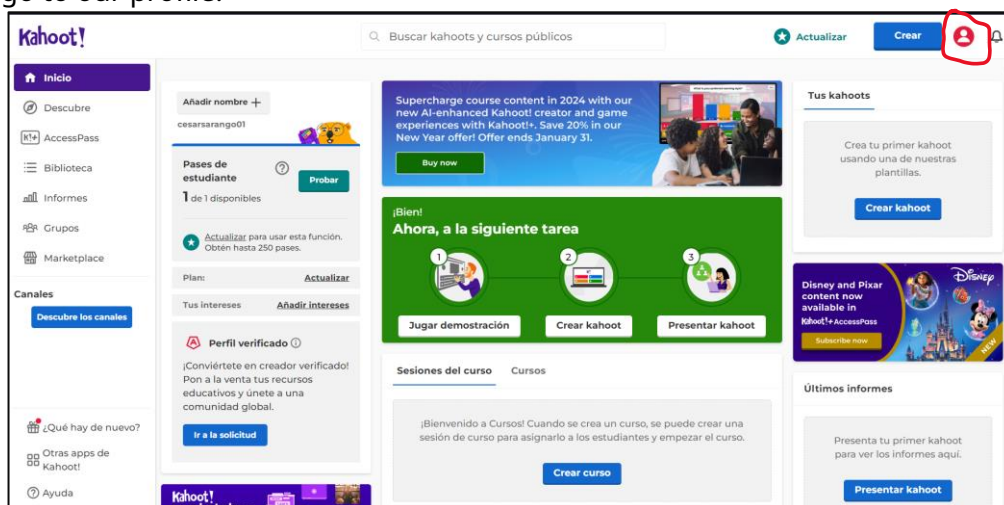

Illustration 5 Kahoot main page

6. We click on profile settings

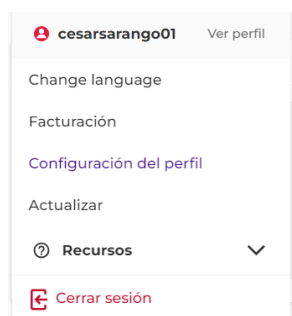

Illustration 6 Account Options

7. We personalize our profile and we have our Kahoot account ready

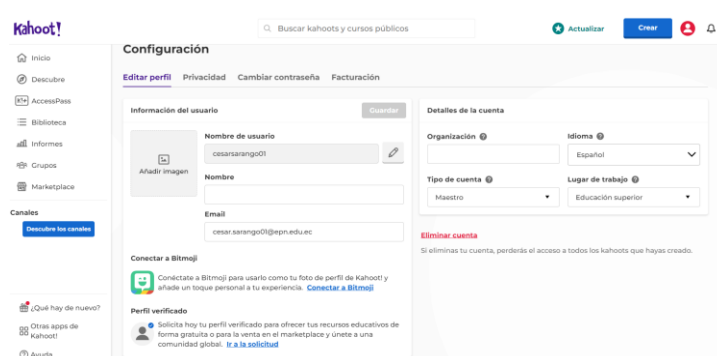

Illustration 7 Profile Customization

Creating a Kahoot

Now that we have created the account, as a teacher we can start creating a Kahoot, the main tool of the page.

1. While on the Kahoot website, you must click on the “Create” button.

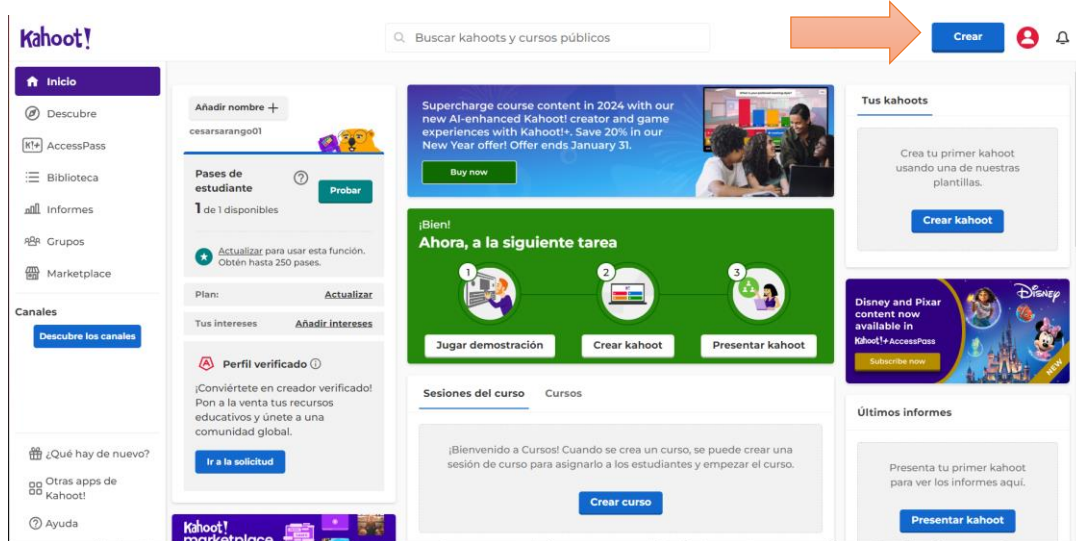

Illustration 8 Kahoot home page

2. We select the option that says Kahoot

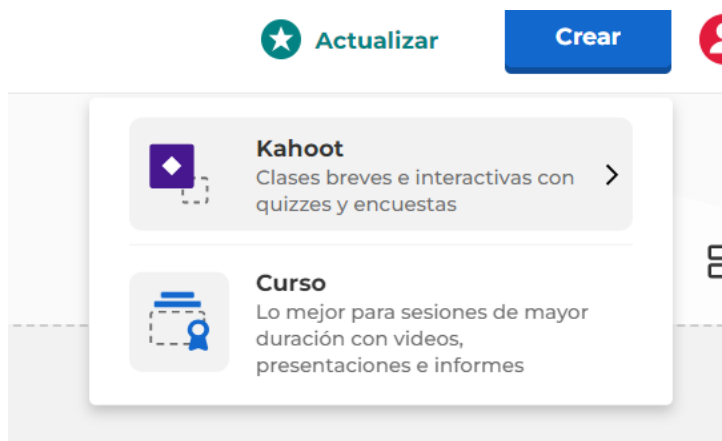

Illustration 9 Creation of course or Kahoot

3. When you click, a tab will appear where we can carry out our Kahoot very quickly using AI, where we can generate questions based on a topic, but in this case we will do it in the traditional way with a blank canvas.

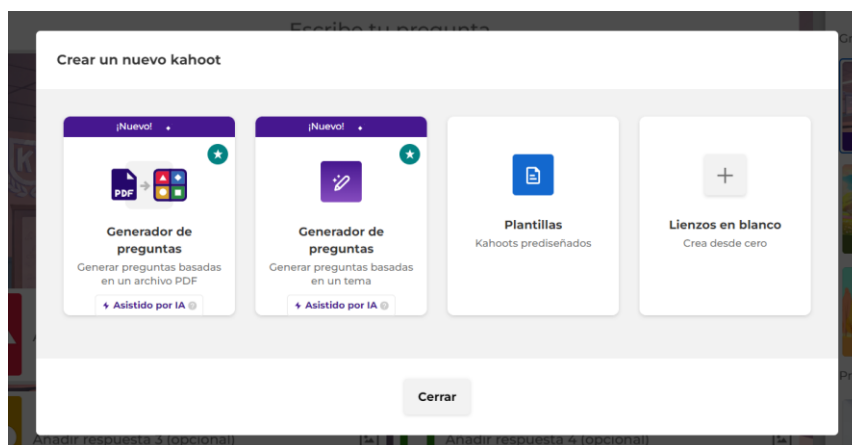

Illustration 10 Generation of Kahoot questions or templates

4. Once inside the configuration section we can add the title among other general configurations of the Kahoot, once everything is configured we are ready.

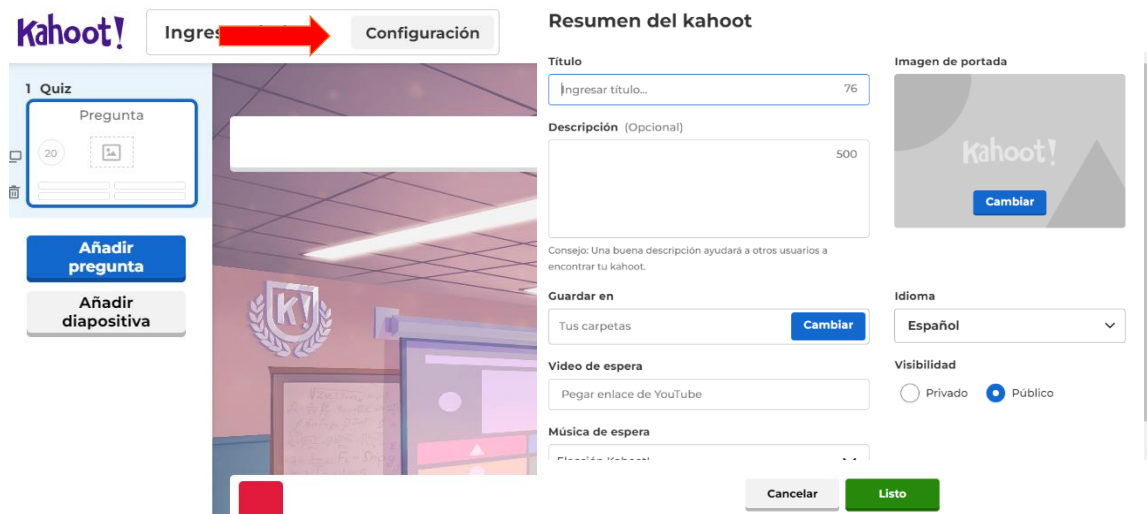

Illustration 11 Kahoot Configuration

5. In the interface we will have several tools to create our questionnaire, in this case it is a Quiz type.

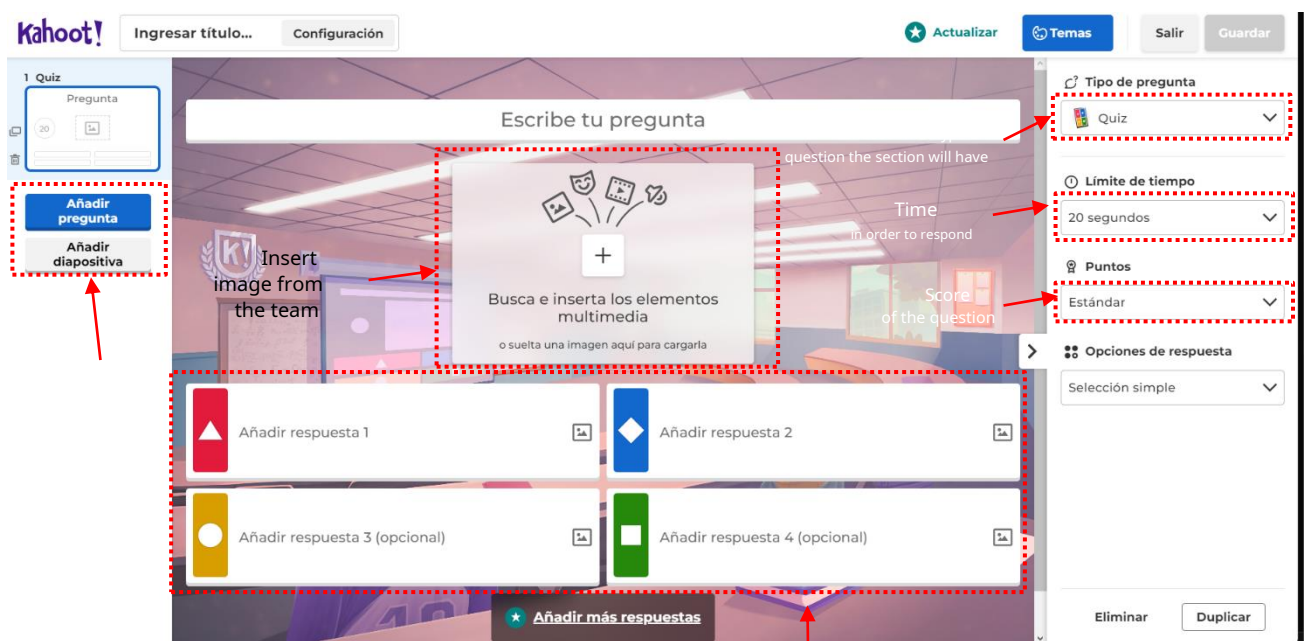

Illustration 12 Interface to create the Kahoot

Add alternatives

6. Quiz type example.

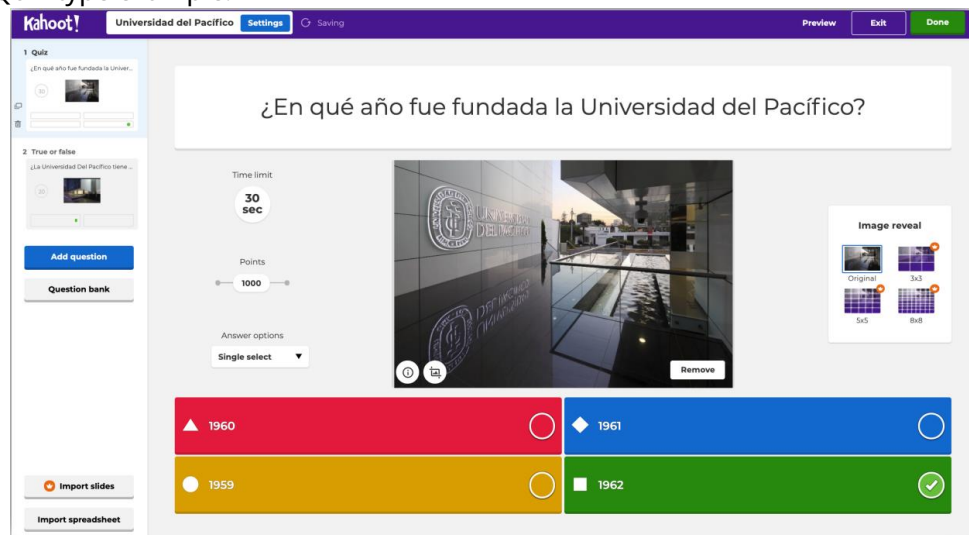

Illustration 13 Example of Quiz Kahoot

7. In the case of a true/false type Kahoot, we have the elements only that now we change to a format of choosing whether the statement is true or false.

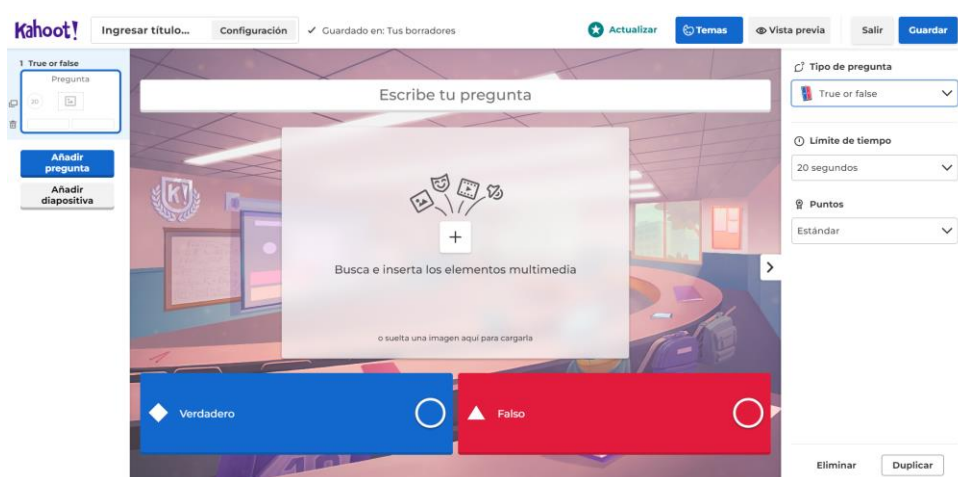

Illustration 14 Interface for true/false questions

8. Example true/false type.

Illustration 15 Example true/false question

9. To see the preview of the Kahoot, click on “Preview”

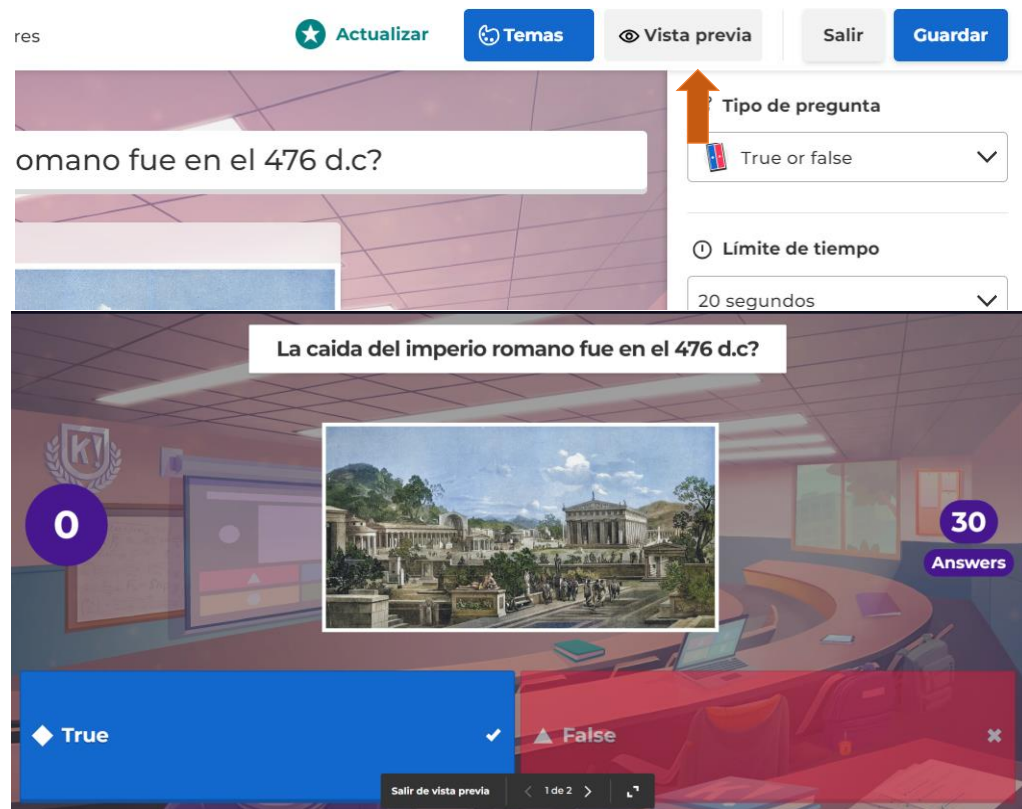

Illustration 16 Question preview

10. If we liked the result, we save the Kahoot in “save”

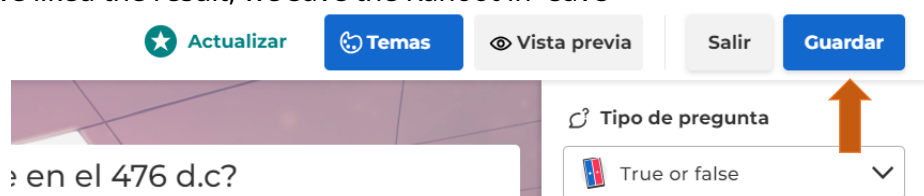

Illustration 17 save the Kahoot

11. We can see our created Kahoots in the “library” section.

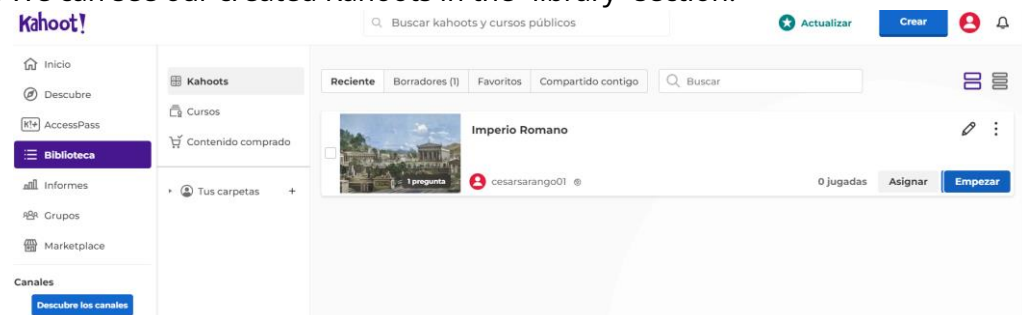

Illustration 18 Location of the created Kahoots

It should be considered that these are basic steps for creating Kahoot, currently Kahoot has been modernized to use AI and may add more functionalities in the future.

Play a Kahoot

1. We can see our Kahoots on the right side of the beginning, we click on the Kahoot we want to start.

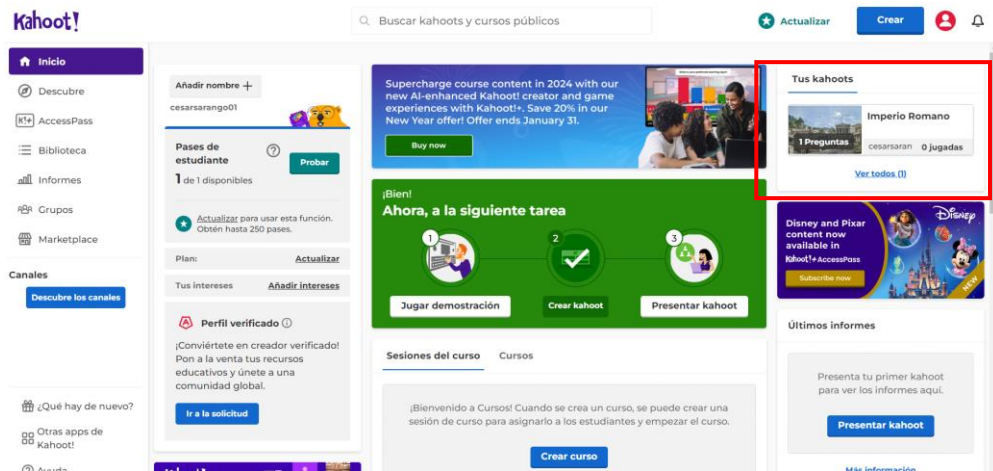

Illustration 19 Start of Kahoot

Note: To start the game you must share the full screen or window from the BBCU or Teams platform so that Kahoot is visible to everyone. Students join and respond using their own Internet-enabled device, such as a cell phone, tablet, laptop, or computer.

2. You must click start to start the game.

Illustration 20 Kahoot created

3. To start the game we must select the game mode, in this case the classic mode and click start.

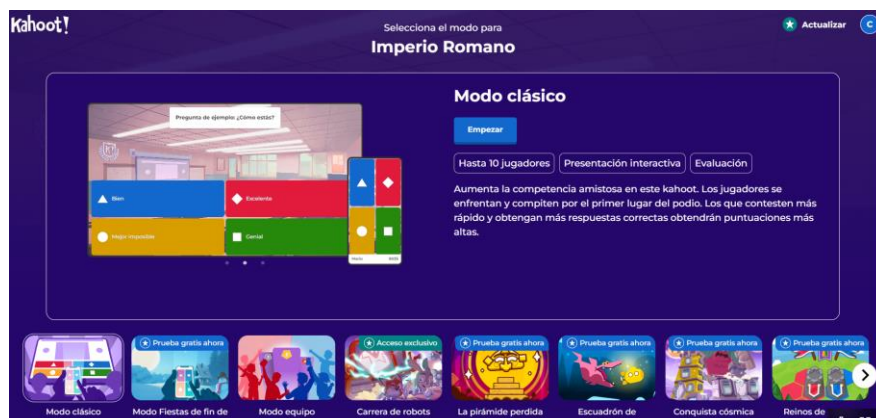

Illustration 21 Game mode selection

Classic Mode (Single):

In classic mode, participants play individually, competing with each other to obtain the most points by answering questions correctly. Here are some key features:

- **Individual Score:** Each player accumulates points based on the speed and accuracy of their answers. The faster a player answers correctly, the more points they will earn.
- **Direct Rivalry:** Players compete directly against each other, creating an atmosphere of individual competition. This mode is ideal when the objective is to evaluate the individual knowledge of each student.
- **Excitement and Speed:** The inclusion of a timer for each question adds excitement to the game and requires quick responses from participants.

Team Mode:

In team mode, participants are divided into collaborative groups to answer Kahoot questions. Here are the main aspects of this mode:

- **Team Formation:** Participants are grouped into teams before starting the game. The game creator can configure the number of members per team.
- **Collective Score:** Instead of individual scores, points are assigned to teams based on correct answers and how quickly they respond.
- **Collaboration:** Team members can discuss among themselves before submitting a response. This encourages collaboration and teamwork.
- **Collective Competitive Dynamics:** Although teams compete against each other, the focus is on collective scoring, creating an experience that is more collaborative and less focused on individual competition.

4. Now, a unique game PIN will be displayed at the top of the screen

Illustration 22 Game waiting screen for the teacher

5. Students must enter kahoot.it from their laptop, PC or mobile device and enter the PIN that appears to join the game.

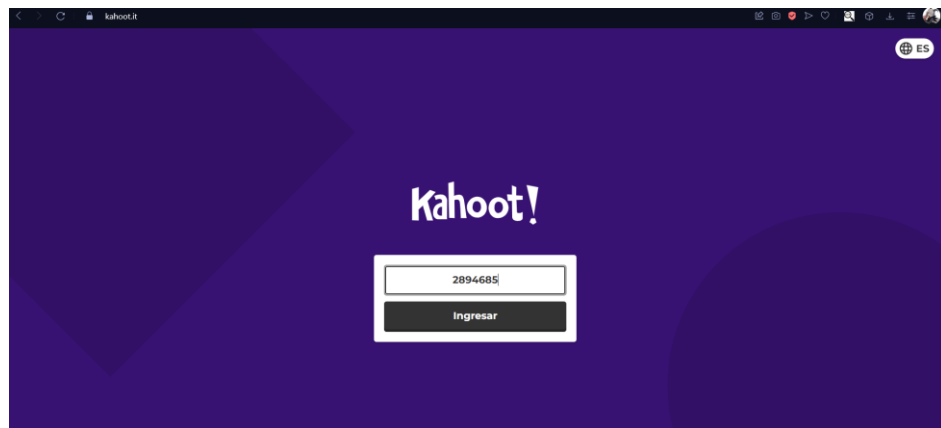

Illustration 23 Page where the student pastes the code

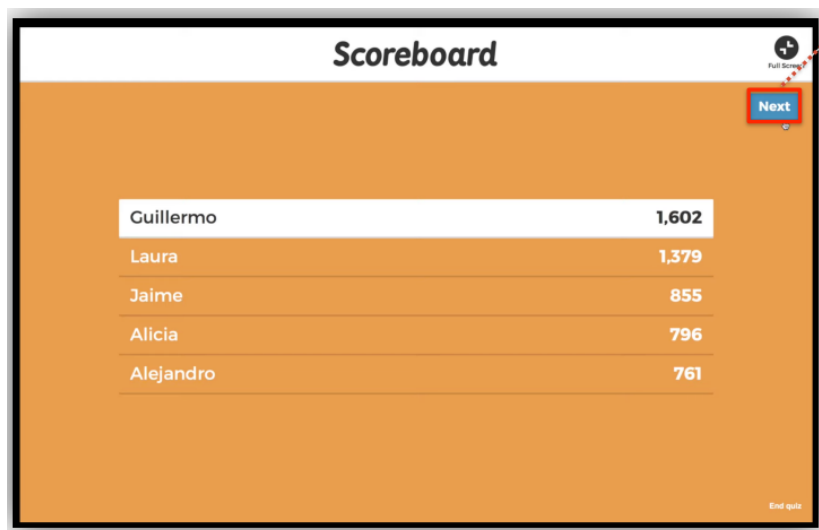

Illustration 24 Name of the student after entering the code

6. After the student writes their name it should appear in the main panel, once they are ready they must click start.

Illustration 25 Teacher interface shows students who joined the Quiz

7. As you advance through each of the Kahoot questions, the scoreboard will be displayed with the points obtained by each player, as shown in the following image.

A screenshot of the Kahoot! scoreboard interface. The title 'Scoreboard' is at the top center. In the top right corner, there is a 'Full Screen' icon and a 'Next' button highlighted with a red box. The main area contains a table with player names and their scores. The background is orange.

Player	Score
Guillermo	1,602
Laura	1,379
Jaime	855
Alicia	796
Alejandro	761

At the bottom right, there is a small 'End quiz' button.

Illustration 26 Scoring table

8. Frequent questions

1. How do I integrate Kahoot with existing educational platforms?

Kahoot is compatible with various educational platforms. Explore the integration options available in your game settings to connect with your existing educational environment.

2. Can I review student performance after a game?

Yes, Kahoot provides detailed reports after each game. Access the reporting section to analyze individual and group performance, which will help you evaluate your understanding of the material.

3. Is it possible to customize the design and appearance of my Kahoot games?

Kahoot offers customization options that allow you to adjust the design and appearance of your games. You can change colors, backgrounds and add your own creative touch.

4. What are the technical requirements to use Kahoot?

Kahoot is compatible with a wide range of devices such as computers, tablets and smartphones. You only need an updated web browser and a stable Internet connection to access the platform.

5. How do I invite students to join my Kahoot game?

Once you've created your game, Kahoot will generate a unique code. Share this code with participants, who can log into Kahoot.it and enter the code to join the game.

9. Glossary

Term	Description
Kahoot!	The game-based learning platform that allows educators to create interactive and engaging games to assess and teach students.
Game	In Kahoot, a game refers to an interactive session created by an educator to evaluate or teach students.
Educational resources	Question templates, tutorials, and other materials available on Kahoot to help educators create effective games.
AI	Artificial Intelligence, in Kahoot allows us to generate questions or supporting images for the Kahoot
Mixed mode	An option in some Kahoot games that allows you to combine features from individual and team modes.
