1. Project Objectives

Train teachers from the Ministry of Education in the use of ICT tools to improve their teaching performance, to promote educational innovation and online learning.

Train priority attention groups or digitally illiterate groups in the use of ICT tools to apply what they have learned in their daily lives, promoting their digital inclusion, and improving their quality of life.

2. Objective of the Manual

The objective of this user manual for the LUDOMINGA platform is to provide a clear and concise guide for users, facilitating access and interaction with the platform. This document is intended to:

- Explain in detail how to navigate and use the LUDOMINGA platform and its games.
- Provide step-by-step instructions on how to access and use each of the 22 mini-games available on the platform.
- Facilitate the inclusion and learning of people with intellectual disabilities, providing a support tool for the development of cognitive and adaptive skills.

This manual is designed to be a quick and easy-to-use reference, allowing users to get the most out of the LUDOMINGA platform.

3. Scope

This manual is intended for all users of the LUDOMINGA platform, including people with intellectual disabilities, their caregivers, educators, and any other person interested in using the platform. It covers all functionalities available on the platform, including navigation, access and use of games, and accessibility and usability features.

While it provides solutions to common problems and answers to frequently asked questions, it does not cover technical issues beyond the scope of the platform, such as hardware or internet connection issues. This manual reflects the version of the platform available at the time of its creation, and future updates to the platform may require corresponding updates to the manual.

Finally, this manual is not a substitute for professional training or medical or therapeutic advice for people with intellectual disabilities. Its purpose is to be a guide for the effective use of the LUDOMINGA platform.

4. Addressed to

This user manual for the LUDOMINGA platform is aimed at:

- **People with intellectual disabilities:** The main audience for this manual is people with intellectual disabilities who will use the platform to improve their cognitive and adaptive skills.
- **Caregivers and educators:** This manual is also aimed at caregivers and educators of people with intellectual disabilities, who can use the platform as a support tool in the teaching and learning process.
- **Family members:** Family members of people with intellectual disabilities can also benefit from this manual, as it will allow them to better understand how the platform works and how they can use it to support their loved ones.

- **Health and Education Professionals:** Professionals working in the health and education field, especially those who specialize in intellectual disabilities, may also find this manual useful.
- **Anyone interested:** Anyone who is interested in using the LUDOMINGA platform, whether for personal or professional reasons, can benefit from this manual. This includes software developers, researchers in the field of intellectual disabilities, and anyone else who may be interested in serious games and educational platforms.

5. Application introduction

LUDOMINGA is a web-based psychoeducational platform designed to improve the cognitive and adaptive skills of people with intellectual disabilities. This innovative platform uses the power of serious gaming to provide an interactive and immersive learning environment.

The LUDOMINGA platform has a collection of 22 mini-games, each designed to address different cognitive and adaptive skills. The games are designed according to Universal Design for Learning (UDL) principles, meaning they offer reading, audio, and image magnification options to ensure they are accessible to a wide range of users.

In addition to games, the platform also offers accessibility and usability features, making it easy to navigate and use for all users, regardless of their skill level or experience with technology.

The objective of LUDOMINGA is to provide a support tool for the development of cognitive and adaptive skills, to improve the living conditions of people with intellectual disabilities. By doing so, LUDOMINGA seeks to promote the educational, social, and labor inclusion of these people, improving their quality of life through an equalization of opportunities aimed at equality, equity and non-discrimination.

LUDOMINGA is more than just a gaming platform; is a comprehensive educational tool that uses technology to empower people with intellectual disabilities and help them reach their full potential.

6. Basic notions

Before starting to use the LUDOMINGA platform, it is important that users have some basic knowledge about web browsing and the use of digital games. Here are some things users should know:

- **Web Navigation:** Users should be familiar with basic web navigation, such as how to open a web browser, how to enter a URL in the address bar, and how to click on links.
- **Interaction with Digital Games:** Users should have a basic understanding of how to interact with digital games. This includes how to click or tap to interact with game elements, how to follow on-screen instructions, and how to navigate game menus.
- **Accessibility:** Users should know how to use the platform's accessibility features, such as reading, audio, and image magnification options.

Regarding the application workspace and the elements that compose it, the LUDOMINGA platform has an intuitive and easy-to-use user interface. When users enter the platform, they are met with a home screen that shows all the available games. Each game is represented by an icon and a title. By clicking on a game, users are taken to a game home screen where they can begin playing or access game instructions.

Additionally, the platform has a navigation menu that allows users to access different sections of the platform, such as the home page, help section, and settings section. In the settings section, users can adjust the accessibility options according to their needs.

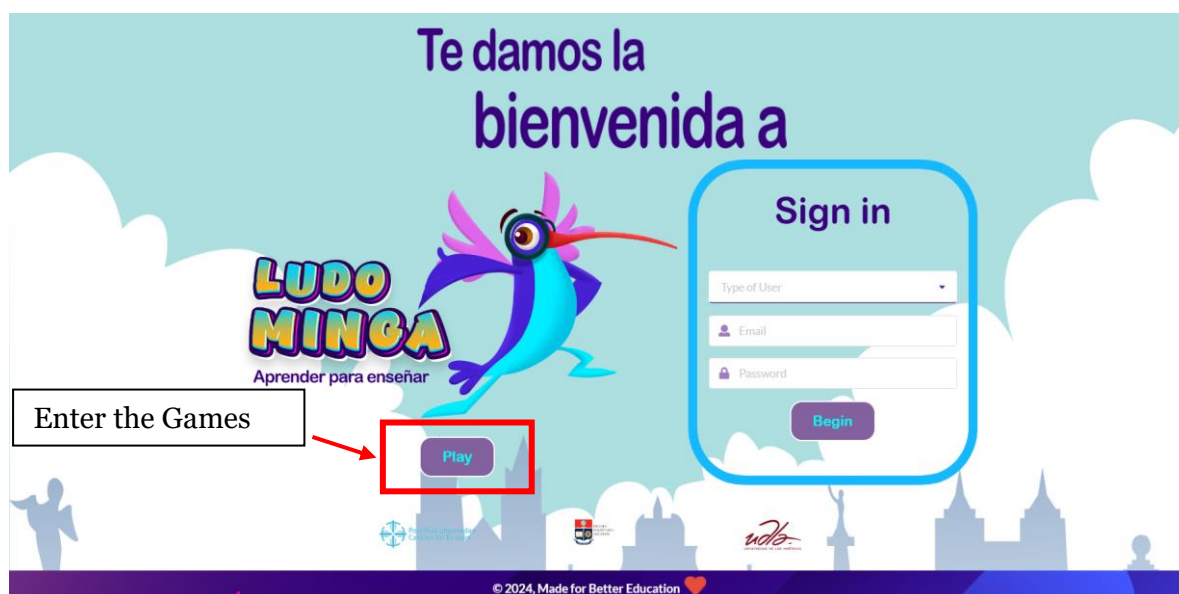

7. Steps to follow

Step 1: Access the Application

To start using the LUDOMINGA platform, the first step is to access the application through the following link: <https://juegos.ludominga.com/>. By clicking this link, you will be redirected to the home page of the application.

On the home page, you will see a splash screen with a colorful design and a friendly-looking character. On the right side of the screen, you will find a login panel with fields for User Type, Email, and Password. However, to start playing, you simply must click on the **Play button** located at the bottom center of the screen.

Note 1: It is important to keep in mind that to use the LUDOMINGA platform, you will need a stable internet connection. Additionally, the platform is designed to be used in a web browser, so you must have a compatible web browser installed on your device. If you are having trouble accessing the platform, check your internet connection and make sure you are using an updated web browser.

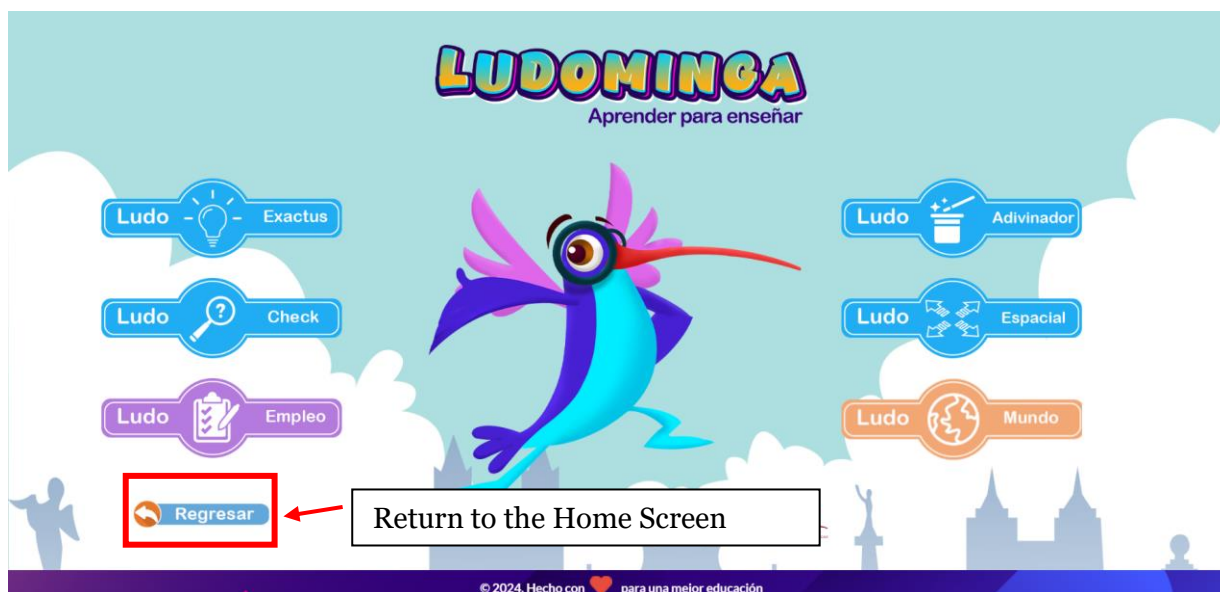

Step 2: Explore Learning Areas

Once you have accessed the LUDOMINGA platform and clicked **Play**, you will be greeted by a friendly, colorful character who will guide you through six exciting learning areas: Exactus, Check, Jobs, Guesser, Space and World.

Each of these areas is designed with interactive games and educational challenges to make learning both educational and fun. You can easily navigate between the different areas by clicking on the icons for each game, which are in blue, purple, and orange.

Additionally, there is a button labeled **Back** that will allow you to return to the home screen at any time.

Step 3: Explore the games

Once you have selected a play area within the LUDOMINGA platform, you will find several games on the screen.

3.1. Start the game

First, to select a game you can click on the left or right arrows to see the games available in this area and choose the game of your preference, then when considering the game you want to play, the most important element is the Play **button** which is located below each game, and which starts the game of your choice.

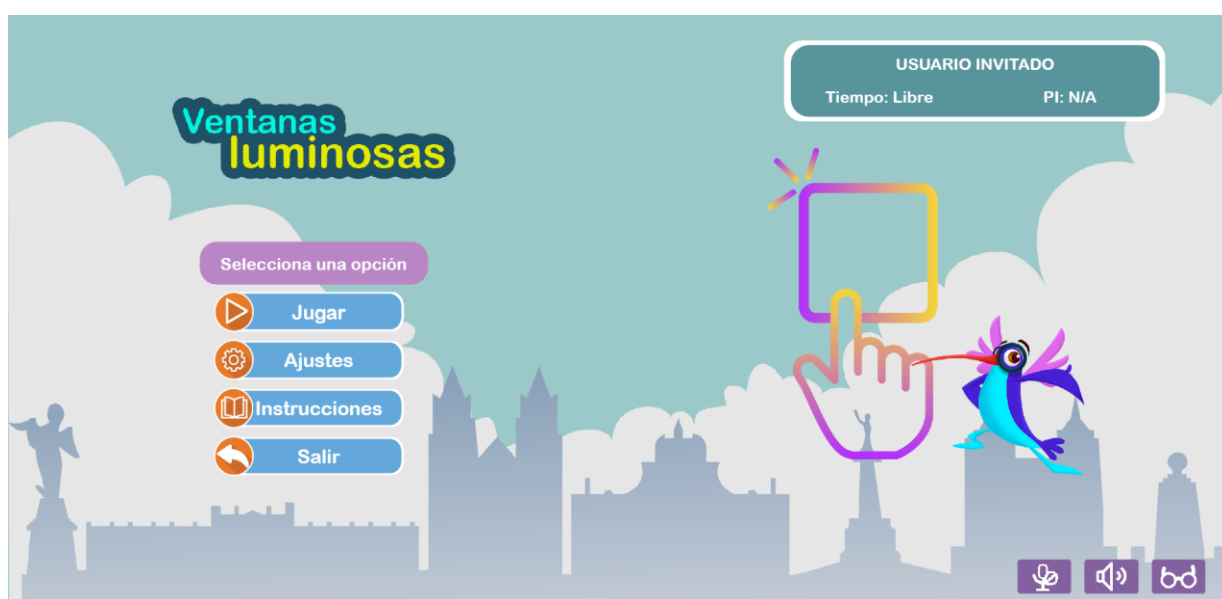

3.2 When Starting a Game

Once you click **Play** on a specific game, you will be taken to a new screen with several buttons which are:

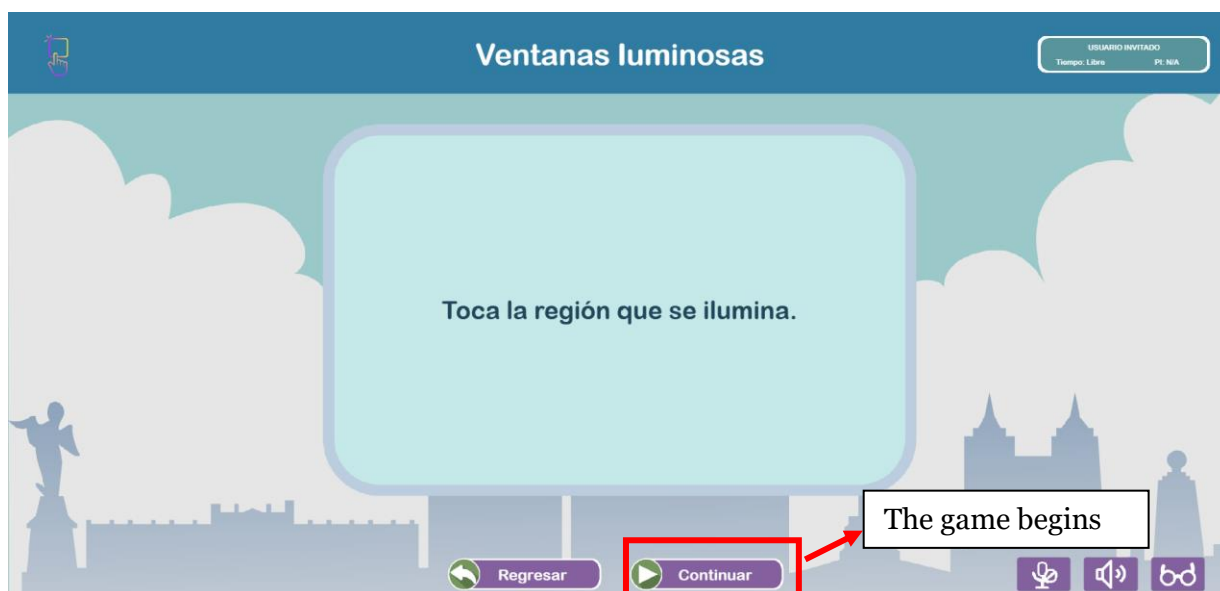

- Play
- Settings
- Instructions
- Go out
- 3 accessibility buttons

The functionality of each of these buttons will be detailed below:

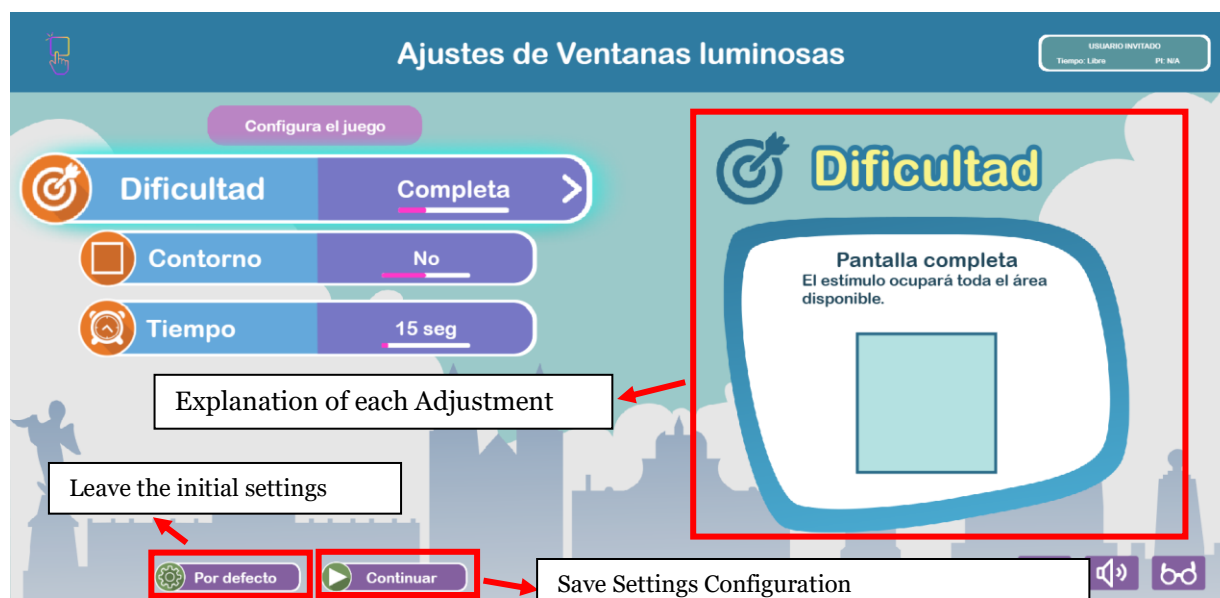

3.3 Play Button

It starts the game and takes you to another screen with the explanation of what you must do within the game, there you have two buttons, one to **Return** and the other to **Continue**.

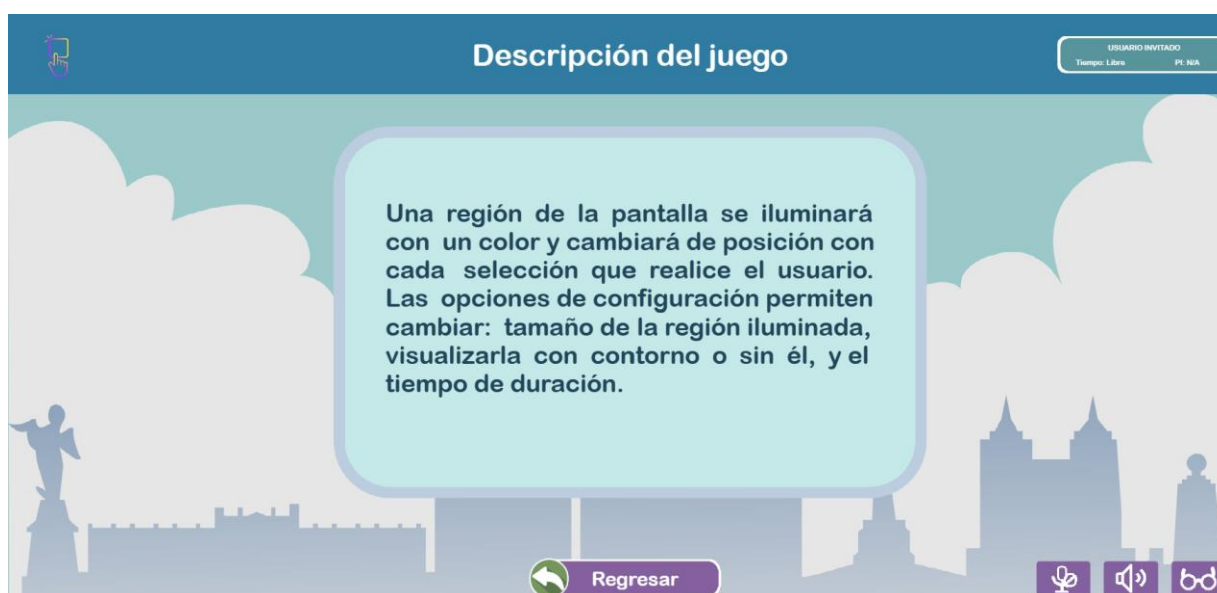

3.4 Settings Button

You will find a Settings section. Here you can customize the game difficulty, time, map size and other settings depending on the game, a brief explanation of each setting is displayed on the right side of the screen. You will also find two buttons, one **Default** to leave the initial settings and another **Continue** to save the changes made to the settings and return to the game options.

3.5 Button Instructions

There is also a set of instructions for each game. We recommend that you read them before you start playing to understand how the game works.

3.6 Exit Button

If at any point you want to exit the game and return to the main menu, simply click the **Exit button**.

If you started a game and click on the **Exit button**, you will be presented with a screen with the results of the game up to the moment where you decide whether to continue or end the game by clicking on the **Continue** and **End buttons** respectively.

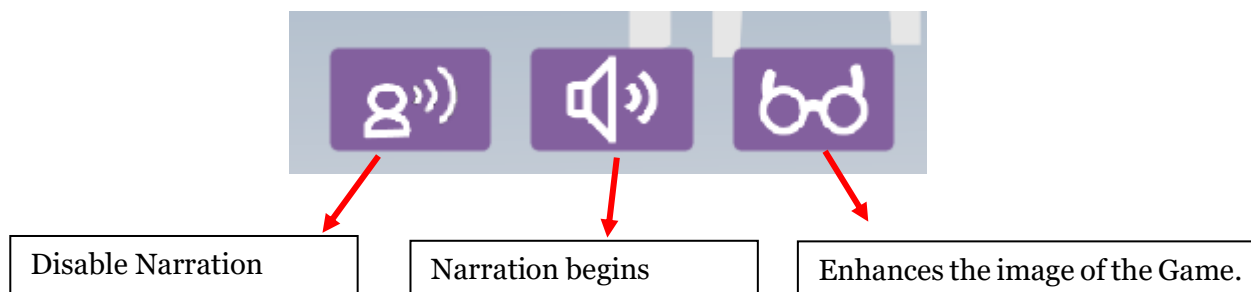

3.7 Accessibility Buttons

There are three additional buttons that improve the accessibility of the game, these you will find on all LUDOMINGA screens.

The first button is so that, if you prefer to play without the narration, you can click to mute the narrator.

The second button activates the narrator, who describes what is happening in the game and explains what each button is for.

The third is a magnifying glass, which allows you to enlarge the image of the game.

These are the basic elements that you will find in each LUDOMINGA game. Remember that each game is unique, so don't hesitate to explore and experiment.

Note 2: At any time during gameplay, you can click the **Back** or **Exit button** to return to a game area selection or home screen. This allows you to easily navigate between different games and learning areas depending on your preferences. Remember, LUDOMINGA is designed to be a flexible, user-centered learning experience.

Step 4: End of the Game and Results

At the end of time or completing the game, a screen with the results will be presented. This screen will show your performance in the game, including any scores, achievements or progress you have made.

On this results screen, you will be able to see a summary of your performance, allowing you to better understand your strengths and areas for improvement. This feedback may be useful to guide your learning and development as you continue to use the LUDOMINGA platform.

Finally, you can return to the main menu by pressing the **End button** so you can continue playing and exploring the other games.

Note 3: Remember that all these steps must be carried out with each of the games in each section that will be found in the application. Each game is unique and offers different challenges and learning opportunities.

Step 5: Explore Ludo World

In this game area, unlike the others, it must be considered that there is a new section of **Badges** that are obtained as the different challenges of the game are completed.

Within the game, there are 3 worlds: City, Home, Work, each of these has different badges to obtain as shown below:

Before starting a game, you must click on the world you want to select to play, since this is where you will get the badges by completing the different specific challenges in each of them.

Within each world, you can see the badges that can be obtained in the upper right part of the screen, and you can click inside each circle with the LUDOMINGA character to complete the challenge that is presented and get the corresponding badge or see the feedback which is obtained after each challenge.

Step 6: Explore Ludo Jobs

The Employment section at LUDOMINGA is designed to promote labor inclusion through a series of interactive workshops in the form of games. These workshops are designed to help you explore different careers and learn about the skills and knowledge necessary for each of them.

When you enter this section, you will usually find a variety of workshops posted. However, there may be times when no workshop is available. But don't worry, LUDOMINGA is constantly working to add new workshops and educational content. Therefore, we encourage you to check this section regularly for the latest updates.

Remember, each workshop in the Employment section is designed to be both educational and fun. Our goal is to make learning an exciting experience

8. Frequent questions

1. Do I need an account to use LUDOMINGA?

Not necessarily. You can click Play on the home screen to access games without creating an account.

2. How can I change the difficulty of the games?

Within each game, you will find a Settings section. Here you can customize the game difficulty, time, map size and other settings depending on the game.

3. What do I do if I have technical problems with the platform?

Make sure you have a stable internet connection and are using an up-to-date web browser. If the problem persists, you can try clearing your browser's cache or try a different browser.

4. How can I use LUDOMINGA's accessibility features?

Within each game, you will find three additional buttons that improve the accessibility of the game. The first is a magnifying glass, which allows you to enlarge the image of the game. The second button activates a narrator, who describes what is happening in the game and explains what each button is for. The third button allows silence the narrator.

5. How can I stay up to date with new LUDOMINGA features and games?

LUDOMINGA is constantly working to add new workshops and educational content. We encourage you to check the platform regularly for the latest updates.

9. Glossary

Term	Description
Platform	A system that allows users to interact with an application or service. In this case, LUDOMINGA is a platform that allows users to play various educational games.
Game	A game designed for an educational or training purpose, rather than simply for entertainment. The games in LUDOMINGA are serious games designed to improve cognitive and adaptive skills.
Accessibility	The practice of making an application or website easy to use for all people, regardless of abilities or disabilities. LUDOMINGA has several accessibility features, such as reading, audio, and image magnification options.
Usability	The ease with which users can use an application or website. LUDOMINGA is designed to be easy to use, with an intuitive user interface and customization options.
Universal Design for Learning (UDA)	A set of principles for curriculum design that provide all people with equal opportunities to learn. LUDOMINGA uses DUA in the design of its games.
Web navegation	The process of exploring and moving through the pages of a website. In LUDOMINGA, users navigate between different games and learning areas.
LUDOMINGA	It is a web-based psychoeducational platform designed to improve the cognitive and adaptive skills of people with intellectual disabilities.
